

## Features

- \* Package in 12mm tape on 7" diameter reels.
- \* Compatible with automatic placement equipment.
- \* Compatible with infrared and vapor phase reflow solder process.
- \* EIA STD package.
- \* I.C. compatible.
- \* Meet green product and Pb-free(According to RoHS)

## Package Dimensions

## Coplanarity

### Notes:

1. All dimensions are in millimeters (inches).
2. Tolerance is  $\pm 0.1$  mm (.004") unless otherwise noted.
3. Coplanarity: The stand-off from PPA to solder surface of leads is limited by USL: 0.08mm; LSL: 0.00mm means the solder surface of leads is higher 0.00mm or lower 0.08mm than PPA in limit.
4. The size of burr which is vertical to solder surface must lower than 0.08mm in limit.

## Property of Lite-On Only

### Absolute Maximum Ratings at Ta=25°C

| Parameter                           | Symbol    | Rating              |     |     | Unit |
|-------------------------------------|-----------|---------------------|-----|-----|------|
|                                     |           | R                   | G   | B   |      |
| Power Dissipation                   | $P_o$     | 75                  | 120 | 120 | mW   |
| Peak Forward Current <sup>1</sup>   | $I_{FP}$  | 100                 | 100 | 100 | mA   |
| Continuous Forward Current          | $I_F$     | 40                  | 40  | 40  | mA   |
| Reverse Voltage                     | $V_R$     | 5                   |     |     | V    |
| Operating Temperature Range         | $T_{opr}$ | -40 ~ +80           |     |     | °C   |
| Storage Temperature Range           | $T_{stg}$ | -40 ~ +100          |     |     | °C   |
| Soldering Condition <sup>1, 2</sup> | $T_{sol}$ | 260°C For 5 Seconds |     |     |      |

Note: Operating the LED (in an application) under reverse bias condition might result in damage or failure of the component.

Suggestion IR Reflow Profile For Pb Free Process :

IR-Reflow Soldering Profile for lead free soldering (Acc. to J-STD-020D)

Note :

1. Tolerance of Luminous Intensity +/- 10%
2. Tolerance of Dominant Wavelength +/- 1nm
3. Tolerance of Forward Voltage +/- 0.1V
4. Caution in ESD:

Static Electricity and surge damages the LED. It is recommend to use a wrist band or anti-electrostatic glove when handling the LED. All devices, equipment and machinery must be properly grounded.

5. CAS140B is the test standard for the chromaticity coordinates IV.

## Property of Lite-On Only

# User Guide

## Cleaning

Do not use unspecified chemical liquid to clean LED they could harm the package. If cleaning is necessary, immerse the LED in ethyl alcohol or isopropyl alcohol at normal temperature for less one minute.

### Recommend Printed Circuit Board Attachment Pad

Infrared / vapor phase

## Reflow Soldering

### Package Dimensions of Tape

## Package Dimensions of Reel

**Note:** Tolerances Unless Dimension  $\pm 0.1\text{mm}$ , Unit = mm

The material of reel was PC.

### Notes:

1. Empty component pockets sealed with top cover tape.
2. 7 inch reel-2000 pieces per reel.
3. The maximum number of consecutive missing lamps is two.
4. In accordance with EIA-481-1-B specifications.

## CAUTIONS

### 1. Application

The LEDs described here are intended to be used for ordinary electronic equipment (such as office equipment, communication equipment and household applications). Consult Liteon's Sales in advance for information on applications in which exceptional reliability is required, particularly when the failure or malfunction of the LEDs may directly jeopardize life or health (such as in aviation, transportation, traffic control equipment, medical and life support systems and safety devices).

### 2. Storage

This product is qualified as Moisture sensitive Level 3 per JEDEC J-STD-020 Precaution when handling this moisture sensitive product is important to ensure the reliability of the product.

The package is sealed:

The LEDs should be stored at 30°C or less and 90%RH or less. And the LEDs are limited to use within one year, while the LEDs is packed in moisture-proof package with the desiccants inside.

The package is opened:

The LEDs should be stored at 30°C or less and 60%RH or less. Moreover, the LEDs are limited to solder process within 168hrs. If the Humidity Indicator shows the pink color in 10% even higher or exceed the storage limiting time since opened, that we recommended to baking LEDs at 60°C at least 48hrs. To seal the remainder LEDs return to package, it's recommended to be with workable desiccants in original package.

### 3. Cleaning

Use alcohol-based cleaning solvents such as isopropyl alcohol to clean the LED if necessary.

### 4. Soldering

Recommended soldering conditions:

| Reflow soldering |               | Soldering iron |                 |
|------------------|---------------|----------------|-----------------|
| Pre-heat         | 120~150°C     | Temperature    | 300°C Max.      |
| Pre-heat time    | 120 sec. Max. | Soldering time | 3 sec. Max.     |
| Soldering Temp.  | 260°C Max.    |                | (one time only) |
| Soldering time   | 30 sec. Max.  |                |                 |

### 5. Drive Method

An LED is a current-operated device. In order to ensure intensity uniformity on multiple LEDs connected in parallel in an application, it is recommended that a current limiting resistor be incorporated in the drive circuit, in series with each LED as shown in Circuit A below.

Circuit model A

(A) Recommended circuit.

Circuit model B

(B) The brightness of each LED might appear different due to the differences in the I-V characteristics of those LEDs.

## 6. ESD (Electrostatic Discharge)

Static Electricity or power surge will damage the LED.

Suggestions to prevent ESD damage:

- Use of a conductive wrist band or anti-electrostatic glove when handling these LEDs.
  - All devices, equipment, and machinery must be properly grounded.
  - Work tables, storage racks, etc. should be properly grounded.
  - Use ion blower to neutralize the static charge which might have built up on surface of the LED's plastic lens as a result of friction between LEDs during storage and handling.
- ESD-damaged LEDs will exhibit abnormal characteristics such as high reverse leakage current, low forward Voltage, or "no light-up" at low currents.

To verify for ESD damage, check for "light up" and Vf of the suspect LEDs at low currents.

The Vf of "good" LEDs should be  $>2.0V@0.1mA$  for InGaN product.

## 7. Reliability Test

| ITEM | TEST ITEM                                                    | CONDITION                                                         | DURATION   | SAMPLE SIZE |
|------|--------------------------------------------------------------|-------------------------------------------------------------------|------------|-------------|
| P1   | Resistance to soldering heat (RTSH)<br>JEITA ED-4701 300 301 | IR soldering according attached lead free (Refer to J-STD-020D.1) | 10sec/3x   | 3lots*30    |
| P2   | Temperature cycle (TC)                                       | -20~25~85'C/<br>30min each (20mins trans)                         | 2500cycles | 3lots*30    |
| P3   | Steady state life test(SSLT)                                 | Ta=60'C<br>If (RGB)=25/30/15mA                                    | 20000hrs   | 3lots*30    |
| P4   | Pulse life test(PLT)                                         | Ta=60'C<br>If (RGB)= 25/30/15mA                                   | 20000hrs   | 3lots*30    |

## 8. Suggested Checking List

### Training and Certification

1. Everyone working in a static-safe area is ESD-certified?
2. Training records kept and re-certification dates monitored?

### Static-Safe Workstation & Work Areas

1. Static-safe workstation or work-areas have ESD signs?
2. All surfaces and objects at all static-safe workstation and within 1 ft measure less than 100V?
3. All ionizer activated, positioned towards the units?
4. Each work surface mats grounding is good?

### Personnel Grounding

1. Every person (including visitors) handling ESD sensitive (ESDS) items wear wrist strap, heel strap or conductive shoes with conductive flooring?
2. If conductive footwear used, conductive flooring also present where operator stand or walk?
3. Garments, hairs or anything closer than 1 ft to ESD items measure less than 100V\*?
4. Every wrist strap or heel strap/conductive shoes checked daily and result recorded for all DLs?
5. All wrist strap or heel strap checkers calibration up to date?

Note: \*50V for Blue LED.

### Device Handling

1. Every ESDS items identified by EIA-471 labels on item or packaging?
2. All ESDS items completely inside properly closed static-shielding containers when not at static-safe workstation?
3. No static charge generators (e.g. plastics) inside shielding containers with ESDS items?
4. All flexible conductive and dissipative package materials inspected before reuse or recycle?

### Others

1. Audit result reported to entity ESD control coordinator?
2. Corrective action from previous audits completed?
3. Are audit records complete and on file?
