图14

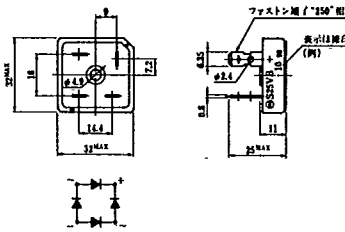

Figure 15 is a line graph showing the percentage of the population aged 65 and over from 1950 to 2050. The Y-axis is labeled "Percentage of population aged 65 and over" and ranges from 0 to 20. The X-axis is labeled "Year" and ranges from 1950 to 2050. The graph shows a steady increase in the percentage of the population aged 65 and over, starting at approximately 7% in 1950 and reaching approximately 18% by 2050. The line is labeled "U.S. population aged 65 and over".
