

Drill Sharpener BSG 220

220-240
VOLT

NOTE:

The use of the BSG 220 is quite simple and even allows novices to sharpen drill bits to DIN. However, carefully study the instructions before using the BSG 220 if you wish to sharpen drill bits expertly.

The operation is relatively simple, enabling everybody to sharpen standard 118° HSS, CrV and tungsten bits of 3 - 13mm diameter professionally.

A dressing stone, ensuring a sharp cutting surface, is also fitted.

Technical Data: Carborundum grinding disc size 50 x 13mm. 220 – 240V, 85W. ABS housing with fixing holes. Weight 1.7kg. An easy to understand operating manual and replacement disc accompany the unit. For further spare discs see page 30.

No 21 200

The sharpening operation is controlled exactly by means of the movable carriage. This moves from left to right and also rotates the drill bit on its own axis. This operation yields the correct relief angle. The carriage is fitted with a feed screw for fine feed.

Adapters for sharpening of small drill bits

These adapters extend the BSG 220's range to cover 1.5 – 3mm. One each adapter for sizes 1.5 – 1.6 – 2.0 – 2.4 – 2.5 and 3.0mm. Neatly packed in a wooden box with sliding lid.

Vacuum cleaner controller AS/E

Switches your dust extractor or vacuum cleaner on and off.

The controller supplies the power tool (either portable or stationary) and vacuum cleaner with power. It switches on the vacuum cleaner while the power tool is operational. Once the power tool is switched off, a 3 second run-down period ensures the workplace is properly vacuumed.

Additional switch positions switch the vacuum cleaner on or off permanently. Usable with power tools of 25 – 500W and vacuum cleaners of up to 1,500W.

No 27 032

NOTE:

The wooden mount, used to position the vacuum cleaner hose on the work surface, is not included.
