

NPA

Surface-Mount Pressure Sensor Series

The NPA product series is provided in a miniature size as a cost effective solution for applications that require calibrated performance. Packaged in a SOIC14 pin surface mount, the NPA Series is available in Gage, Absolute or Differential pressure ranges with either mV, amplified analog or digital outputs. The sensor is intended for printed circuit board mounting and delivered in optional tape and reel form to simplify manufacturing handling.

Features

- Surface Mountable
- Differential, Gauge, Absolute & Low Pressure
- 10" H2O to 30 PSI Full Scale
- Analog Amplified Analog or Digital Output
- Uncalibrated mV Output Option
- Digital pressure signal: 14 bit ADC / 11 bit DAC
- On chip temperature sensor in digital mode
- Operating temperature range of -40 to 125°C
- Total Error Band < $\pm 1.5\%$ FSO
- 60X overpressure on ranges < 1 PSI

Suggested PCB Land Pattern

Manifold Design (All measurements given in mm)

Barbed Fitting Design

Recommended tubing size of 3/32" ID, 7/32" OD, 1/16" wall thickness

Typical Analog Circuits

Circuit layout same as “Ratiometric Voltage Output”

Ratiometric Voltage Output

Absolute Voltage Output

Ratiometric Voltage Output with Over-Voltage Protection

Digital Output Options

Streaming serial output is a 14 bit number proportional to the full scale

Digital Output (NOM) Bridge Readings

Digital Output (NOM) Bridge Readings with Temperature
