Part Number : DM330016 - Audio Development Board for dsPIC33E

The Audio Development Board for dsPIC33E features a 60-MIPS dsPIC33E MCU, a 24-bit Wolfson audio codec, a two-inch color LCD display, a USB interface, and an onboard microphone. Supported by the Microchip free software libraries, the kit provides a perfect solution for the development of iPod music playback, speech & audio recording and playback, as well as MP3 decoding applications. Target applications include docks for portable audio players, home entertainment systems and automotive sound systems. Included in the box:

- Audio development board
- Power supply
- Information sheet
