

Worldwide supplier of high quality electronic components

NTE[®]
ELECTRONICS, INC.

FUSES

And other circuit protection devices

- Polymeric PTC Resettable Fuses
- Gas Filled Surge Arresters
- Integrated Circuit Protectors
- Thermal Cut-Offs
- Metal Oxide Varistors
- Overvoltage Transient Suppressors
- SIDACS
- Thermal Circuit Breakers

Compliant product now
available on most items.

ECG[®]

Now part of the NTE family

1ST EDITION

INTRODUCTION

Technical Guide:

NTE is pleased to present the **1st edition** of their Fuse Technical Guide. This Technical Guide is designed to give engineers, technicians and buyers assistance in selecting the NTE component best suited for their specific application or circuit.

- Technical specifications should be consulted to assure the proper replacement has been identified
- "TYPICAL" parameters can and do vary in different applications
- All operating parameters, including "TYPICALS," must be validated for each application by customers' technical experts
- NTE reserves the right to make any changes without further notice to any product herein

Extensive New Fuse Line!

To order call us at: 973-748-5089 or fax: 973-748-6224 or visit www.nteinc.com

WARRANTY

2 Year Warranty: NTE products are warranted to be free from defects in materials and workmanship and meet applicable specifications when tested to ratings. This warranty is in lieu of any other warranty expressed, implied, or statutory. NTE's liability under this warranty is limited to repairing, replacing, or issuing credit (at the discretion of NTE) for such products that become defective or fail to meet specification during the warranty period of two years from the date of sale. The technical data shown is intended to provide safe areas of operation for NTE products. Determination as to whether a product is actually defective rests with NTE. In no event will NTE be liable for consequential or special damages.

Technical Assistance: For further detailed product information first check out our web site at www.nteinc.com. If the information you need is not there, or you don't have internet access, you may also call us at 973-748-5089 or fax us at 973-748-6224.

Safety Warning: NTE devices are not to be used as critical components in life support equipment. Testing of solid state devices should be performed by experienced personnel using test instruments specifically designed for such purposes.

74-FC3, Fuse Clips

Specifications:

- For 3.6 x 10mm Fuse
- Contact Resistance: $-10M\Omega$ Max
- Rating: 6A / 250VAC

FA-01

74-FC5, Fuse Clips (Double Fluted)

Specifications:

- For 5 x 20mm Fuse
- Contact Resistance: $-10M\Omega$ Max
- Rating: 5A / 250VAC

FA-02

74-FC6, Fuse Clips

Specifications:

- For 6 x 30mm Fuse
- Contact Resistance: $\leq 10\text{m}\Omega$ Max
- Rating: 12A / 250VAC

FA-03

74-FB5, Fuse Block w/Clear Cover

Specifications:

- For 5 x 20mm Fuse
- PC Mount
- Rated for Current up to 10A

FA-04

74-FH5, Fuse Holder

Specifications:

- For 5 x 20mm Fuse
- Rating: 10A / 250VAC
- Panel Mount
- Finger-Grip Fuse Extractor Type Knob

FA-05

74-IFH5, In-Line Fuse Holder

Specifications:

- For 5 x 20mm Fuse
- Rating: 15A / 250VAC, 32VDC
- 14 AWG Red Wire Leads w/Cut Ends
- Finger-Grip Fuse Extractor Type Knob

FA-07

74-FH6, Fuse Holder

Specifications:

- For 6 x 30mm & 6.3 x 32mm Fuses
- Rating: 10A / 250VAC
- Panel Mount
- Finger-Grip Fuse Extractor Type Knob

FA-06

74-IFH6, In-Line Fuse Holder

Specifications:

- For 6 x 30mm Fuse
- Rating: 20A / 250VAC, 32VDC
- 12 AWG Red Wire Leads w/Cut Ends
- Finger-Grip Fuse Extractor Type Knob

FA-07

Pre-Packaged Fuse Kits

FUSE KITS

- 74-5x20Kit** – 5 x 20mm Glass Fuse Kit
74-3AGKit – 3AG Equivalent, 6 x 30mm Glass Fuse Kit
74-AutoKit – Automotive Fuse Kit (Contains ATC and ATM Equivalent Types)

Features:

- Each kit contains 5 each of selected Fuse types and Accessories
- One piece frame is lightweight and virtually unbreakable
- Separate compartments for each Fuse/Accessory
- RoHS Compliant

74-5x20Kit 5 x 20mm Glass Fuse Kit (Contains 5 of each)					
1A, Slow Blow	2A, Slow Blow	3A, Slow Blow	4A, Slow Blow	5A, Slow Blow	1A, Fast Acting

Electrical Specifications

Electrical Characteristics (@ 25°C)

Calibration: Will continuously carry 100% of rating.

May trip between 101% and 144%, but must trip at 145% of rating at +25°C

Maximum Operating Voltages: 50 VDC; 250 VAC, @ 50/60 Hz

Dielectric Strength: 1500VAC RMS

Resettable Overload Capacity: Ten times rated current

Interrupt Capacity:

2000 Amps at 50 VDC

1000 Amps at 250 VAC

Mechanical Characteristics

Termination: .250 (6.35) Quick Connect Terminals

NOTE: Soldering to terminals is not recommended.

Shock: Withstands to 10 g

Endurance Cycling: Over 1000 cycles at 200% of rated load.

Vibration: Withstands to 10 g at 10 to 55 Hz.

Weight: Less than 1.5 ozs. (42.5 g)

NOTE: 30A devices NOT UL or CSA.

R59 Series Thermal Circuit Breaker

Features

- Replaces Slow Blow Glass Cartridge Fuse
- .250" (6.35mm) Quick Connect Terminals
- Snap-In Mounting
- Visual Trip Indicator
- Push Button to Reset Breaker

Electrical Characteristics (@ 25°C)

Calibration: Will continuously carry 100% of rating.

0.25 to 2 Amp types: May trip between 101% and 174%, but must trip at 175% of rating within one hour at +25°C

3.0 to 20 Amp types: May trip between 101% and 134%, but must trip at 135% of rating within one hour at +25°C

Maximum Operating Voltages: 32 VDC; 250 VAC, @ 50/60 Hz

Dielectric Strength: 1500VAC RMS

Resettable Overload Capacity:

0.25 to 2 Amp types: Six times rated current

3.0 to 20 Amp types: Ten times rated current

Reset Time:

0.25 to 2 Amp types: 180 seconds max.

3.0 to 20 Amp types: 10 to 60 seconds typ.

Interrupt Capacity: 1000 Amps @ 250 VAC, 50/60 Hz. and 32 VDC

in accordance with UL standard 1077

Thermal Cut Off (TCO)

Features

- Maximum Current Rating: 15 Amps
- Typical Opening Temperature Tolerance: +0°C, -5°C
- 18 Gauge Solid Copper Wire
- Full 1 1/3" leads to fit all replacement configurations
- Each device comes packaged with 2 crimp splices for solderless connection (Poly-bag orders only)
- All types meet the requirements of Underwriters Laboratories Specifications, CSA, and VDE
 - UL File No. E49429
 - UL File No. E117626 (Guide # XCMQ2)
 - C-UL File No. E117626 (Guide # XCMQ8)
 - CSA File No. LR43279
 - VDE File No. 115369

Diagram 193

277 VAC	20A RES	15A RES
120-277 VAC	125VA Pilot Duty	
180 VAC	3A Motor Rating	

Twenty One Thermal Cut-offs (also known as Thermal Fuses) are now included in the NTE product line. They are miniature, NON-RESETTABLE temperature sensitive devices designed to prevent appliances and electronic equipment from overheating. NTE thermal cutoffs are UL and CSA listed.

Literally thousands of different applications have been devised for thermal-cutoffs, thus providing a large replacement market. Such applications include:

- Hair Dryers
- Irons
- Electric Motors
- Microwave Ovens
- Toasters
- Refrigerators
- Hot Plates
- Window Fans
- Popcorn Poppers
- UPS
- Battery Chargers
- Glue Guns
- Coffee Makers
- Dishwashers
- And hundreds of others

The TCO (Thermal Cut-Off) responds to temperature by interrupting an electrical circuit when the operating and/or environmental temperature exceeds the thermal rating of the device. This is accomplished when the internal organic pellet experiences a phase change, allowing the spring activated contacts to permanently open the circuit.

8226	193	228	443	-	-	-	-
8242	193	240	464	200	392	290	554

Note 1: Temperature sensitive devices. Do not store above +48°C (+120°F).

Note 2: Color Band does not denote temperature group.

Note 3: The electrical resistance of the NTE series thermal cut-off is comparable to that found in an equal length of 18 gauge solid copper wire. With proper air flow, heat generation below 15 Amps is minimal, above 15Amps the upper limit on the current capacity will depend on the environment for each specific application.

Note 4: A general rule of thumb for continuous operating temperature for thermal cut-offs is 30°C less than the Maximum Opening Temperature.

Metal Oxide Varistor (MOV)

Features

- Available in 8.5mm, 16mm, and 23mm
- Increased power dissipation
- Low leakage
- Low overshoot characteristics
- High suppression capability

Applications

- Protect equipment from external transients on AC power lines and transients on telephone/signal lines
- Protect semiconductor components from transients caused by external equipment like motors, transformers, relay coils and solenoids

SELECTING THE PROPER MOV VOLTAGE RATING:

1. Determine the required voltage rating.

First, the maximum steady-state operating voltage of the circuit must be determined. Care must be taken to use the upper tolerance limit of the voltage source, e.g., for a 220VAC line, a 10% high line condition should be assumed, resulting in 242 Volts. Once the level is determined, refer to the column in the data table headed "Maximum Continuous Voltage" and select a group having the nearest greater value to this level.

Typical Power Supply Circuit

IC Protector (ICP)

Features

- Precise and extremely stable cut-off characteristics
- Small internal resistance with low voltage drop
- Nonflammable
- Compact
- Available in both “F” and “N” Types

Applications

- Overcurrent protection

The IC Protector (ICP) is an overcurrent protection device having stable and high-speed circuit tripping characteristics which enables these devices to shut off the circuit quickly and safely. This quick shut-off response protects valuable semiconductor devices and circuits from common load short-circuit failures.

Note 1: A Transient Suppressor is usually selected according to the "Reverse Stand Off Voltage (V_R)" which should be equal to or greater than the DC or continuous peak operating voltage level.

Note 2: Steady State Power Dissipation is 5 Watts. Forward Surge Current is 200 Amps. Storage & Operating Temperature Range is -65°C to +175°C.

Bidirectional Overvoltage Transient Suppressors

Features

- Axial Lead Package
- AC Bidirectional Surge Clamping Diodes

Applications

- Bidirectional Transient Protection of Data Transmission, Digital Controls, Computer Systems, etc.

Resettable Fuse Introduction

Resettable Circuit Protection

When it comes to Polymeric Positive Temperature Coefficient (PTC) circuit protection, you now have a choice.

Polymeric fuses are made from a conductive plastic formed into thin sheets, with electrodes attached to either side. The conductive plastic is manufactured from a non-conductive crystalline polymer and a highly conductive carbon black. The electrodes ensure even distribution of power through the device, and provide a surface for leads to be attached or for custom mounting.

The phenomenon that allows conductive plastic materials to be used for resettable overcurrent protection devices is that they exhibit a very large non-linear Positive Temperature Coefficient (PTC) effect when heated. PTC is a characteristic that many materials exhibit whereby resistance increases with temperature. What makes the polymeric conductive plastic material unique is the magnitude of its resistance increase. At a specific transition temperature, the increase in resistance is so great that it is typically expressed on a log scale.

How Polymeric Resettable Overcurrent Protectors Work

The conductive carbon black filler material in the polymeric device is dispersed in a polymer that has a crystalline structure. The crystalline structure densely packs the carbon particles into its crystalline boundary so they are close enough together to allow current to flow through the polymer insulator via these carbon "chains".

When the conductive plastic material is at normal room temperature, there are numerous carbon chains forming conductive paths through the material.

Under fault conditions, excessive current flows through the polymeric device. I^2R heating causes the conductive plastic material's temperature to rise. As this self heating continues, the material's temperature continues to rise until it exceeds its phase transformation temperature. As the material passes through this phase transformation temperature, the densely packed crystalline polymer matrix changes to an amorphous structure. This phase change is accompanied by a small expansion. As the conductive particles move apart from each other,

most of them no longer conduct current and the resistance of the device increases sharply.

The material will stay "hot", remaining in this high resistance state as long as the power is applied. The device will remain latched, providing continuous protection, until the fault is cleared and the power is removed. Reversing the phase transformation allows the carbon chains to re-form as the polymer re-crystallizes. The resistance quickly returns to its original value.

Product Selection

To select the correct polymeric circuit protection device, complete the information listed below for application, and then refer to the resettable overcurrent protector data sheets.

1. Determine the normal operating current:
_____ amps
2. Determine the maximum circuit voltage (V_{max}):
_____ volts
3. Determine the fault current (I_{max}):
_____ amps
4. Determine the operating temperature range:
Minimum Temperature: _____ °C
Maximum Temperature: _____ °C
5. Select a product family so that the maximum rating for V_{max} and I_{max} is higher than the maximum circuit voltage and fault current in the application.
6. Using the I_{Hold} vs. Temperature Table on the product family data sheet, select the polymeric device at the maximum operating temperature with an I_{Hold} greater than or equal to the normal operating current.
7. Verify that the selected device will trip under fault conditions by checking in the I_{Trip} table that the fault current is greater than I_{Trip} for the selected device, at the lowest operating temperature.
8. Order samples and test in application.

Applications

The benefits of polymeric Resettable Overcurrent Protectors are being recognized by more and more design engineers, and new applications are being discovered every day.

The use of polymeric types of devices have been widely accepted in the following applications and industries:

- Personal computers
- Laptop computers
- Personal digital assistants
- Transformers
- Small and medium electric motors
- Audio equipment and speakers
- Test and measurement equipment
- Security and fire alarm systems
- Personal care products
- Point-of-sale equipment
- Industrial controls
- Automotive electronics and harness protection
- Marine electronics
- Battery-operated toys

Polymeric PTC Resettable Fuses

Features

- Radial Leaded, High Hold Current, Solid State
- Operation Current: 100mA–9A
- Maximum Voltage: 30V
- Temperature Range: –40°C to +85°C
- Cured, Flame Retardant Epoxy Polymer Insulating Material Meets UL 94V–0

Applications

- Computers & Peripherals
- Security and Fire Alarm Systems
- General Electronics
- Loud Speakers
- Automotive Applications
- Power Transformers

AC Suffix 5A

AC Current:

11 Cycles 60Hz 20A

AC Suffix 5A

Insulation Resistance:

100 VDC 10,000 Megohms

Operating Temperature

..... -65° to +125°C

Response Time (Typical)

..... < 100ns

Typical Circuit Applications

Application	Protected Equipment	NTE Type
CATV	Trunk Amplifier	15043-ECG
	Cable Extender, Splitter, Grounding Block, Convert Box, 30 & 60 VAC Power Supply	15044-ECG
AC Line Protection	117 VAC Line	15049AC
	220 VAC Line, All AC Loads	15050AC
Communication	Modem	15046-ECG
	Antenna Connected Equipment	15041-ECG, 15043-ECG, 15044-ECG
Power Supplies	Voltage Doubler, Capacitors, Voltage Regulator, Rectifier Diodes	15044-ECG, 15047-ECG
Computer	Data Lines	15041-ECG, 15044-ECG
Test Equipment	Meter Inputs	15040-ECG, 15045-ECG
Capacitive Discharge	Ignition Circuit Components, Pulse Generator Components	15044-ECG, 15046-ECG
Signal Lines (Single Ended)	Alarm Circuits	15040-ECG
Communications (Lightning)	Telephone Line (Normal Mode)	15046-ECG
Power Line (Lightning)	AC Wall Output (Long Branch Circuit) 120 VAC	15049AC
	AC Wall Output (Long Branch Circuit) 120 VAC	15050AC
Process Control (24 MA Signal Loop)	Instrumentation Circuits	15040-ECG, 15041-ECG

SIDAC – Bidirectional Thyristor Diodes

Features

- Axial Lead Package

Applications

- High voltage lamp ignitors
- Natural gas ignitors
- Gas oil ignitors
- High voltage power supplies
- Xenon ignitors
- Overvoltage protection
- Pulse generators
- Fluorescent lighting ignitors

The SIDAC is a silicon bilateral voltage triggered switch with greater power handling capabilities than standard DIACs. Upon application of a voltage exceeding the SIDAC breakover voltage point, the SIDAC switches on through a negative resistance region to a low on-state voltage. Conduction will continue until the current is interrupted or drops below the minimum holding current of the device.

Specifications

Storage Temperature Range: -30° to $+30^{\circ}\text{C}$

Junction Temperature: $+125^{\circ}\text{C}$

Find all the critical
electronic components you need...
...in a heartbeat!

Cross reference over 500,000 industry parts at nteinc.com

For over 25 years NTE has been your "go-to" supplier for high quality electronic components. From **relays to resistors, semi's to switches and heat shrink tubing to hook up wire**, NTE helps you find the parts you need on the Web with our massive database and exclusive **QuickCross™** cross reference system. Plus with our **global network of distributors** you'll have the parts you need in no time.

Visit our Web site today to see for yourself.

Whatever your needs, NTE has the answer!

ECG Aerosol Chemicals

- Butane Fuel
- Smoke Detector Tester Spray
- Antistatic Circuit Refrigerants
- Electronics Degreasers and Washes
- Electronics Contact Cleaners, Degreasers and Washes
- Electronics Contact Cleaners with Lubes
- Heavy-Duty Flux Removers
- Jet Air Cleaners
- Heavy-Duty Cleaning Solvents
- Electronics Washes
- Hydroentangled Cellulose/ Polyester C-Fold Wipes
- Silicone Lubricants
- Label and Adhesive Removers
- General Duty Defluxers
- Straw Holders
- Computer Glass and Plastic Cleaner
- CARB Compliant Types

ECG Butane/Electric Soldering and Heat Products

- Butane Fuel
- Butane Soldering Irons
- Butane Heat Guns
- Butane Torch
- Electric Corded Soldering Irons
- Electric De-soldering Irons
- Tips and Accessories
- Soldering Iron Kits
- Soldering Guns
- Industrial Heat Guns
- Economy Heat Guns

ECG LED Flashlights

- Emerge 'N See Wind Up Flashlight
- LED Flashlight with 14 Super Bright LEDs

ECG Rotors

- Precision Cut Steel Gears
- Rugged One-Piece Cast Aluminum Housing
- Large Bearing Surface; Strong Reinforced Mast
- High Torque
- Automatic Control
- Remote Control Programmable Version

ECG Surge Suppressor Outlet Strips

- Plug-in Protection for Office, Industrial, Institutional and Residential Applications
- Multi-Outlet Combinations
- Steel or Plastic Case
- Optional Phone-Line Protection
- General Purpose Protector
- Optional EMF/RFI Noise Filter
- Single and 3 Mode Protection
- 90° Rotated Outlets to Accommodate External Power Supplies
- Some with 15' Cords

ECG Test Equipment

- Analog Multimeters
- Digital Multimeters
- AC Clamp-On Digital Meters
- AC Clamp-On Current Adapter
- Digital Capacitance Meter
- Battery Tester
- Handheld Digital Thermometer
- Logic Probes
- Oscilloscope Probes
- Test Leads
- Digital Infrared Thermometer

NTE Cable Ties

- Standard Cable Ties
- Specialty Cable Ties
- Cable Tie Tension Tools
- Cable Tie Accessories
- Convenience Packs
- Split Loom
- Assorted Sizes & Colors

NTE Capacitors

- Aluminum Electrolytic
- Ceramic Disc
- Tantalum
- Mylar/Polyester Film
- Motor Start/Run
- Ceiling Fan
- Snap-in Mount
- Surface Mount Types
- Multilayer (Monolithic) Ceramic
- Prepackaged Kits

NTE Fuses

- Tube Type Case Sizes
3.6 x 10mm / 5 x 20mm / 6 x 30mm
- Glass and Ceramic
- Fast and Slow Blow
- Standard and Mini Automotive Blade Series
- Fuse Clips
- * Panel Mount Holders

NTE Heat Shrink Tubing

- Assortment Packs Available
- Thin Wall Cross-Linked Polyolefin
- Dual Wall Cross-Linked Polyolefin with Adhesive
- Medium Wall with Adhesive
- Thick Wall with Adhesive
- Available in 7 Colors
- Shrink Temperature: 120°C
- Shrink Ratio: 2:1Thin/3:1 Dual
- Cut / Marked Service

NTE Hook-Up Wire

- Automotive Wire
- 300V and 600V Solid and Stranded Wire
- Teflon® Coated Wire
- Speaker Wire Clear
- Black/Red Bonded Speaker Wire
- 10 Colors and Gauges from 10 to 26
- New High Performance Home Audio Speaker Cable
- Audio Speaker Cable

NTE LED Tubing

- For Interior Lighting
- Super Bright LEDs
- Blue, Green, Red, White, Amber, Multi
- Flexible
- Connectible - Up to 15 Tubes

NTE Relays

- Electromechanical
- Solid State
- Automotive Type
- Reed
- Time Delay
- I/O Modules
- Thermal Circuit Breakers
- Magnetic Latching
- Accessories
- Surface Mount Types
- Replacements for Over 83,400 Types
- Proximity Switches

NTE Resistors

- Flameproof 1/8W to 3W
- Power Wirewound 5W/10W/25W
- Fusible Power Oxide 1W/2W
- Prepackaged Kits
- Surface Mount Wirewound up to 4 Watt
- Metal Clad Aluminum Precision Wirewound
- 1% Metal Film
- Fixed & Adjustable Vitreous from 12 to 300 Watt
- Round Silicone Wirewound Ceramic from 1 to 10 Watt

NTE Semiconductors

- Super Bright LEDs
- Power Block/Hybrid Mod.
- Industrial Rectifiers/Bridges
- Small Signal/Power Transistors
- Voltage Regulators
- Transient Suppressors
- Thermal Cutoffs
- Thyristors
- Zener Diodes
- Integrated Circuits
- Surface Mount Types
- Replacements for Almost 400,000 Industry Types

NTE Switches

- Bat Handle
- Toggle and Mini-toggle
- Paddle
- Rocker
- Metal and Nylon Pushbutton
- Snap Action
- Sealed Automotive/Marine Types
- Anti-vandal
- Round Hole Rocker
- Pull Chain
- Waterproof
