MINIMUM REQUIREMENT

Switch body for example 501000-000
 Contact block for example 593561-000
 Lens cap for example 460012-000

Contact blocks are ordered separately from switch activator.

QUICK MOUNTING OF THE CONTACT BLOCKS
SIMPLY BY SLIDING ON AND SECURING

ASSEMBLY:

SECURING:

The contact block slides on to the dovetail of the switch body while the slot in the red locking pin is parallel to the dovetail.

Once the contact block is fully in position the red locking cam is turned through 90° with a suitable screwdriver.

SELECTOR MECHANISM

All maintained switches in the th25 series feature a simple bifunctional selector mechanism that converts the maintained switch to momentary and back again. The selection is made by moving a small wire clip which is visible through an aperture in the body of the switch, with a device such as a paper clip.

Rectangular tapered bezel style

	Faston Connection	Solder Connection
Momentary	501000	501100
Maintained	511000	511100
Indicator lamps	551000	551100

Rectangular concealed bezel style

	Faston Connection	Solder Connection
Momentary	501002	501102
Maintained	511002	511102
Indicator lamps	551002	551102

Rectangular flat lens exposed bezel style

	Faston Connection	Solder Connection
Momentary	501008	501108
Maintained	511008	511108
Indicator lamps	551008	551108

Rectangular exposed bezel style, concave lens

	Faston Connection	Solder Connection
Momentary	501008	501108
Maintained	511008	511108
Indicator lamps	551008	551108

Lens flat 14x20
