
Never-Seez Anti-Seize Compound

Nickel Special Grade

BOSTIK NEVER-SEEZ COMPOUND NICKEL SPECIAL GRADE is a superior product for high temperature anti-seize and extreme pressure lubrication for use where the presence of copper is prohibited. It contains very fine metallic and graphitic flakes in a special hydrocarbon carrier to protect metal parts against seizure, galling, rust and fretting under extreme conditions of heat, pressure and corrosive environments.

RECOMMENDED USE

BOSTIK NEVER-SEEZ COMPOUND NICKEL SPECIAL GRADE provides a fine protective film that cannot be completely burnt off or completely removed by abrasion, or washed off by fresh or salt water. The use of BOSTIK NEVER-SEEZ COMPOUND NICKEL SPECIAL GRADE provides the following advantages:-

- * Keeps parts working longer with less wear
- * Minimises part replacement costs
- * Enables faster dismantling when repairs are needed - reduces down-time
- * Prevents heat seizure, corrosion, galvanic pitting and electrolysis.

BOSTIK NEVER-SEEZ COMPOUND NICKEL SPECIAL GRADE contains very fine flakes of nickel, graphite, and other additives known to enhance anti-seize performance especially in corrosive acid and alkaline environments. Protection to approximately 1300°C under static conditions is provided. (Note: The grease carrier and other organic material will carbonise at approx. 300°C but the residual metallic flakes provide lubrication at the higher temperatures because they slip over each other).

BOSTIK NEVER-SEEZ NICKEL SPECIAL GRADE meets the requirements of:-

Boeing BAC 5008
Ford ESE-M12A4-A
Garrett Engine Div PC55721
GE Aircraft A50TF198 Class A
General Motors 14001899
Pratt and Whitney PWA 36053-1
MIL-A-907

NOTE: The carrier in BOSTIK NEVER-SEEZ COMPOUND NICKEL SPECIAL GRADE has been developed specifically for these products which contain a high loading of additives designed to provide lubrication in static conditions at very high temperatures. Although used extensively in low speed bearing applications they are not recommended for high speed bearings.

IMPORTANT: DO NOT USE BOSTIK NEVER-SEEZ COMPOUND NICKEL SPECIAL GRADE WITH OXYGEN SYSTEMS. However, they are suggested for fixtures transporting ammonia and Acetylene and can be used when corrosive vapours are present.

APPLICATION INSTRUCTIONS

Apply BOSTIK NEVER-SEEZ COMPOUND NICKEL SPECIAL GRADE by brush or aerosol spray to the mating surfaces of appropriate components. Then assemble these components as required.

This Product Data Sheet covers just one of a large range of products supplied by Bostik Limited. Full information on these products and advice on application is freely available from our fully trained staff throughout the country. In addition, specialist technical advice is available from our Technical Services Department. This Product Data Sheet supersedes all previous technical information on this product, and users of it are cautioned to ensure that it is the current issue. Destroy all previous Product Data Sheets, and if any doubt, contact Bostik Limited, quoting the code number in the top right hand corner on the front of this document. It is not essential to degrease metal surfaces to which BOSTIK NEVER-SEEZ COMPOUND NICKEL SPECIAL GRADE is applied but all surfaces should be dry and free from foreign matter. Clean rusted metal surfaces by wire brushing and then removing the resulting surface powder.

CLEANER: Use CLEANER 2 or CLEANER 4 for removing excess compound and for cleaning application equipment.

TYPICAL CHARACTERISTICS

Form	Viscous Paste
Colour	Grey
Chemical Type	Hydrocarbon grease with metallic and graphitic flakes
Viscosity	Paste
Particle size	50 microns maximum
Solvent content	None
Temperature Resistance	-180 to +1315°C
Water Resistance	Very Good to Water , Salt Water , Steam and Humidity
Chemical Resistance	Good
Gas Resistance	Inert to most gases including propane, butane, natural gas, helium and nitrogen. DO NOT USE WITH OXYGEN SYSTEMS
Coefficient of Friction	0.092 ASTM D-2266

PACKAGING

Please refer to Customer Service Department for current package sizes.

STORAGE

Store under dry conditions below 25°C.
Keep containers out of direct sunlight and away from other heat sources.
Keep containers tightly closed.

SHELF LIFE

5 years from date of manufacture, under the above conditions of storage.

MATERIAL SAFETY DATA

For further information refer to the relevant Health and Safety Data Sheet.
