FX8, FX8C Series

FX8 Series

FX8C Series

Note that FX8 series and FX8C series are not mated with each other.

■Features

1. Stacking Height 3mm to 16mm available

The board to board stacking height can correspond to 3mm~16mm.

2. SMT Coplanarity

The coplanarity of the SMT solder area lead is maintained at the high accuracy of less than 0.1mm.

3. Mating Guide

The very small and guide rib is provided, and secures ± 0.6 mm self-alignment, considering the mating operativity into accounts.

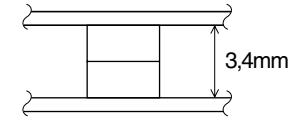

4. Mis-insertion Prevention

The boss prevents mis-insertion in the board to cause due to the boss position and boss diameter.

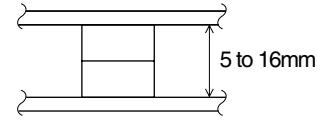

5. Two-piece Connection Product

In order to enhance the mating reliability for the fine pitch connector using two-pieces, the two-pieces of connectors are combined by our unique method, and can secure the mount position accuracy. In such a new concept, the two-piece connected product is prepared at every number of contacts (The standard mating pitch for the two-piece interconnected product in two rows is 11mm.)

◆PCB mounting pattern

• Recommended metal mask thickness : t = 0.15mm

- Recommended metal mask thickness : t = 0.15mm
- If the inside (the connector lower side) of the SMT land isn't treated with the insulation tape and so on, the area is considered as the prohibited area.(FX8C-S-SV5 isn't applied.)

◆Connector Precautions

1. Tolerance Clearance on Mating Side

The effective contact length of the product is set to 2.0mm. Please use the product so as to set to less than 12mm the clearance between the header and the receptacle in the mating process..

2. Fixation Between Mounting Boards

If this product is fixed only by mating force, Please consider the fixing method so as not to apply loads such as vibration, shock and so on.

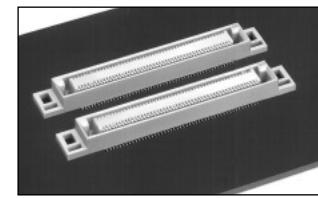

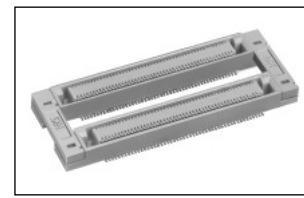

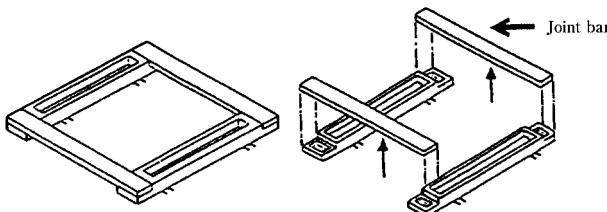

3. Stacking General Tolerance in Mating

Stack Amm \longrightarrow A $^{+0.3}_{-0.2}$ mm

Note: Please Note that the above tolerance of the stacking height doesn't include the solder paste thickness.

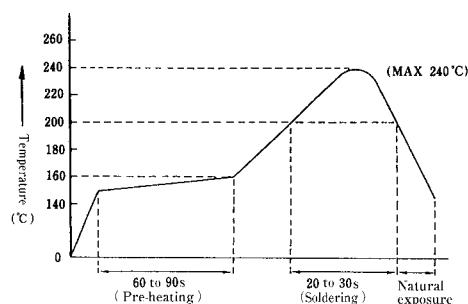

4. Handling Two-piece Connection Product

Both joint bar edges of the two-piece connection product are fixed by joints, while the mating process can't be performed in that state. Before the mating process, please remove the joint bars as if pull it up. (Don't remove the joint bars before mounting on the board.)
