

Waterproof Connectors with Crimp Contacts Compatible with JIS-B-6015

RoHS2

CE01 Series

DDK Ltd.

◆ OUTLINE

CE01 series is compatible with JIS-B 6015, Japanese Industrial Standards, and is superior in waterproof and dustproof connector which has a ground contact to protect a circuit.

This connector is ideal for use under the external condition such as industrial equipment which needs to withstand moisture, oil, and dust.

◆ FEATURES

- Five-key position prevents cross-plugging problems and one touch lock design is capable to lock surely with click note. (Bayonet Coupling)
- Receptacle connector has an o-ring which conforms to meet IP67 to prevent moisture, oil and dust when the connectors are mated. Besides, when the plug connector uses a conduit with an o-ring, both plug and receptacle can be waterproof.
- Connectors are provided with a pre-mating and ground contact having conductivity with the shell to protect a circuit. The pre-mating contact is mated first before the other contacts and dismated last when dismating the connector.
- Contact is crimp type and easy to terminate. Also it is easy to extract the contact from the insert by the extraction tool.
- UL approved (File No. E72124)

◆ SPECIFICATIONS

Rated Current	Contact Size	#20	#16	#12	#8
	Maximum Rating per Contact	5A	13A	23A	46A
Rated Voltage	Service Rating	INST		A	D
	AC(r.m.s.)	200	500	900	
	DC	250	700	1,250	
Dielectric Withstanding Voltage	AC(r.m.s.)/1minute	1,000	2,000	2,800	
Insulation Resistance	5,000M Ω min. at 500VDC				
Contact Resistance	Contact Size	#20	#16	#12	#8
	m Ω max.	8	4	2	0.6
Operating Temperature	-55°C to +125°C				
Humidity	95% max.				

◆ MATERIAL / FINISH

Item	Material / Finish
Shell	Aluminum Alloy / Zinc Plating, Black Trivalent Chromium Treatment
Coupling Ring	Aluminum Alloy / Zinc Plating, Black Trivalent Chromium Treatment
Insert	Polyester Resin (UL94V-0) Gray
Contact	Copper Alloy / Silver Plating
O Ring	Nitrile Rubber
Ground Clip	Copper Alloy / Silver Plating
Gasket	Polychloroprene or Ethylenepropylene Rubber

► Waterproof Straight Backshell

CE01-22BSL-D S(R1)

① ② ③ ④ ⑤ ⑥

① Shell Size	18, 20, 22, 24 and 28
② Part	B : Backshell
③ Style	S : Straight
④ Shell Type	Omit : Standard Backshell L : Long Backshell
⑤ Finish	D : Black Trivalent Chromium Treatment
⑥ Waterproof	S : Waterproof

MATERIAL / FINISH

Aluminum Alloy/Black Trivalent Chromium Treatment

The straight backshell retains the cable when the conduit is not used. Two kinds of backshells in different length are available for the shell size of 22, 24 and 28.

Use the waterproof backshell with the waterproof cable clamp.

Shell Size	Part Number	A	B	C	V	W	L
18	CE01-18BS-DS(R1)	29.3	16.3	26.73	1-20UNEF-2B	1-20UNEF-2A	55

CE3057-16A-8-D(R1)							12.5			CZY005-GB-6	φ 10.5 ~ φ 12.5

- ※ 1 : CE3057- A- - D is a waterproof cable clamp for use with D/MS(D190), CE01 and CE02 plugs.
 The main body is the same as D/MS3057A- . The cable clamp has a waterproof rubber bushing.
 Make sure to use a cable meeting one of the applicable cable size ranges as shown in the chart.
 The cable clamp should be used together with the waterproof backshell.
- ※ 2 : Depending on the cable used, the contact between bushing and cable may be discolored.

Cable Clamp

D/MS3057- A(R1)
 ①

① Clamp Size	10, 12 and 16
--------------	---------------

MATERIAL / FINISH

	Material	Finish
Cable Clamp Body and Metal Fastener	Aluminum Alloy	Black Trivalent Chromium Treatment
Bushing	Synthetic Rubber	Black

Part Number	Applicable Shell Size	A	B	C	D	E	G	V	Bushing P/N
D/MS3057-10A(R1)	18	23.83	30.1	10.3	15.9	14.3	31.7	1-20UNEF	AN3420-10
D/MS3057-12A(R1)	20, 22	23.83	35.0	10.3	19.0	15.9	37.3	1 3/16-18UNEF	AN3420-12

- ※ 1: D/MS3057- A is an accessory which is used together with a backshell to fasten the cable.
 The cable is fixed in the center of the cable clamp for sure since the cable is fixed from both directions with two pieces of the metal clamps and the screws. The jacketed cable can be used with this cable clamp as well because a rubber bushing shown on the table above is inserted.
- ※ 2 : Depending on the cable used, the contact between bushing and cable may be discolored.

Note 1 : 357J-12605 is a tool kit part number which includes the crimping tool, 357J-12606, 357J-12607, 357J-12608 and 357J-12724.

The crimping tool can not be sold alone separately.

Note 2 : 357J-12725 is a tool kit part number which includes the crimping tool, the locator and the inspection gauge.

Note 3 : 357J-12723 is a part number which contains 3 pieces of the inspection gauges.

Note 4 : The tool instruction manuals are available. Contact the nearest sales office or distributor.

▶ Semi-Automatic Crimping Machine

CE01- # 20P-C2 CE01- # 20S-C2	AP-A13614	LPC220S	AP-A13614-1

■ Note

- #20 contacts are quite smaller in outer diameter than #16 contacts. Insert #20 contacts into the insert with care so as not to damage or deform the contacts.
- Make sure that all contacts remain fixed in the insert completely. Around the last 2 or 3 pieces of contacts should be taken care in particular for a larger number of the contact arrangements. It is relatively harder to insert the contacts after installing a large number of contacts into the insert since there are many wires on the wiring side.
- Use the mating half of CE01 series pin contacts when you test the electrical continuity of the socket contacts. In case of mating the other conductors such like a clip it causes the troubles of electrical continuity, contact retaining force or contact surface damage.
