

TC9273N, TC9273F, TC9274N, TC9274F**ANALOG SWITCH ARRAY ICs**

TC9273N, TC9273F, TC9274N and TC9274F are analog switch array ICs developed for use in audio equipment such as home stereo sets. Switch connection layouts can be customized for different sets, thus simplifying the external wiring.

FEATURES

- 10 analog switches × 2 channels built in : TC9273N
TC9273F
- 18 analog switches × 2 channels built in : TC9274N
TC9274F
- An aluminum mask process allows switch connections to be customized.
- Switches are controlled by serial data.
- Built-in 5V microcomputer interface.
- Shrink DIP or flat package.

OPERATION

1. Switch ON/OFF setting

The switches are set to ON or OFF using 18bit or 26bit serial data.

• Data format

- 1) $S_1 \sim S_{10} \sim S_{18}$: Switch control data
When $S_n = 1$, S_n is set to ON ; when $S_n = 0$, to OFF.
- 2) R and L : Channel select data
When $R = 1$, right-channel switches are set ; when $L = 1$, left-channel switches are set.
(When $R = L = 1$, both channel switches are set simultaneously.)
- 3) CS1 and CS2 : Sub-code data
The sub-code data are customized.
- 4) $C_1 \sim C_4$: Chip select data (fixed)

IC NAME	C ₁	C ₂	C ₃	C ₄
TC9273N, TC9273F	0	0	1	0
TC9274N, TC9274F	1	0	1	0

2. Serial data timing

Input the CK, DATA and STB signals at the following timing.

3. One and dual power supply operation

TC9273N, TC9273F, TC9274N and TC9274F can operate with one or dual power supply. With single or dual power supply, serial data logic level can be 0 – 5V.

• Single power supply operation

• Dual power supply operation

- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
