

## Features

- Small size (8x18x43mm)
- 4, 6, 8 & 12 Fibre counts
- 1 metre colour coded tubes
- No special tools required

## Multi-Fibre Breakout Kits

Mod-Tap Breakout kits are for use on multi-fibre per tube, loose tube cables to prepare the cable for direct termination.

Each kit breaks out the 250 $\mu$ m fibres from multifibre loose tube into individual 900 $\mu$ m buffer tubes. The fibres can then be terminated using the connector manufacturer's recommended termination procedure for 900 $\mu$ m tight buffered fibres, which eliminates the use of expensive fusion or mechanical splicing.

Each kit is individually packaged in a sealed plastic bag.

### Each Kit contains:

- (1) One Terminal Assembly Unit (4, 6, 8 or 12 way)
- (1) One Breakout Kit Cover
- (1) One Breakout Kit Base
- (1) One Instruction Sheet

### Shipping Weight:

< 56g
