

## Description

E-T-A's ESX10-T electronic circuit protector is only 12.5 mm wide and selectively protects all DC 24 V load circuits, thereby increasing the uptime of machines and systems. This is achieved by a combination of active electronic current limitation in the event of a short circuit and overload disconnection typically from 1.1 times rated current. The ESX10-T responds faster than frequently used DC 24 V switch mode power supplies without tripping fast and thus prevents disastrous voltage dips of the supply. It works with a single trip curve for all loads. Even capacitive loads up to 75,000 µF can be handled very easily. Besides fixed current ratings from 0.5 A to 12 A, adjustable current rating versions are also available. The integral fail-safe element (fuse) is adjusted to the circuit protector's rated current and can thus very easily be synchronised with the wired cable cross section. This makes planning much easier.

ESX10-TD

## Features

- Track-mountable
- Active linear current limitation
- Capacitive loads up to 75,000 µF
- ESX10-TA/-TB: fixed current ratings 0.5 A...12 A
- ESX10-TD: adjustable current ratings, e.g. [0.5 A / 1 A / 2 A]; [2 A / 4 A / 6 A]; [6 A / 8 A / 10 A]
- Approvals: UL, CSA, GL
- OPTION: Control inputs, signalling
- OPTION: ATEX approval

## Your benefits

- Increases machine uptime through clear failure detection and stable power supply
- Reduces downtimes through quick fault resolution
- Simplifies planning through clear sizes and ratings
- Saves costs and time through fast and flexible mounting including integral power distribution solution

## Preferred types – for more details on all configurations please see order numbering code

Preferred types are E-T-A products most frequently used by E-T-A customers. We manufacture E-T-A preferred types in particularly high

volumes. Our preferred types are supplied at shorter lead times than non-standard versions.

## Preferred types

Preferred types are E-T-A products most frequently used by E-T-A customers. We manufacture E-T-A preferred types in particularly high

volumes. Our preferred types are supplied at shorter lead times than non-standard versions.

| Preferred types     | Short description                | Preferred ratings (A) |   |   |   |   |   |   |    |    |         |       |        |

## Order numbering code

### Type No.

**ESX10** Electronic Circuit Protector, with current limitation

#### Mounting

**TA** rail mounting, without aux. contact

**TB** rail mounting, with signal contact and hole for signal busbars

**TD** Version: rail mounting, with auxiliary contact and slide actuation for 3-step current rating adjustment

#### Version

**1** without physical isolation

#### Signal input

**0** without signal input

**1** with control input IN+ (only ESX10--114)

**2** reset input RE (only -124, -127)

#### Signal output

**0** without signal output (only ESX10-TA)

**1** signal make contact

**2** signal break contact

**4** status output SF (only -114, -124)

**7** status output inverted (only ESX10-T-127)

#### Operating voltage

**DC 24 V** voltage rating DC 24 V

#### Current ratings

**0.5 A**

**1 A**

**2 A**

**3 A**

**4 A**

**6 A**

**8 A**

**10 A**

**12 A**

**16 A** (only ESX10-TB-101)

**0.5/1/2 A** adjustable (only ESX10-TD-....-X278)

**2/4/6 A** adjustable (only ESX10-TD-....-X279)

**6/8/10 A** adjustable (only ESX10-TD-....-X280)

**2/3/4 A** adjustable (only ESX10-TD-101-...-X282)

**ESX10 - TB - 1 0 1 - DC 24 V - 6 A** ordering example

### Caution!

Please observe separate data sheet for **ESX10-TB-101-DC 24 V-16 A**.

Description of ESX10-T signal inputs /outputs see wiring diagrams.

## Custom designed versions

Looking for a version you cannot find in our ordering number code? Please get in touch. We will be pleased to find a solution for you.

#### Note:

When mounted side-by-side without convection, the devices can only carry max. 80 % of their rated current continuously (100 % ON duty) due to the thermal effect.

#### Notes

- The user has to ensure that the cable cross section of the load circuit in question complies with the current rating of the ESX10-T used.
- In addition special precautions have to be taken in the system or machinery to exclude automatic re-start (e.g. by using a safety PLC) (cf. Machinery Directive 2006/42/EG und EN 60204-1, Safety of Machinery). In the event of a failure (short circuit/overload) the load circuit will be disconnected electronically by the ESX10-T.

## Information on UL and CSA approvals

**ESX10-TA/-TB/-TD**  
UL2367  
Non-hazardous use - UL File # E306740

**UL 508**  
Non-hazardous use  
UL File # E322549

**E322549**  
INDUSTRIAL CONTROL EQUIPMENT

**ESX10-TA / -TB**  
ISA 12.12.01-2015  
UL File # E320024

Operating Temperature Code T4

- This equipment is suitable for use in Class , Division 2, Groups A, B, C and D or non-hazardous locations only. T4 A / 0°C to 50°C

### Warning

- Exposure to some chemicals may degrade the sealing properties of materials used in the following device: relay (K1)

#### • Sealant Material:

Generic Name: Modified diglycidyl ether of bisphenol A  
Supplier: Fine Polymers Corporation  
Type: Epi Fine 4616L-160PK

#### • Casing Material:

Generic Name: Liquid Crystal Polymer  
Supplier: Sumitomo Chemical  
Type: E4008, E4009, or E6008

### RECOMMENDATION:

- Periodically inspect the device named above for any degradation of properties and replace if degradation is found

### WARNING – EXPLOSION HAZARD:

#### AVERTISSEMENT – RISQUE D'EXPLOSION

- Do not disconnect equipment unless power has been removed or the area is known to be non-hazardous.  
Avant de déconnecter l'équipement, couper le courant ou s'assurer que l'emplacement est désigné non dangereux.

- Substitution of any components may impair suitability for Class I, Division 2.  
La substitution de composants peut rendre ce matériel inacceptable pour les emplacements de class I, division 2.

This device is OPEN type equipment that must be used within a suitable end-use system enclosure, the interior of which is accessible only through the use of a tool. The suitability of the enclosure is subject to investigation by the local Authority Having Jurisdiction at the time of installation.

Wiring to or from this device, which enters or leaves the system enclosure, must utilize wiring methods suitable for Class I, Division 2 Hazardous Locations, as appropriate for the installation.

### ESX10-TA / -TB

**CSA**  
CSA C22.2 No: 14 - File # 016186  
CSA C22.2 No: 142 - File # 016186

operating condition: SF +24 V = OK  
fault condition: SF 0 V

**ESX10-TB-127**  
with reset input RE  
(+DC 24 V ↓)  
with inverse status output SF  
(0 V = load output ON)

operating condition: SF 0 V = OK  
fault condition: SF +24 V

**ESX10-TD**  
Wiring diagram similar to ESX10-TB without busbars (on the front)

### Typical time/current characteristic ( $T_{amb} = 25\text{ °C}$ )

- In a range of  $1.1...1.8 \times I_N$  the trip time is typically 3 s. (e.g. ESX10-TB-...-6 A)
- The electronic current limitation typically begins in at  $1.8 \times I_N$ . This means: under all overload conditions (independent of power supply and load circuit resistance) **typically 1.8 times rated current is applied until disconnection**. The corresponding current limitation value  $I_{Limit}$  depends on the current rating of the device  $I_N$  (see table 1) The trip time varies between 100 ms and 3 s depending on the multiple of the current rating or at short circuit ( $I_K$ ).
- Without the current limitation getting into effect at typically  $1.8 \times I_N$  there would be a much higher overcurrent in the event of an overload or short circuit.

Table 3: Reliable disconnection of the ESX10-T

#### Reliable disconnection of the ESX10-T at different cable lengths and cable cross sections

Resistivity copper  $\rho_0 = 0.0178\text{ (Ohm} \times \text{mm}^2) / \text{m}$

$U_B = \text{DC } 19.2\text{ V}$  (= 80 % v. 24 V)

Voltage drop on ESX10-T and tolerance of the shut-off point (typically  $1.1 \times I_N = 1.05...1.35 \times I_N$ ) has already been taken into account.

ESX10-T current rating adjustment  $I_N$  (in A) →

e. g. trip current  $I_{ab} = 1.25 \times I_N$  (in A) →

$R_{max}$  in Ohm =  $(U_B / I_{ab}) - 0.050$

| 3    | 6    |                           |
|------|------|---------------------------|
| 3.75 | 7.5  | → ESX10-T trips after 3 s |
| 5.07 | 2.51 |                           |

#### ESX10-T reliably trips from $0\text{ }\Omega$ to the max. circuit resistance $R_{max}$

| cable cross section A in mm <sup>2</sup> → | 0.14                                                          | 0.25  | 0.34  | 0.5   | 0.75  | 1    | 1.5  |
|--------------------------------------------|---------------------------------------------------------------|-------|-------|-------|-------|------|------|
| distance L in metres (= one-way length)    | total cable resistance in Ohm = $(R_0 \times 2 \times L) / A$ |       |       |       |       |      |      |

| 200                                        | 50.86                                                         | 28.48 | 20.94 | 14.24 | 9.49  | 7.12 | 4.75 |
| 225                                        | 57.21                                                         | 32.04 | 23.56 | 16.02 | 10.68 | 8.01 | 5.34 |
| 250                                        | 63.57                                                         | 35.60 | 26.18 | 17.80 | 11.87 | 8.90 | 5.93 |

**Example 1:** max. distance at 1.5 mm<sup>2</sup> and 3 A → **214 m**

**Example 2:** max. distance at 1.5 mm<sup>2</sup> and 6 A → **106 m**

**Example 3:** mixed wiring:  
 $R_1 = 40\text{ m in } 1.5\text{mm}^2$  and  $R_2 = 5\text{ m in } 0.25\text{mm}^2$  :  
 (control cabinet - sensor/actuator level)  $R_1 = 0.95\text{ Ohm}$ ,  $R_2 = 0.71\text{ Ohm}$   
**Total ( $R_1 + R_2$ ) = 1.66 Ohm**

## Mounting examples for ESX10-T

5 ESX10-TA  
with busbars

5 ESX10-TB  
with busbars  
and jumpers

5 ESX10-TD  
with busbars

### Description of installation:

With a block of devices the busbars have to be inserted before wiring.  
Max. 10 plug-in cycles for busbars allowed.

### Recommendation:

The line entry busbars and signal busbars should be interrupted after 10 devices and line entry should start anew.

### Table of busbar lengths

(X 222 611 02 and X 222 005 03 or their cut lengths - see accessories)

| Number of devices            | 2  | 3    | 4  | 5    | 6  | 7    | 8  | 9     | 10  |
|------------------------------|----|------|----|------|----|------|----|-------|-----|
| Length of rail [mm] ± 0,5 mm | 22 | 34.5 | 47 | 59.5 | 72 | 84.5 | 97 | 109.5 | 122 |

## Wiring diagrams, application examples ESX10-T

## Connection diagrams and application examples ESX10-T...

Signal contacts are shown in OFF or fault condition.

**ESX10-TA-100**

**ESX10-TB-101**

group signalling (series connection)

## Wiring diagrams, application examples ESX10-T

### Applications examples: line entry DC 24 V with protection of signal circuit and direct connection of loads

Auxiliary contacts are shown on the OFF of fault condition

#### ESX10-TB-101

Group signalisation (series connection)

Type ESX10-TA-100-DC24V-0.5A can be used as a supply module including protection of auxiliary circuit

Optional: passive supply module AD-TX-EM01 (without protection)

#### ESX10-TB-102

Single signalisation with common line entry

Type ESX10-TA-100-DC24V-0.5A can be used as a supply module including protection of auxiliary circuit

Optional: passive supply module AD-TX-EM01 (without protection)

## Description

The ESX10-T has an integral power distribution system. The following wirings can be carried out with different plug-in type busbars:

- LINE +(DC 24 V)
- 0 V
- **Important:** The electronic devices ESX10-T require a 0 V connection.
- Auxiliary contacts
- Reset inputs

## Accessories

### Busbars for LINE+ and 0 V

ampacity with one input  $I_{\max}$  50 A  
 (recommendation: central supply)  
 ampacity with two inputs  $I_{\max}$  63 A  
 grey insulated, length: 500 mm  
**part no. X 222 611 02**

### Busbars for LINE+ and 0 V

grey insulated  
 max. 10 plug-in cycles allowed

**X 222 611 22** (block of 2 ESX10-Ts), length: 22 mm  
**X 222 611 34** (block of 3 ESX10-Ts), length: 34.5 mm  
**X 222 611 47** (block of 4 ESX10-Ts), length: 47 mm  
**X 222 611 59** (block of 5 ESX10-Ts), length: 59.5 mm  
 Packaging unit: 10 pcs

**X 222 611 72** (block of 6 ESX10-Ts), length: 72 mm  
**X 222 611 97** (block of 8 ESX10-Ts), length: 97 mm  
**X 222 611 12** (block of 10 ESX10-Ts), length: 122 mm  
 Packaging unit: 4 pcs

### Signal busbars for aux. contacts and reset inputs

suitable for signal busbars ESX10-TB-...  
 ampacity with one input  $I_{\max}$  1 A  
 with aux. contacts connected in series  $I_{\max}$  0.5 A  
 grey insulated, length: 500 mm  
**part no. X 222 005 03**

### Busbars for auxiliary contacts

suitable for signal busbars ESX10-TB-...  
 grey insulated, length: 21 mm  
**part no. X 222 005 13**  
 Packaging unit: 10 pcs

### Insulated wire bridge (for aux. contact)

optional as jumper for ESX10-TB-101.../ESX10-TD-101...  
 for group signalling  
 (series connection of make contacts 13 - 14)  
**X 223 108 01**  
 Packaging unit: 10 pcs

### Connector bus link -K10

suitable for auxiliary contacts (series connection)  
**X 210 589 02** (1.5 mm<sup>2</sup>, brown),

## Accessories

### Passive supply module for LINE+ and 0 V (without protection)

Ampacity  $I_{max}$  50 A  
Max. cable cross section see ESX10-T

part no. AD-TX-EM01

### Labels, pack of 10

suitable for ESX10-TD, cover of current rating adjustment

Y 309 705 11 (0.5 A, 1 A, 2 A)

Y 309 705 12 (2 A, 4 A, 6 A)

Y 309 705 13 (6 A, 8 A, 10 A)

Y 309 705 14 (2 A, 3 A, 4 A)

### Labels, pack of 30

suitable for ESX10-TD, cover of current rating adjustment

Y 309 705 21 (0.5 A)

Y 309 705 22 (1 A)

Y 309 705 23 (2 A)

Y 309 705 24 (3 A)

Y 309 705 25 (4 A)

Y 309 705 26 (6 A)

Y 309 705 27 (8 A)

Y 309 705 28 (10 A)
