-M
Middle Reverse

-0
= Outside Reverse

Specify "XX" as number of
conductors to be broken out.

Diagram illustrating the assembly of a Double Row Connector. The diagram shows a cross-section of the connector with the following dimensions and components labeled:

- 2" min. (Minimum distance between the two rows of the connector)
- "XX" 1/8" (Dimension of the connector's width)
- Double Row Connector (The main assembly)
- Outer Most (End of assembly) (The outermost part of the assembly)
- 4" minimum (Minimum distance from the end of the assembly to the next component)

A diagram showing a linear network topology with three nodes connected in a line. The middle node is highlighted with a dashed border.
