

Purple Series Digilog Ecoflex AES/Analogue installation cable LSZH

Van Damme Purple Series Digilog Ecoflex is a Low Smoke Zero Halogen (LSZH) jacketed audio multicore specifically for installation use. The use of LSZH cables is becoming a specified essential in public buildings and new build construction projects. Based electrically and mechanically on the Van

Damme Green Series range this cable will carry AES/EBU and/or analogue balanced audio

as well as paired data signals such as RS485, RS422 and DMX512.

Applications

- Installed AES/EBU digital or analogue audio cable infrastructure requiring LSZH construction
- Any 100 to 110 Ohm balanced data application such as RS422, RS485, DMX512 and timecode
- Installation in marine vessels, schools and colleges, government premises and public buildings
- Equipment rack wiring where LSZH materials have been specified

Application notes

- For the transmission of analogue and digital audio, paired data and midi signals in an installation environment from 1 - 24 pairs
- Multicore types have 26AWG conductors for a reduced overall diameter
- Jacket material specified as the thermoplastic polymer SHF-1; compliant with IEC 60092 Electrical Installations in ships pt. 359 - Sheathing materials for shipboard power and communication cables
- Fully tested and compliant with the following IEC standards (see glossary for full description)
 - IEC 60332.1 Fire retardancy of a single cable
 - IEC 60754.1 Amount of Halogen Gas Emissions
 - IEC 60754.2 Degree of acidity of released gases
 - IEC 61034.2 Measurement of smoke density
- Ultra pure oxygen free copper for outstanding sonic integrity
