Description

Tripp Lite's PDUNV is a 1.6-3.8kW / 16A / 100-240V single phase Basic Power Distribution Unit (PDU) that distributes 100-240V power to multiple loads in IT, industrial and similar applications from a UPS system, generator or utility wall outlet. The PDUNV accepts input power over a range of 100-240V, making it compatible with worldwide applications. A 10-ft. power cord with C20 plug and a set of five plug adapters enable it to be connected to a 5-15R, 5-15/20R, L5-20R, L6-30R, C13 or C19 outlets. The PDUNV's C13 and C19 outlets can be adapted for specific applications by using an appropriate plug adapter (e.g., C14 to 5-15R). A switchless design prevents accidental shutoff and safeguards against downtime due to human error. It is suitable for 1U or 0U (vertical) rackmount installation as well as wall-mount, workbench, and under-counter installations. All mounting accessories are included.
