

- Clear acrylic case updates panel design
- Black knife-edge pointer for precision reading
- Special colored scales or logos available

## Dimensions

1-1/2"-Model 921, 921T, 941

2-1/2"-Model 922, 942

## Specifications

|                        |                                                                                                                                                                                                       |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Accuracy:              | ±2% F.S. (iron vane), ±3% F.S. (rectifier)                                                                                                                                                            |
| Movement:              | DC: Annular, self-shielding<br>AC: Models 953 & 954: Iron-vane, magnetically damped<br>others: Annular, rectified                                                                                     |
| Suspension:            | Pivot and jewel or taut band                                                                                                                                                                          |
| Tracking:              | ±3%                                                                                                                                                                                                   |
| Repeatability:         | 2%, taut band: 0.5%                                                                                                                                                                                   |
| Shielding:             | Calibration is unaffected by stray magnetic field or panel mounting.                                                                                                                                  |
| Response Time:         | 1.5 seconds maximum above 10mA.                                                                                                                                                                       |
| Overload (1 sec.):     | 10 times F.S.                                                                                                                                                                                         |
| Overload (Continuous): | 1.5 times F.S.                                                                                                                                                                                        |
| Dial:                  | Sharp clear scale. Each dial arc is calibrated to track the specific type of movement used.                                                                                                           |
| Operating Temperature: | -4°F to +149°F (-20°C to +65°C)                                                                                                                                                                       |
| Resistance:            | ±15% of meter impedance                                                                                                                                                                               |

\* 1 1/2" DC current meters are self-contained through 10 amps; 15 amps and higher are supplied as 50mV meters and require an external shunt. 2 1/2", 3 1/2" and 4 1/2" meters are self-contained through 50 amps. Higher ranges are 50 mV meters and require an external shunt.
