

Faster Cable Installations

CableCaster™ significantly speeds up the installation of lightweight communications cable through hard-to-reach spaces, such as suspended ceilings, rafters and sub-floors.

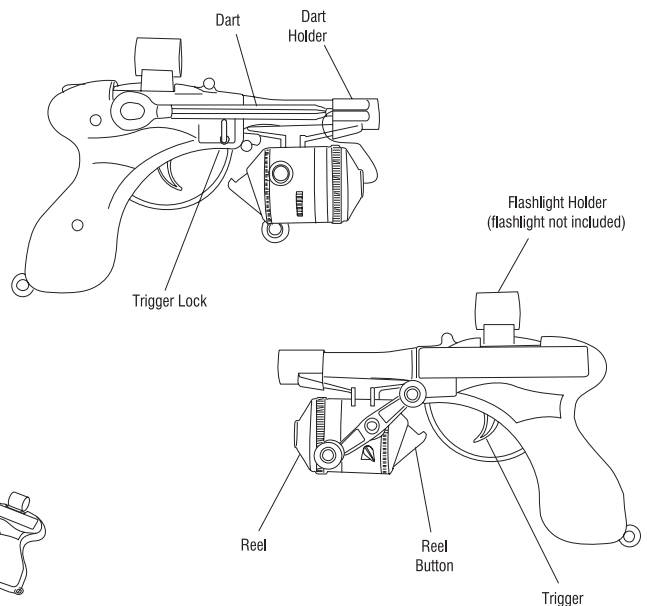

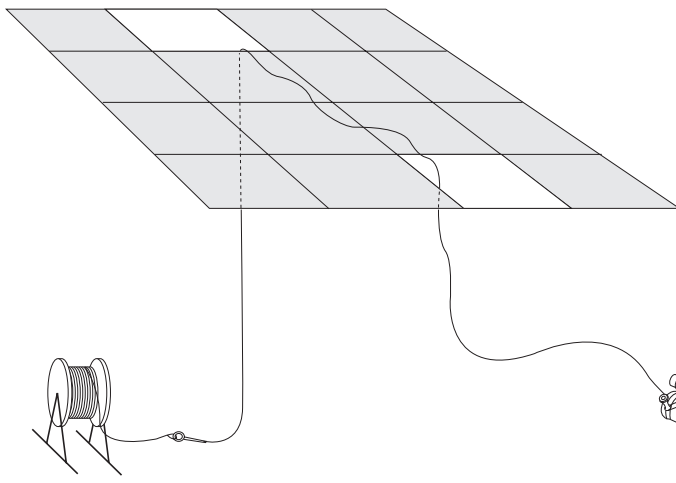

- Operation couldn't be easier. CableCaster™ launches a dart up to 50 feet (15 meters) to the cable supply access point, pulling a durable monofilament line. The cable is attached to the dart, and pulled back with the CableCaster™ take-up reel.
- CableCaster™ darts are aerodynamically designed for true and accurate flight. The plastic darts glow in the dark to help locate them in even dimly lit areas.
- CableCaster™ includes an integral flashlight holder that accepts the Greenlee Pocket-Light (sold separately, Cat. No. 46500) or a number of commercially available flashlights, including the MINI MAGLITE® flashlight.

PRODUCT FEATURES

- A 50 foot (15 meter) range allows for faster installations with less number of pulls required.
- Bright yellow body means it is less likely to be left behind.
- Glow-in-the-dark green darts reduce replacement costs because they are easier to locate.
- Darts are aerodynamically designed for high accuracy and faster installation.
- The optional flashlight improves visibility for faster installation.

APPLICATIONS AND IDENTIFICATION

- Network cabling
- Telecommunications
- Safety and alarm systems
- Sound and PA systems
- Building control systems
- HVAC installations

ORDERING INFORMATION

Parts List

Cat No.	UPC No.	Description
06186	06186	CableCaster™ Wire Pulling Tool (includes 3 darts)
06259	06259	CableCaster™ Replacement Darts (pack of four)

Accessories

Cat No.	UPC No.	Description
46500	46500	Pocket-Light Flashlight
