

Dual Rod Cylinder Series CXS

ø6, ø10, ø15, ø20, ø25, ø32

Dual rod cylinder with guide function for pick & place applications.

Series CXS

Twice the thrust
Non-rotating accuracy $\pm 0.1^\circ$

Ball bushing bearings and slide bearings
are standard for all series.

Dimensions for ball bushing bearings and slide bearings are the same.

Adjustable stroke range:
0 to -5 mm

Work can be
mounted on
three faces.

Mounting of Auto Switch

When mounting and securing auto switches, they should be inserted into the cylinder's switch mounting rail from the direction shown in the drawing below. After setting in the mounting position, use a flat head watchmakers screwdriver to tighten the set screw that is included.

Note) When tightening an auto switch mounting screw, use a watchmakers' screwdriver with a handle of approximately 5 to 6 mm in diameter.

Also, tighten with a torque of about 0.05 to 0.1 N·m. As a guide, turn about 90° past the point at which tightening can first be felt.

Caution

1. Avoid proximity to magnetic objects

shown in the drawing below. If the clearance is less than the values noted in the table below, the auto switch may not function properly.
