

Safety Switches

Product Description

SAFETY SWITCH

A safety switch is used to open or close an electrical circuit. Non-fusible safety switches provide a means to manually connect or disconnect the equipment from the power source. Fusible safety switches provide a means to manually open and close a circuit and overcurrent protection by using customer-installed fuses. Safety switches are also commonly referred to as a disconnect switch or simply a disconnect.

DOUBLE THROW SAFETY SWITCH

A double throw safety switch is sometimes referred to as a transfer switch. It performs the same function as a safety switch by opening or closing a circuit; however, its primary use is to transfer service from a normal power source to an alternate source (i.e., a residential generator) or to switch from one load circuit to another.

Features, Functions and Benefits

- ✓ 120/240, 240 or 600 volts.
- ✓ Easy to install.
- ✓ Ample wiring space.
- ✓ Padlockable.
- ✓ UL listed.

DP221NGB Plug Fuse Safety Switch, 30 Amperes, 120/240 Volts

DG322URB General-Duty, Non-Fusible Safety Switch, 60 Amperes, 240 Volts

DT224URK-NPS General-Duty, Non-Fusible Double Throw Emergency Power Safety Switch, 200 Amperes, 120/240 Volts

DH362UGK Heavy-Duty, Non-Fusible Safety Switch, 60 Amperes, 600 Volts

Safety Switches

DG321NRB General-Duty, Cartridge Fuse Safety Switch, 30 Amperes, 120/240 Volts

DP221NGB

DT223URH-N General-Duty, Non-Fusible Double Throw Emergency Power Safety Switch, 100 Amperes, 120/240 Volts

DT224URK-NPS

DG324NGK

DH362NGK Heavy-Duty, Fusible Safety Switch, 60 Amperes, 600 Volts

DT363URK Heavy-Duty, Non-Fusible Double Throw Emergency Power Safety Switch, 100 Amperes, 600 Volts

6 Disconnects

Applications

FIGURE 6-2. HOUSEHOLD WORKBENCH APPLICATION

FIGURE 6-3. RESIDENTIAL GENERATOR APPLICATION WITH MANUALLY OPERATED DOUBLE THROW SAFETY SWITCH

FIGURE 6-4. RESIDENTIAL GENERATOR APPLICATION WITH AUTOMATIC TRANSFER SWITCH AND SERVICE ENTRANCE RATED SAFETY SWITCH

Catalog Numbering System

① Maximum hp ratings apply only when dual element time delay fuses are used.
② Use 4-wire catalog numbers below.
③ Solid neutral bars are not included. Order separately from Table 6-27 on Page 6-18.

④ **WARNING!** Switch is not approved for service entrance unless a neutral kit is installed.
⑤ Use 3-wire catalog numbers below.
⑥ Drilled to accept field installed neutral kits.

Note: All general-duty safety switches are individually packaged.
Note: Accessories are limited in scope on general-duty safety switches. In addition, clear line shields are available as an accessory on 200 – 600 ampere general-duty switches.
Catalog Numbers: 200 A = 70-7759-11, 400 A = 70-8063-8, 600 A = 70-8064-8.
