P Series Adaptable Power Entry Modules

- IEC Power Line Connector
- Both North American and European Fusing Capabilities

- Optional DPST On/Off Switch
- Snap In or Mounting Ears

The P series power entry module offers full flexibility of design in the most compact package. The Chameleon has two filter options (7th character in part number). The S models offer protection for general purpose applications where line-to-ground and line-to-line noise must be controlled and are designed to meet low leakage requirements of VDE portable equipment. The H models offer susceptibility protection without leakage current associated with the line-to-ground capacitors and are designed to allow equipment to meet UL544 for patient care and non-patient care equipment. These power entry modules provides a dual voltage selector which is integrated with the fuse holder. P series product with an "S" in the fifth digit are specifically designed for jumper type applications associated with switching mode power supplies. P series product with an "X" in the fifth digit are designed for dual primary transformer applications. The fuse holder can hold one or two 1/4" x 1/4" or 5 x 20 mm fuses. Maximum leakage current, each line-to-ground at 120 VAC/60 Hz in H models is 2 µA, and in S models is 0.25 mA. For 250 VAC/60 Hz the H models maximum is 5 µA and the S models maximum is 0.50 mA. Terminals are 0.187" x 0.032" faston tabs. For those models with a switch, the switch is double insulated and rated for 10,000 operations at full load with a 51 amp in-rush capability. A conversion clip is provided for single use operation. Extenders are available to fit existing panel cutouts as special order items.

J Series — Voltage Selecting and Fused Connector

6 Amps; 100-240 Volts AC, 50-60 Hz

Note: Specify line cord #GA400 below to mate with IEC connector.

J Series Voltage Selecting and Fused Connector is designed for the equipment manufacturer who markets a product worldwide. While incorporating a fuse holder and a standard IEC power line connector, the J Series also features a unique voltage selector card which enables an easy means to change transformer primary connections. Integral fuse holder, line side, accepts .25" x 1.25" fuse. Meets UL/IEC requirements per CEE publication 22 Type VI. Connector back terminals

suitable for soldering, wire wrapping or crimp-on lugs such as MOLEX #2123. **Maximum Leakage Current (Line-to-Ground):** at 250 VAC 50 Hz, 5 microamps (6VJ1); 0.5 mA (6J4). **Hipot Rating (1 Minute):** Line-to-ground — 1500 VAC (6VJ1) and 2250 VDC (6J4); Line-to-line — 1450 VDC (6VJ1) and 1450 VDC (6J4). Construction meets IEC 161 category 10/70/21. The J1 version is unfiltered while the J4 model houses a built-in filter.

*With K extender (CA430) add to height .13 (3.3).

Two function power entry modules combining a DPST switch and an IEC 320 power line connector. Compact packaging allows a smaller panel cutout with a choice of snap-in or flange mounting. Available with general purpose filtering (F models) or unfiltered. Faston terminals allow for easy connection to any wiring scheme. This series also has the adaptability to fit into existing panel cutouts using snap-on extender options. Available extenders increase height by 0.20" (PA420), 0.42" (PA400), or 0.13" (CA430).

EEA Series Filters

1 to 10 Amps; 120/250 Volts, 50-60 Hz

Note: Specify line cord #GA400 below to mate with IEC connector.

The EEA Series are a new generation of compact RFI filters with IEC socket. Totally new in design in both the internal structure and manufacturing process make this new series cost effective and compact. The EEA series supercedes the EF series by providing superior performance, particularly in the common mode at low frequencies. Mechanically, its slimmer size makes it compatible with all similar filters in the market. Quarter inch fastons in line in the EEA1 offer versatility when behind the panel room exists. The EEA2 with the quarter inch fastons at a right angle to the IEC1 connector allow for a shorter tip-to-tip length. The P style models are PC board mountable offering compact size and direct to board connection. Models with 4-inch wire leads available as custom order parts. **Maximum Leakage Current (Line-to-Ground):** 0.25 mA at 120 VAC 60 Hz 0.42 mA at 250 VAC 50 Hz. **Hipot Rating (1 Minute):** Line-to-ground — 2250 VDC; Line-to-line — 1450 VDC. Uses line cord GA400 below.
