

Quick Reference Guide AMPMODU System 50

The AMPMODU System 50 connector family includes a wide variety of high density board-to-board (through hole and surface mount) and cable-to-board connectors. AMPMODU System 50 receptacles and header assemblies can be categorized in three groups: board mount headers, board mount receptacles and cable-to-board receptacles. AMPMODU System 50 cable applied receptacles are available in ribbon cable or Flat Flexible Cable (FFC) cable termination. The variety of components and application possibilities, combined with small size and outstanding quality, make AMPMODU System 50 suitable for high density systems.
