

ÖLFLEX® 540 P

valid from: 02.11.2009

Application

ÖLFLEX® 540 P cables are highly flexible oil-resistant connecting cables with a core insulation of TPE and an outer sheath of Polyurethane for flexible use and fixed installation under increased mechanical load conditions. They are designed for use in dry, damp and wet conditions. Outdoor use: They may only be installed considering the temperature range.

Continuous busy movements, compulsory guidance respectively usage on cable drums or pulleys or under a strain of more than 15 N / mm² are not allowed. At room temperature they are widely resistant to certain oils and resistant to acids. The outer sheath of Polyurethane is resistant against high mechanical load, particularly to abrasion and scouring, cut resistant, microbe-proof and hydrolysis resistant. All materials used for these cables are halogen-free.

Application range: Agricultural equipment, power tools like drill machines, circular hand saw, portable motors and construction machinery as well.
