Standards

MIL-C 38999 Series III
CECC 75 201.002

Description

The FCI JVS Marine Connector Series is approved to European Specification CECC 75 201.002, which is derived from USA Specification MIL-C 38999 Series III with which it remains intermountable and intermateable, but employs a rugged and high corrosion resistant housing in Nickel, Aluminum Bronze Alloy.

This design provides a high reliability connector with excellent salt water corrosion resistance characteristics and dry mate sealing down to 4m immersion. Contact arrangements with high density size 22D contacts giving up to 128 ways, through sizes 20, 16, 12 and size 8. This permits a wide range of electrical power contacts to be used or high speed Databus or Optical contacts to be used in the standard connector. Contacts are terminated by crimping and are inserted and removed using standard plastic tools inserted from the rear of the connectors. Hermetically Sealed styles having fixed solder contacts.
