

Deburring Tools

Ruko Deburring Programme
A complete system for all deburring work done by hand. The wide range of holders and blades allow deburring of edges and bores from inside, outside or on both sides.
Unigrat System
The universal handle accepts holders B and E. With the locking head withdrawn holders may be locked into position and adjusted to 100mm in length. Blades can only be used with a holder of the same series (B10 blade with B holder etc.) The replacement blades can be stored in the back of the handle.

Universal Handle A

			Price Each
Model	Description	Order Code	
107-010	Universal Handle A	374-386	

B Holder

			Price Each
Model	Description	Order Code
