

LUXEON UV FC Line

Unique LED enabling limitless design freedom

With FlipChip platform technology, the LUXEON UV FC Line is the smallest and highest power density (W/cm^2) ultraviolet LED with FlipChip Technology in a Chip Scale Package (CSP). The LED can be reflowed onto a substrate with standard surface mount (SMT) equipment and process. LUXEON UV FC Line LEDs enable tighter beam control and high packing density of LEDs on a chip on board solution and completely eliminate wire bonds in the system. LUXEON UV FC Line is the ideal choice for cost sensitive applications to achieve high irradiance at high current density, maximizing W/\$ by taking advantage of lowest thermal resistance of a CSP device.

FEATURES AND BENEFITS

- Ultraviolet wavelength range of 380nm to 420nm for a range of options
- Micro sized CSP: 1.0mm^2 package for design flexibility and packing density
- No wire bonds allows for direct attach and reflow
- 5-sided emitter with batwing radiation pattern
- Low thermal resistance for leading system level W/\$
- Maximum drive current of $1\text{A}/\text{mm}^2$ delivers superior flux for reduced LED count

PRIMARY APPLICATIONS

Product Bin and Labeling Definitions

Decoding Product Bin Labeling

In the manufacturing of semiconductor products, there are variations in performance around the average values given in the technical datasheet. For this reason, Lumileds bins LED components for luminous flux or radiometric power, color point, peak or dominant wavelength and forward voltage.

LUXEON UV FC Line LEDs are labeled using a 4-digit alphanumeric CAT code following the format below:

A B c D

- A** – designates radiometric power bin (example: B=300 to 350mW, D=400 to 450mW, F=500 to 550mW)
- B c** – designates peak wavelength bin (example: Ax=380 to 385nm, Cx=390 to 395nm, Ex=400 to 405nm)
- D** – designates forward voltage bin (example: 8=2.8 to 2.9V, 0=3.0 to 3.1V)

Therefore, a LUXEON UV FC LED with a radiometric power range of 400 to 450mW, peak wavelength range of 400 to 405nm and a forward voltage range of 3.0 to 3.1V has the following CAT code:

D E x 0
