Part Number : DM183027 - 4-Button Inductive Touch Board

The PICDEM Inductive Touch Development Kit is an evaluation and development platform for Microchips Inductive Touch Technology. Factory programmed firmware provides immediate access to all the boards features through the use of the MPLAB mTouch plugin. Using a PICKit Serial analyzer to communicate with the PC, it allows the user to analyze application critical information in realtime as it relates to sensor behavior. [More Info >>](#)
