Part Numbering

Radial Lead Type Monolithic Ceramic Capacitors

(Part Number)

RP E R7 1H 104 K 2 M1 A03 A

Product ID

2Series/Terminal

Product ID	Series/Terminal	
RP	E	Radial Lead Type Monolithic Ceramic Capacitors

3Temperature Characteristics

Code	Temperature Characteristics	Temperature Range	Capacitance Change or Temperature Coefficient	Operating Temperature Range		
5C	COG	25 to 125°C	0±30ppm/°C	-55 to 125°C		
E4	E4 Z5U 10 to 85°C		+22, -56%	10 to 85°C		
F5	Y5V	-30 to 85°C	+22, -82%	-30 to 85°C		
R7	X7R	-55 to 125°C	±15%	-55 to 125°C		

4 Rated Voltage

Code	Rated Voltage					
1E	DC25V					
1H	DC50V					
2A	DC100V					

6 Capacitance

Expressed by three figures. The unit is pico-farad (pF). The first and second figures are significant digits, and the third figure expresses the number of zeros which follow the two numbers. If there is a decimal point, it is expressed by the capital letter ${}^{\sf m}{\sf R}{}^{\sf m}$. In this case, all figures are significant digits.

6Capacitance Tolerance

Code	Capacitance Tolerance	Temperature Characteristics	Capacitance Step
С	±0.25pF		≦5pF : 1pF Step
D	±0.5pF	C0G	6 to 9pF : 1pF Step
J	±5%		≥10 : E12 Series
K	±10%	X7R	E6 Series
М	±20%	Z5U	E3 Series
Z	+80%, -20%	Y5V	E3 Series

Dimensions (LxW)

Code	Dimensions (LxW)					
1	3.5×3.0mm					
2	5.0×3.5mm					
3	5.0×4.5mm					
4	7.5×5.0mm					
5	7.5×7.5mm					
6	10.0×10.0mm					
7	12.5×12.5mm					
8	7.5×5.5mm					

8 Lead Style

OLCOG Style					
Code	Lead Style	Lead Spacing			
A1	Straight Long	F=2.5mm			
B1	Straight Long	F=5.0mm			
C1	Straight Long other than about				
E1/E2	Straight Taping F=5.0mm				
K1	Inside Crimp F=5.0mm				
M1/M2	Inside Crimp Taping	F=5.0mm			
P1	Outside Crimp F=2.5mm				
S1/S2	Outside Crimp Taping	F=2.5mm			

Lead distance between reference and bottom planes.

M1, S1 : $H_0 = 16.0\pm0.5$ mm M2, S2 : $H_0 = 20.0\pm0.5$ mm E1: H = 17.5±0.5mm E2 : H = 20.0±0.5mm

9Individual Specification Code

Expressed by three figures

Packaging

Code	Packaging					
Α	Ammo Pack					
В	Bulk					

Radial Lead Type Monolithic Ceramic Capacitors

Radial Lead Type Monolithic Ceramic Capacitors

■ Features

- 1. The RPE series capacitors have small dimensions, large capacitance, and a capacity volume ratio of 10 micro F/cm cube, close to that of electrolytic capacitors. These do not have polarity.
- 2. These have excellent frequency characteristics and due to these small internal inductance are suitable for high frequencies.
- 3. These are not coated with wax so there is no change in their exterior appearance due to the outflow of wax during soldering or solvent during cleansing.
- 4. These are highly inflammable, having characteristics equivalent to the UL94V-0 standard.

■ Dimensions

Dimensions and		Dimensions (mm)								
Lead style code	L	W	W1	Т	F	d

Specifications and Test Methods

			Specifi	cations			
No.	Itei	m	Temperature Compensating Type	High Dielectric Constant Type	-	Test Method	
1	Operating Tem Range	nperature	-55 to +125°C	Char. X7R: -55 to +125°C Char. Z5U: +10 to + 85°C Char. Y5V: -30 to + 85°C			
2	2 Rated Voltage		See previous pages	The rated voltage is defined as the maximum voltage which may be applied continuously to the capacitor. When AC voltage is superimposed on DC voltage, VP-P or VO-P, whichever is larger, should be maintained within the rated voltage range.			
3	Appearance		No defects or abnormalities		Visual inspection		
4	Dimension and	d Marking	See previous pages		Visual inspection,	Vernier Caliper

Packaging

PACKAGING

Two types of packaging for epoxy coated monolithic ceramic capacitors are available.

1. BULK PACKAGING

Minimum quantity*1

William quality					
Dimensions code	Dimensions (LxW)	Minimum quantity (pcs./bag)			
1	3.5x3.0mm				
2	5.0x3.5mm				
3	5.0x4.5mm				
4	7.5x5.0mm	500			
5	7.5x7.5mm				
6	10.0x10.0mm				
8	7.5x5.5mm				
7	12.5x12.5mm	100			

Please order with an integral multiple of the minimum quantity above.

2. TAPE CARRIER PACKAGING

(1) Dimensions of Ammo Pack

(2) Minimum quantity*1

	•	
Dimensions code	Dimensions (LxW)	Minimum quantity (pcs./Ammo Pack)
2	5.0x3.5mm	
3	5.0x4.5mm	2000
4	7.5x5.0mm	
5	7.5x7.5mm	2000*2
8	7.5x5.5mm	1500
6	10.0x10.0mm	1500

Please order with an integral multiple of the minimum quantity above.

*2 1500 pcs. for RPER71H335K5 CO3A, RPER71H475K5 CO3A, RPER72A334K5 CO3A, RPER72A105K5 CO3A

(Two blank columns are filled with the lead style code.)

(3) Marking on Ammo Pack

The following items are in the marking position on the side of the ammo pack.

- (a) Part Number
- (b) Quantity
- (c) Inspection No.
- (d) Manufacturer's name, or its abbreviation.
- (e) Other requirements.

(4) Incidental condition of taping

Tape splicing

• If carrier tape has been cut:

• If hold down tape has been cut:

• If both hold down tape and base tape have been cut:

^{*1 &}quot;Minimum Quantity" means the numbers of units of each delivery or order. The quantity should be an integral multiple of the "minimum quantity". (Please note that the actual delivery quantity in a package may change sometimes.)

⚠Caution

■ ①Caution (Storage and Operating Condition)

Operating and storage environment

The insulating coating of capacitors does not form a perfect seal; therefore, do not use or store capacitors in a corrosive atmosphere, especially where chloride gas, sulfide gas, acid, alkali, salt or the like are present. And avoid exposure to moisture. Before cleaning, bonding or molding this product, verify that these processes do not affect product quality by testing the performance of a cleaned, bonded or molded product in the intended

equipment. Store the capacitors where the temperature and relative humidity do not exceed 5 to 40 degrees centigrade and 20 to 70%. Use capacitors within 6 months.

FAILURE TO FOLLOW THE ABOVE CAUTIONS MAY RESULT, WORST CASE, IN A SHORT CIRCUIT AND CAUSE FUMING OR PARTIAL DISPERSION WHEN THE PRODUCT IS USED.

∴Caution

■ **(**Caution (Rating)

1. Operating Voltage

When DC-rated capacitors are to be used in AC or ripple current circuits, be sure to maintain the Vp-p value of the applied voltage or the Vo-p which contains DC bias within the rated voltage range.

When the voltage is applied to the circuit, starting or stopping may generate irregular voltage for a transit period because of resonance or switching. Be sure to use a capacitor with a rated voltage range that includes these irregular voltages.

Voltage	DC Voltage	DC+AC Voltage	AC Voltage	Pulse Voltage (1)	Pulse Voltage (2)
Positional Measurement	Vo-p	Vo-p	Vp-p	Vp-p	Vp-p

2. Operating Temperature and Self-generated Heat Keep the surface temperature of a capacitor below the upper limit of its rated operating temperature range. Be sure to take into account the heat generated by the capacitor itself. When the capacitor is used in a highfrequency current, pulse current or similar current, it may have self-generated heat due to dielectric loss. In case of "High Dielectric Constant Type Capacitors (X7R/Y5V/Z5U char.)", applied voltage load should be such that selfgenerated heat is within 20 °C under the condition where the capacitor is subjected at an atmosphere temperature of 25 °C. Please contact us if self-generated heat is occurred with "Temperature Compensating Type Capacitors (COG char.)". When measuring, use a thermocouple of small thermal capacity-K of Ø0.1mm under conditions where the capacitor is not affected by radiant heat from other components or wind from surroundings. Excessive heat may lead to deterioration of the capacitor's characteristics and reliability. (Never attempt to perform measurement with the cooling fan running. Otherwise, accurate measurement cannot be ensured.)

3. Fail-Safe

Be sure to provide an appropriate fail-safe function on your product to prevent a second damage that may be caused by the abnormal function or the failure of our product.

FAILURE TO FOLLOW THE ABOVE CAUTIONS MAY RESULT, WORST CASE, IN A SHORT CIRCUIT AND CAUSE FUMING OR PARTIAL DISPERSION WHEN THE PRODUCT IS USED.

ACaution

■ **①**Caution (Soldering and Mounting)

Vibration and impact Do not expose a capacitor or its leads to excessive shock or vibration during use.

2. Soldering

When soldering this product to a PCB/PWB, do not exceed the solder heat resistance specification of the capacitor. Subjecting this product to excessive heating could melt the internal junction solder and may result in thermal shocks that can crack the ceramic element.

3. Bonding and resin molding
Before bonding or molding this product, verify that
these processes do not affect the quality of
capacitor by testing the performance of a bonded
or molded product in the intended equipment.
In case of the amount of applications, dryness/

hardening conditions of adhesives and molding resins containing organic solvents (ethyl acetate, methyl ethyl ketone toluene, etc.) are unsuitable, the outer coating resin of a capacitor is damaged by the organic solvents and it may result, worst case, in a short circuit.

The variation in thickness of adhesive or molding resin may cause a outer coating resin cracking and/or ceramic element cracking of a capacitor in a temperature cycling.

FAILURE TO FOLLOW THE ABOVE CAUTIONS MAY RESULT, WORST CASE, IN A SHORT CIRCUIT AND CAUSE FUMING OR PARTIAL DISPERSION WHEN THE PRODUCT IS USED.

■ **①**Caution (Handling)

Vibration and impact

Do not expose a capacitor or its leads to excessive shock or vibration during use.

FAILURE TO FOLLOW THE ABOVE CAUTIONS MAY RESULT, WORST CASE, IN A SHORT CIRCUIT AND CAUSE FUMING OR PARTIAL DISPERSION WHEN THE PRODUCT IS USED.

Notice/QS9000 Certification

■ Notice (Rating)

Capacitance change of capacitor

1. In case of C0G char.

Capacitance might change a little depending on the surrounding temperature or an applied voltage. Please contact us if you intend to use this product in a strict time constant circuit.

2. In case of X7R/Y5V/Z5U char. Capacitors have an aging characteristic, whereby applied voltage. So, it is not likely to be suitable for use in a time constant circuit. Please contact us if you

need detailed information.

■ Notice (Soldering and Mounting)

1. Cleaning (ultrasonic cleaning)

To perform ultrasonic cleaning, observe the following conditions.

Rinse bath capacity: Output of 20 watts per liter or less.

Rinsing time: 5 min. maximum. Do not vibrate the PCB/PWB directly.

Excessive ultrasonic cleaning may lead to fatigue destruction of the lead wires.

2. Soldering and Mounting

(1) Allowable Conditions for Soldering Temperature and Time

Perform soldering within tolerance range (shaded portion).

(2) Insertion of the Lead Wire

- · When soldering, insert the lead wire into the PCB without mechanically stressing the lead wire.
- · Insert the lead wire into the PCB with a distance appropriate to the lead space.

■ QS9000 Certifications

Manufacturing plants which produce the products in this catalog have obtained the QS9000 quality system certificate.

Plant	Certified Date	Organization	Registration No.
Iwami Murata Manufacturing Co., Ltd.	Mar. 29, '99	Underwriters Laboratories Inc.	A7905

the capacitor continually decreases its capacitance

♠ Note:

1. Export Control

Murata products should not be used or sold for use in the development, production, stockpiling or utilization of any conventional weapons or mass-destructive weapons (nuclear weapons, chemical or biological weapons, or missiles), or any other weapons.

For products which are controlled items subject to the "Foreign Exchange and Foreign Trade Law" of Japan, the export license specified by the law is required for export.

- 2. Please contact our sales representatives or product engineers before using the products in this catalog for the applications listed below, which require especially high reliability for the prevention of defects which might directly damage to a third party's life, body or property, or when one of our products is intended for use in applications other than those specified in this catalog.
 - 1 Aircraft equipment 3 Undersea equipment
- 2 Aerospace equipment 4 Power plant equipment
- (5) Medical equipment
- 6 Transportation equipment (vehicles, trains, ships, etc.)
- Traffic signal equipment
- 8 Disaster prevention / crime prevention equipment
- Data-processing equipment
- (ii) Application of similar complexity and/or reliability requirements to the applications listed in the above
- 3. Product specifications in this catalog are as of July 2004. They are subject to change or our products in it may be discontinued without advance notice. Please check with our sales representatives or product engineers before ordering. If there are any questions, please contact our sales representatives or product
- 4. Please read rating and ACAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.
- 5. This catalog has only typical specifications because there is no space for detailed specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.
- 6. Please note that unless otherwise specified, we shall assume no responsibility whatsoever for any conflict or dispute that may occur in connection with the effect of our and/or a third party's intellectual property rights and other related rights in consideration of your use of our products and/or information described or contained in our catalogs. In this connection, no representation shall be made to the effect that any third parties are authorized to use the rights mentioned above under licenses without our consent.
- 7. No ozone depleting substances (ODS) under the Montreal Protocol are used in our manufacturing process.
