

Buccaneer®

Buccaneer®
Connectors

A full range of IP68 rated environmentally sealed circular connectors designed to provide secure and safe connections in harsh or hostile conditions. The range consists of the miniature 400 Series, Mini, Standard and the heavy duty, high current 900 Series. With a wide choice of alternatives from 2 to 25 poles, BNC connections and screw, solder or crimp terminations, the Buccaneer series provide the answer to many design problems.

Screw terminations ensure simple 'field' connection, whilst crimp terminations fulfil the requirement for fast and effective volume connections. Each range has flex cable connector, in-line flex cable connectors and panel mounting connector options.

The Buccaneer® series find numerous applications either in external environments or where protection against the ingress of moisture is needed.

- 3 Choose Pins or Sockets. Solder and crimp contacts are supplied separately in packs of ten.
- 4 Choose Polarising/Blanking Pins. If required for solder/crimp contact inserts. Supplied in packs of ten.
- 5 Contact Insertion Tool (required to load solder/crimp contacts into inserts).
- 6 Crimping Tool (if required for crimp contacts).
- 7 Sealing Cap (if required).

Cable Acceptance

Cable gland for 5-7mm fitted as standard.

Cable Diameter	Gland Part No.	Gland Colour	Additional Suffix
5-7mm	12023/1	White	Fitted as standard
3.5-5mm	12023/5	Grey	Suffix /04
6-8mm	12023	Black	Suffix /06
7-9mm	12023/2	Yellow	Suffix /07

To order body with alternative cable gland add suffix to part no. e.g.
PX0800/06 = PX0800 body with cable gland to suit 6-8mm dia. cable.
