FIBOX COMPANY PRESENTATION

Fibox enclosures are manufactured in modern factories located in the Helsinki, Finland metropolitan area and in Inchon, the Republic of Korea.

35 YEARS EXPERIENCE IN THERMOPLASTIC ENCLOSURES

In 1966, FIBOX introduced the first modular enclosures moulded from polycarbonate plastic. These enclosures began a new era in electrical panel building. From the beginning, a commitment to continuous product improvement and an on going product development has fuelled a dramatic and rapid growth for the company.

FIBOX, a privately-owned Finnish company, is one of the largest enclosure manufactures in the world, and is the market leader in thermoplastic enclosures used for protecting electrical and electronic components operating in hostile environments.

Whatever your application, the FIBOX enclosure family features the widest range of high quality enclosures for the packaging and protection of electrical and electronic components and systems. Enclosures can be delivered in standard off the shelf configurations or customised to your exact specifications. Fibox Oy Ab earned the ISO 9001:2000 Quality Certification for all its operations in 1992.

Fibox voluntarily submits its products for third party testing and evaluation, and currently has many third party listings including, UL, CSA, KEMA, FIMKO, DNV, LR, etc. The company enclosures are rated EN 60529 even up to IP 68. In addition, nearly all products are rated for use in hazardous areas.

CONTINUOUS PRODUCT DEVELOPMENT

The FIBOX enclosure range features over 500 different standard enclosures made of polycarbonate, ABS, polyester fibre-glass and aluminium. Fibox is the industry leader in developing both new products and new technologies for moulding thermoplastic enclosures. At Fibox, we consider moulding technology an essential part of product development.

For example, the new FIBOX MNX enclosure is the first to utilise direct injection of the enclosure gasket material during the body moulding process. This new process ensures precision moulding of the gasket guaranteeing superior enclosure protection ratings. Fibox is the only manufacturer applying this technology to enclosures.

Another example is FIBOX's emphasis on multiple slide technology for mould construction. While much more costly, this type of mould provides our OEM customers cost effective alternatives for modifying standard enclosures to meet their specific needs.

But more important than technical leadership, is the FIBOX commitment to understanding the needs of its customers. All our products are designed in close cooperation with our customers. We use input from our global customer base to produce new enclosure ranges, useful accessories and on-going product improvements and enhancements.

FIBOX is on the WEB for YOU

Find Fibox support services on the world wide web.

Visit our multi-language WEB site. As a global, multinational company, our home page is available in English, French, German, Swedish, Korean and Finnish.

No time for drawing enclosures?

At **www.fibox.com**, Fibox lends a helping hand to designers with CAD format drawings which can be easily downloaded. Select only the drawings you need for your selected enclosure and complete your design quickly. Save time with drawings available in both inches and millimetres.

Need technical specifications, accessories or agency approvals?

At **www.fibox.com**, you can obtain the technical information you need to complete your design. Select your enclosure, and print a PDF file with a photo, dimensional drawing (in metric and inches), part numbers, ordering codes, technical data and regulatory agency approvals. There is even a list of correct accessories, ready for you to print. Select only the information you want and need!

The world changes and so do we.

At **www.fibox.com**, you can see the latest Fibox products and services. As a leader in injection moulding for the electrical and electronics industries, there is always something new at Fibox. Visit our WEB site to keep abreast of new products and services, the latest in customising options, or our growing list of accessories. Our electronic newsletter will introduce you to new products, new applications and new services, plus add a personal touch as you get to know Fibox around the world.

Need technical or promotional material?

At **www.fibox.com**, you can request our catalogue, full colour data sheets, press releases, manufacturers declarations, CD-ROM and much more. Just click the envelope and specify what you need.

Your thoughts, please!
Give us feedback. Tell us what you like and what you don't like! Contact us via **www.fibox.com**, or E-mail us at **info@fibox.fi**. We are committed to continually improving our service to you. Please help us by sharing your opinions with us.

YOU surf to US and let US serve YOU

FIBOX QUALITY CREATES CUSTOMER ADVANTAGE

Fibox has developed a sophisticated quality system to assure our customers of the reliability and consistency of our products and our service. All aspects of our operations, from design and development through to production and product delivery, are documented to ensure superior performance. Performance you can rely on.

Fibox is an ISO 9001 certified manufacturer and was awarded its certificate by Bureau Veritas Quality International in 1992. This approval covers specifications defined by ISO 9001:2000.

THE FIBOX QUALITY POLICY

The Fibox approach to quality is documented in the Fibox Quality Policy manual.

THE FIBOX QUALITY SYSTEM

The Fibox quality system applies not only to product quality and safety, but availability of product, accuracy of shipments, technical support and customer service. The continued success of this program is assured by regular internal and independent external audits.

NEMA/UL CLASSIFICATIONS OF PROTECTION

The National Electrical Manufacturers Association (NEMA) is a US Manufacturers Organisation which actively promotes standardised product specifications for electrical apparatus.

NEMA performance criteria and test methods are used by Underwriters' Laboratories as guidelines for investigation and listing of electrical enclosures.

Approximate IP equivalents in parentheses

NEMA 1:	Indoor use primarily to provide a degree of protection against contact with the enclosed equipment and against a limited amount of falling dirt. (IP30)
2:	Indoor use to provide a degree of protection against limited amounts of falling water and dirt. (IP31)
3:	Outdoor use to provide a degree of protection against windblown dust, rain, and sleet; undamaged by the formation of ice on the enclosure. (IP64)
3R:	Outdoor use to provide a degree of protection against falling rain and sleet: undamaged by the formation of ice on the enclosure. (IP32)
3S:	Outdoor use to provide a degree of protection against windblown dust, rain and sleet; external mechanisms remain operable while ice laden.
4:	Indoor or outdoor use to provide a degree of protection against splashing water, windblown dust and rain, hose directed water; undamaged by the formation of ice on the enclosure. (IP66)
4X:	Indoor or outdoor use to provide a degree of protection against splashing water, windblown dust and rain, hose directed water; undamaged by the formation of ice on the enclosure, resists corrosion. (IP66)
6:	Indoor or outdoor use to provide a degree of protection against the entry of water during temporary submersion at a limited depth; undamaged by the formation of ice on the enclosure.
6P:	Indoor and outdoor use to provide a degree of protection against the entry of water during prolonged submersion at a limited depth.
11:	Indoor use to provide by oil immersion a degree of protection of the enclosed equipment against the corrosive effects of corrosive liquids and gases.
12,12K:	Indoor use to provide a degree of protection against dust, falling dirt and dripping noncorrosive liquids. (IP65)
13:	Indoor use to provide a degree of protection against dust and spraying of water, oil and noncorrosive coolants. (IP65)

FIBOX

THE IP AND IK CLASSIFICATIONS

Ingress protection class of enclosures is given in the form of IP classification, a two digit coding which is shown below. Fibox has tested the enclosures according to IEC 529 or the newer EN 60529 4:1992. The latter requires the second digit to be tested from class 6 upwards separately to each level of class, thus the double marking IP 66 / IP 67 indicates that the actual tests have been made for both levels.

The European standard for empty enclosures, EN 50298:98 includes the IK impact test. This test is described in EN 50102, and as Fibox enclosures are tested to EN 50298:98, the data for impact resistance are available as well.

FIRST NUMBER Protection against solid objects		SECOND NUMBER Protection against liquids		IK CODE Protection against mechanical impacts	
IP	TEST	IP	TEST	IK	TEST
0	no protection	0	no protection	00	no protection
1	protected against solid objects up to 50 mm e.g. accidental touch by hands.	1	protected against vertically falling drops of water.	01-05	impact < 1 joule
2	protected against solid objects up to 12 mm e.g. fingers.	2	protected against direct sprays of water up to 15° from the vertical.	06	impact 1 joule
3	protected against solid objects over 2,5 mm (tools+ small wires).	3	protected against sprays to 60° from the vertical.	07	impact 2 joule
4	protected against solid objects over 1mm (tools+ small wires).	4	protected against water sprayed from all directions - limited ingress permitted.	08	impact 5 joule
5	protected against dust - limited ingress permitted (no harmful deposit).	5	protected against low pressure jets of water from all directions - limited ingress permitted.	09	impact 10 joule
6	totally protected against dust.	6	protected against strong jets of water e.g. for use on shipdecks - limited ingress permitted.	10	impact 20 joule
		7	protected against the affects of immersion between 15 cm and 1 m.		
		8	protected against long periods of immersion under pressure.		

FIBOX

CUSTOMISATION SERVICES

Fibox is a leading innovator, designer and manufacturer of enclosures. Our products are marketed in over 40 countries world wide. We provide superior, cost effective solutions for protecting electrical and electronic equipment operating in hostile environments.

To increase the range and flexibility of our package solutions, Fibox has developed a comprehensive range of services, permitting cost effective customisation for specific applications.

The two most important of these are machining services and customised tooling.

Our sophisticated CNC machinery can supply enclosures with holes, cutouts and openings to your specification. This solution is best suited for small to medium volumes of enclosures.

For large OEM volumes, our sophisticated, multiple slide tooling permits cost effective modification of any side of the enclosure. In this way, the OEM can have his custom product based upon a standard Fibox enclosure. The OEM will save both money and development time, enabling him to concentrate on product sales.

The www.fibox.com web site provides you the fastest route for choosing Fibox enclosures and accessories. Our interactive program guides you to the correct enclosure and accessories for your application. Technical data and drawing files (DWG, IGS, and DXF) allow the engineer to design and customise quickly.

See also page 14.

Fibox can customise your enclosures making them completely ready for your application.

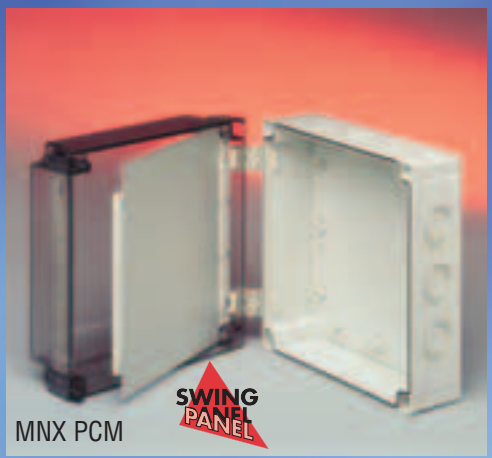
MNX PC

MNX ABS



MNX PCM

The FIBOX MNX range of enclosures represents the culmination of 35 years experience in enclosure design and manufacture. Unique tooling defines a new "State of the Art" for injection moulding. The FIBOX MNX polycarbonate and ABS range has been designed to house and protect electrical and electronic components in hostile environments. Three body depths, and up to 4 cover choices per body size, create over 240 variations. Covers are available opaque or transparent "smoked grey". A wide selection of accessories is available including a hinged "Swing Out" inner panel, the "Swing Panel".

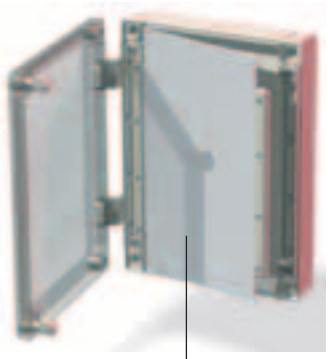
POLYCARBONATE AND ABS ENCLOSURE

MULTI PURPOSE MOUNTING PODS

The 50 mm (H) base features 3 levels for component mounting. The highest level provides component clearance under the Printed Circuit Board. The middle level is ideal for DIN rail mounting. The lowest level permits snap-in mounting of PCB's.



Please ask for Fibox mounting and machining service for terminal blocks and cable glands.

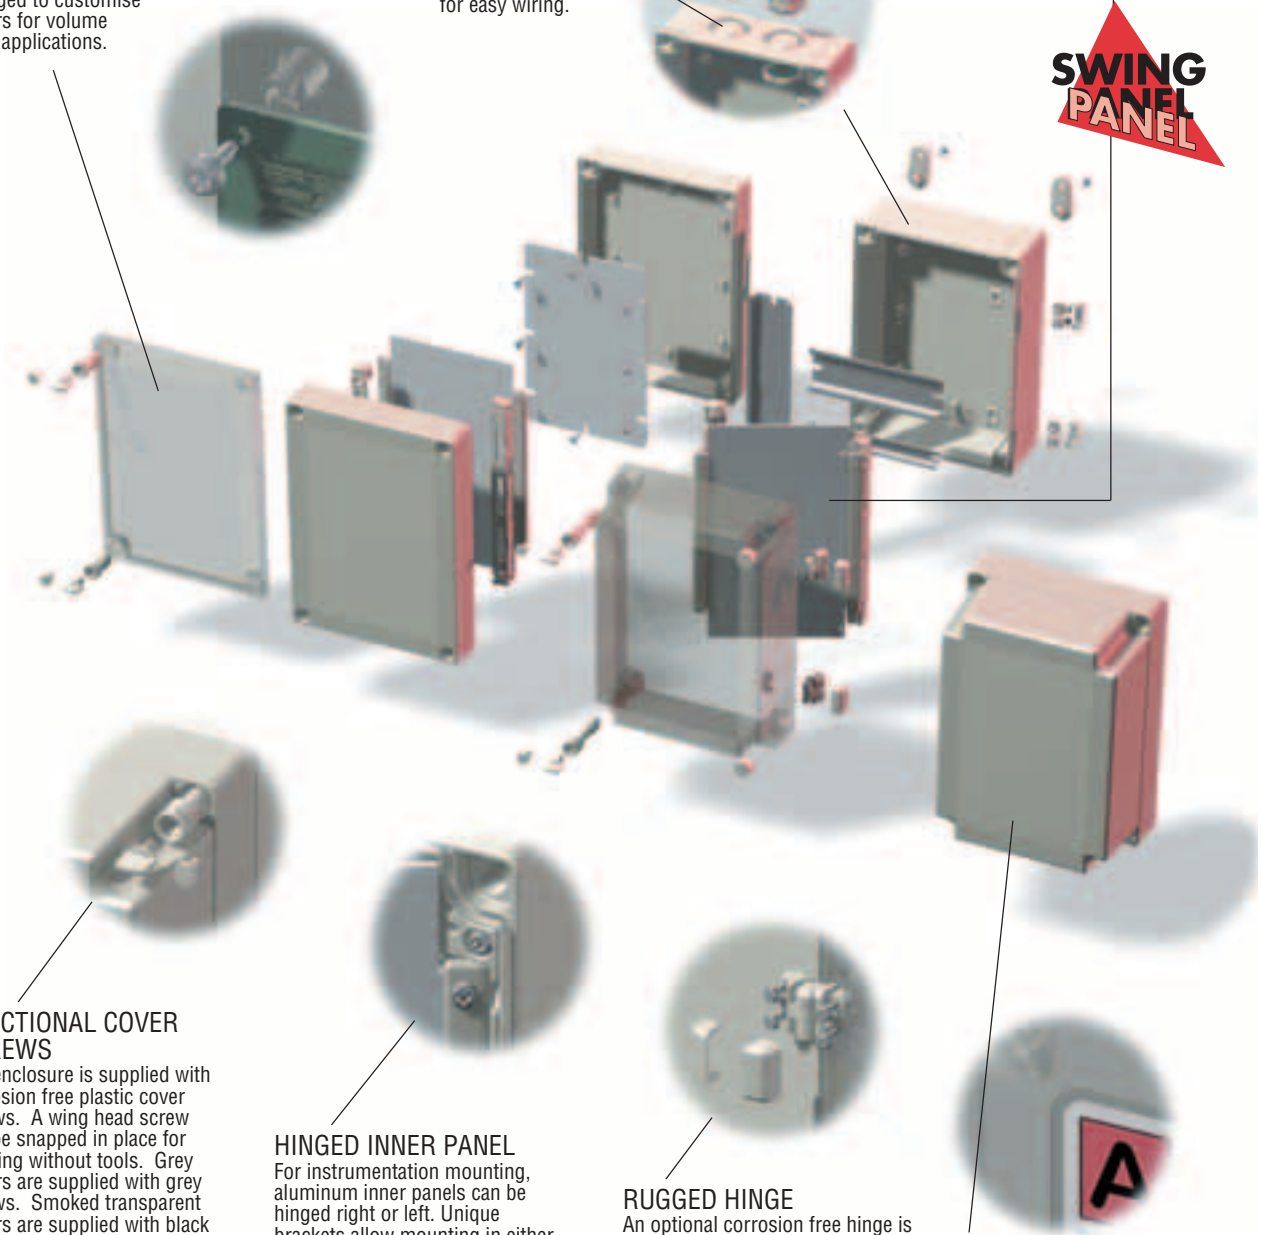
VERSATILE COVERS

Grey opaque or smoked transparent polycarbonate covers provide a stylish finish to any installed equipment. Tooling may be cost effectively changed to customise covers for volume OEM applications.

FIBOX MNX PCM

Enclosure features metric knock-outs moulded in place for easy wiring.

SWING PANEL



FUNCTIONAL COVER SCREWS

The enclosure is supplied with corrosion free plastic cover screws. A wing head screw can be snapped in place for opening without tools. Grey covers are supplied with grey screws. Smoked transparent covers are supplied with black screws.

HINGED INNER PANEL

For instrumentation mounting, aluminum inner panels can be hinged right or left. Unique brackets allow mounting in either base or cover. The brackets permit mounting at variable depths.

RUGGED HINGE

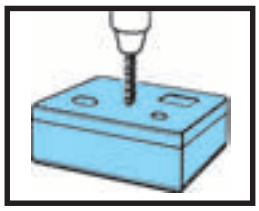
An optional corrosion free hinge is available. Mounted on the outside, fixing screws are hidden by decorative covers.

MEMBRANE KEY-BOARD RECESS

The cover features a slightly recessed area ideal for overlays and membrane key pads. Special cover available for sizes 150 and 175, see page 9.

FIBOX CUSTOMIZING SERVICES

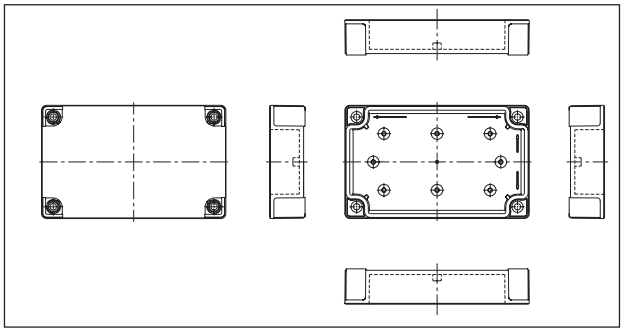
FIBOX MACHINING SERVICES



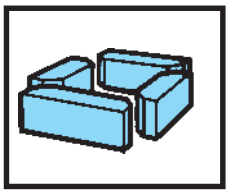
To increase the range and flexibility of our enclosure solutions, Fibox has developed a comprehensive range of services, permitting cost effective customisation for specific applications. The two most important of these are machining services and customised tooling.

Our sophisticated CNC machinery can supply enclosures with holes, cutouts and openings to your specification. This solution is best suited for small to medium volumes of enclosures. Fibox knowledge of enclosure materials ensures that he machining method is compatible with the chosen enclosure material.

Prior to machining a production run, Fibox requires customer approved drawings. Either the customer or Fibox can create these drawings. Enclosure specifications and technical data are available on our latest CD-ROM or on the WEB WWW.FIBOX.COM. CAD support drawings are available in IGES, DWG and DXF formats adaptable to your design system requirements.



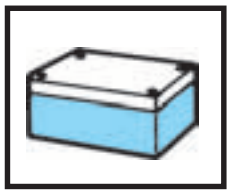
CUSTOMISED TOOLING



For large volume OEM requirements, it is often possible to customise the moulding of a standard product to meet the OEM's specific needs. Provided the mould is a sophisticated multiple slide mould, any enclosure side may be customised without requiring an entirely new mould. It is important that the OEM consult with Fibox early in your design process to determine what, if any, mould change restrictions exist.

Altering an existing Fibox mould can be a very cost effective alternative to creating a custom mould. In essence, you lease a high volume, standard product mould with minimal initial tooling cost. This can shorten product development times and permit customising even those products with projected short life cycles. Your new product reaches the market sooner.

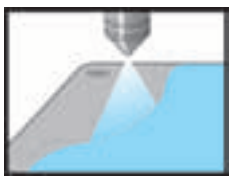
COLOURED PLASTIC ENCLOSURES



Fibox offers custom moulding of standard enclosures in customer specified colours. Standard colour specifications are based upon the RAL system, however custom colour matching is possible.
The type of plastic has significant impact on colour match, colour consistency and cost. Please consult your Fibox representative for guidance.

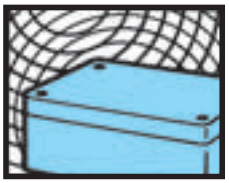
Custom colour molding becomes economical in volumes over 1000 pieces, but lower volumes are possible. Cost adders are based upon increased raw material costs, plus the cost to prepare moulds prior to production and then clean the moulds after production. These mould preparation costs are highly volume dependent.

PAINTED ENCLOSURES



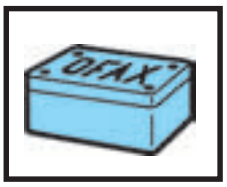
Painting enclosures is recommended for plastic enclosures when volumes do not justify custom moulding. Critical colour matching, if required, is also easier to accomplish with paint. Paint type is dependent upon the choice of enclosure material. Please consult your Fibox representative for guidance.

EMC - PLASTIC ENCLOSURES



Plastic enclosures can be prepared to provide EMC shielding. Various methods are available, but painting the internal surface with Ni conductive paint is the preferred method. This coating, combined with a conductive gasket material such as CHO-SEAL 1350, can provide significant shielding levels. Proper selection of materials is very application specific. Please consult your Fibox representative for guidance.

PRINTED ENCLOSURES



Silk screen printing is recommended for enclosure batches of less than 1000 pieces. This method is mainly suitable for flat surfaces, and can be used for large areas.

Tampo printing is the best solution for volumes greater than 1000 pieces. It is suitable for printing on both flat and curved surfaces of limited size. Tampo printing is also ideal for tight spots like the inside surface of the enclosure.

FIBOX PICCOLO

PICCOLO EMC

PICCOLO PUSH BUTTONS

PICCOLO SIGNAL

The FIBOX PICCOLO range of enclosures is specifically designed for housing push buttons, terminal blocks, motor starters and electronic devices. They are also ideal for mounting and protecting process control sensors and switches. There are six basic sizes and a choice of two cover depths. Push Button configurations are available as standard. FIBOX PICCOLO is available in polycarbonate or ABS.
The enclosures are rated EN 60529 IP66/IP67.

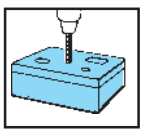
CUSTOMISATION

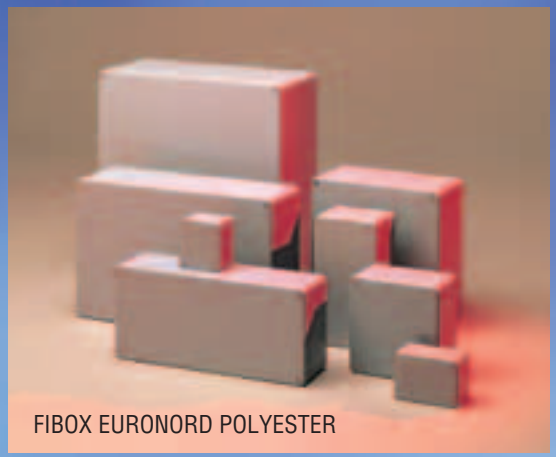
Enclosures can be machined, painted, screen printed and preassembled to meet your customisation requirements. Fibox's service centre offers complete CNC machining, hinge mounting, screen printing, assembly and much more. Our wide selection of enclosures and accessories can be customised to create a unique enclosure meeting your application requirements.



FIBOX EURONORD

FIBOX EURONORD

FIBOX EURONORD ALUMINIUM



FIBOX EURONORD POLYESTER

The FIBOX EURONORD range of enclosures is specifically designed for housing DIN-rail mounted terminal blocks. Additionally, these enclosures are excellent for packaging sensors for process control applications. FIBOX EURONORD enclosures are available moulded from polycarbonate, ABS or polyester (GRP). FIBOX EURONORD enclosures are also available in cast aluminium. The enclosures are rated EN 60529 IP 66/67.

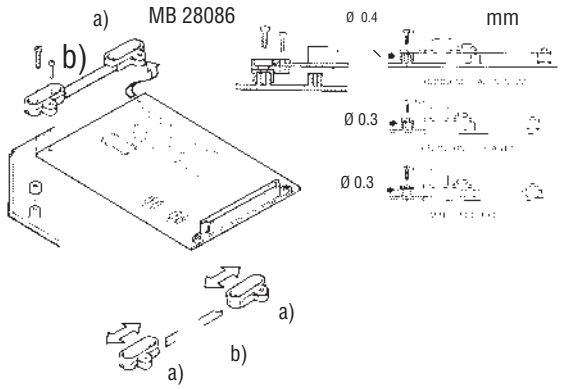
CIRCUIT BOARD BRACKET

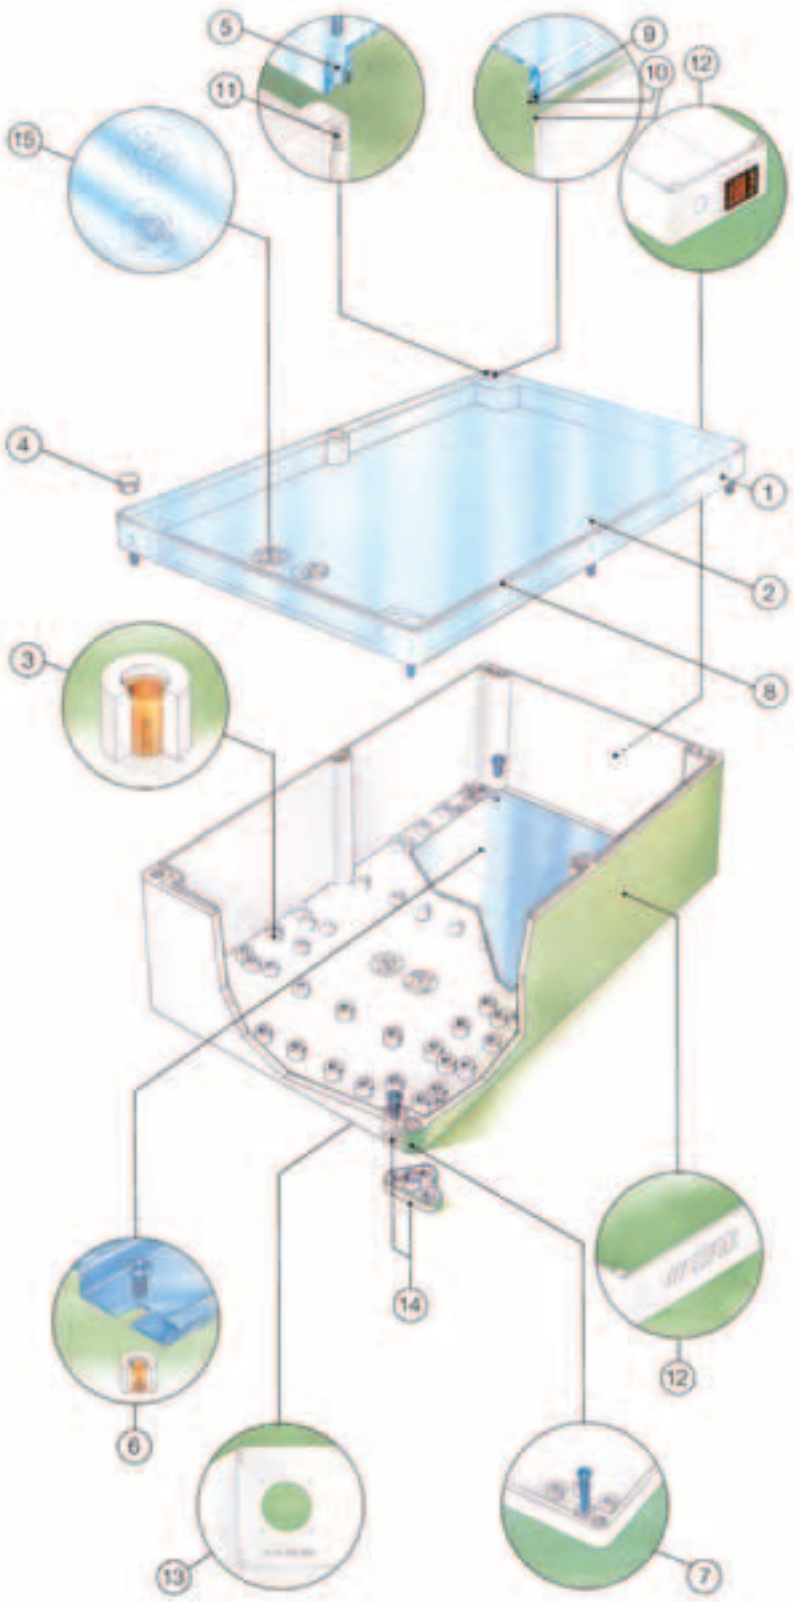
Printed circuit boards and mounting plates often need special mounting supports that offer flexibility in positioning the boards across the enclosure body. Mounting supports also raise the board above the enclosure bottom, especially effective when using two sided boards. This circuit board bracket has a standard E1 (IEC 297-3, DIN 41494) Eurocard screw mounting distance of 89 mm (3.5") accepting M2,5 to M4 screws. The bracket can also be used for nonstandard boards by separating the ends of the bracket (a) from the connector bridge (b).
If the bracket is not needed, the adapter parts for each individual mounting pod size can be used only for raising the board above the enclosure body level.



CIRCUIT BOARD BRACKET		
ORDER SYMBOL	Standard Mounting Distance	Remarks
MB 28086	89 mm	Adapter for EURONORD, PICCOLO, MINI. Direct mount to EK, SOLID, EKI.

FIBOX EURONORD II

POLYCARBONATE AND ABS ENCLOSURES



1. Enclosure covers are moulded with state of the art technology. Depending upon size, covers are injection moulded from the edge or the inside surface. The outer surface is free of "gate marks" creating a smooth area for labels, decals or screen printing.

2. Cover screws are designed for automatic assembly using normal tools or PosiDrive Phillips screwdrivers. Slightly ferrite, F1stainless screws work with magnetised drivers. Screws fully tighten in 4 revolutions.

3. Fibox Euronorm II enclosures feature more mounting points than the competitors' products. F1 style screws are provided for mounting inner panels and Din rails. Enclosures feature low height mounting pods, thus maximising internal usable depth. Brass M3 inserts are also available.

4. Decorative cover plugs create a smooth finished appearance.

5. Cover screws are held captive, but are still removable.

6. Assorted mounting plates and Din rails are available.

7. Enclosures can be wall mounted through the base holes. This reduces both mounting area and possible vandalism. Mounting holes are outside the gasket area maintaining water tight protection.

8. The Euronorm II features a slightly bevelled edge design creating a modern look.

9. Robotically applied, foamed in place PUR gaskets are moulded into the unique designed gasket groove. The tight adhesion and low compression set of PUR gasket material ensures protection ratings of NEMA 4 and IP 66/67.

10. An extension strip structure reinforces the inner gasket groove edge, protecting against side impact.

11. Special injection moulded plastic threads allow the cover screws to fasten quickly, while preventing sticking and corrosion.

12. The enclosure sides have space for mounting switches, sensors, or cable glands. Smooth sides allow decals or screen printing of logos. Fibox can customise enclosures with cut-outs, drilled or machined holes, and knock-out openings to the customers specifications.

13. Customisation of the back and sides of the enclosure can be supplied by Fibox.

14. Optional wall mounting brackets (feet) allow 4 external mounting points for hanging the enclosure, even when the cover is in place.

15. Fibox is an ISO 9001 manufacturer. Each enclosure part (cover and base) bears a code number, indication of manufacturing date and type of plastic, i.e. PC, ABS, etc. These indications are moulded into the part for quality control purposes and for compliance with European recycling regulations.

FIBOX EURONORD II

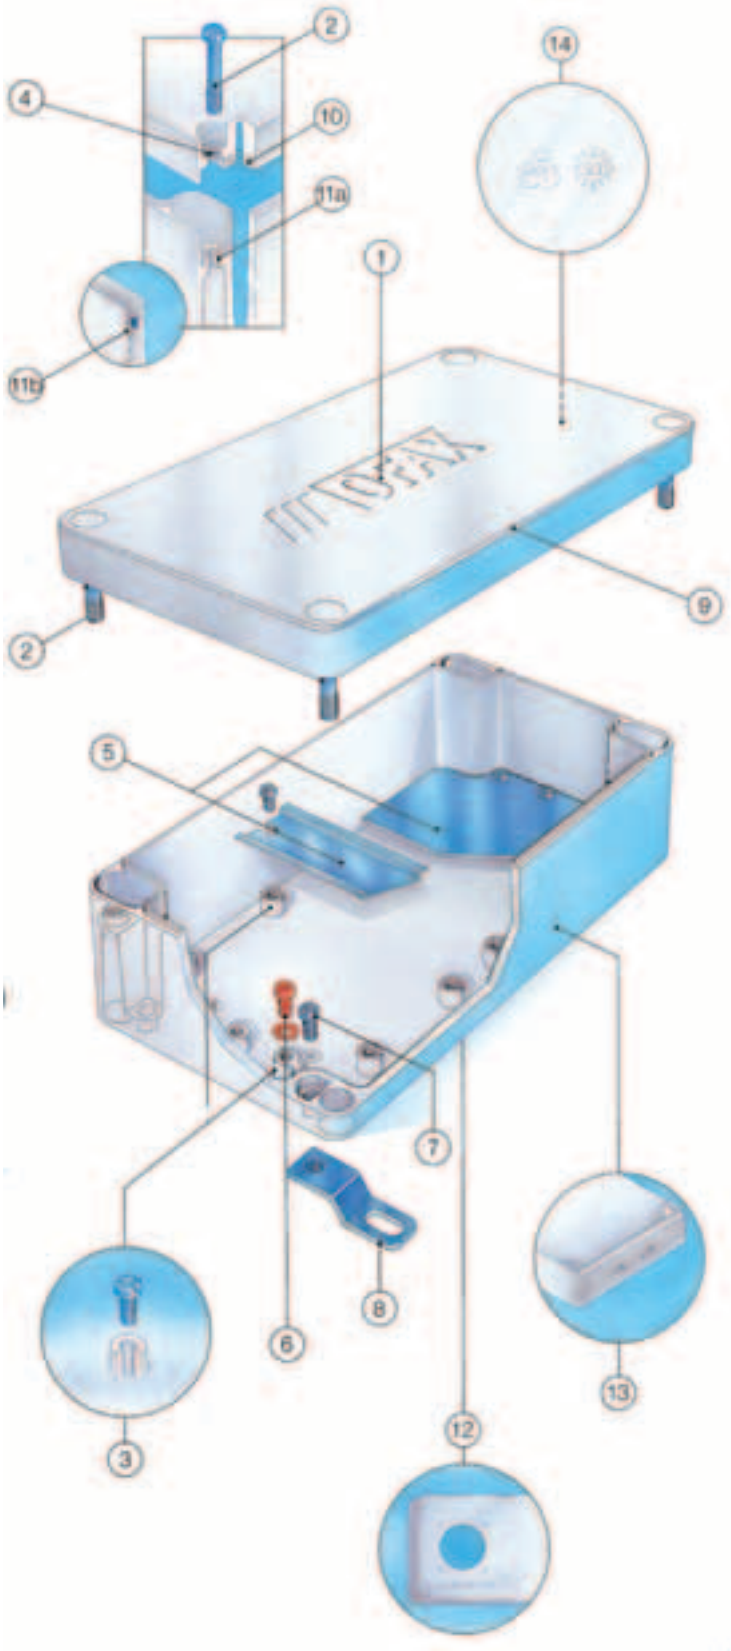
ALUMINIUM ENCLOSURES



1. Enclosure covers can be custom designed. Modifications include holes, cutouts, flanges, and frames. Even external changes such as cooling ribs (heat sinks) are possible. OEMís receive the enclosure ready for assembly.

2. Cover screws are designed for automatic assembly using normal tools or PosiDrive Phillips screwdrivers. Slightly ferrite, FI stainless screws work with magnetised drivers.

3. This enclosure has more internal mounting points than other enclosures on the market. There are threaded M4 or M6 mounting pods at both interior ends of the bases. Along the interior sides, the enclosure bases have rows of pods ready for M3 Taptite (smaller enclosures) and M5 Taptite (larger enclosures). Alternatively, pods can be machined for M4 or M5 mounting screws. Helicoil inserts are available in English thread sizes.

   The large number of mounting pods, especially in the bigger enclosures, creates many alternatives for mounting components. Various sized mounting plates are easily installed. DIN rails can be mounted either vertically or horizontally permitting high density terminal block installation.

   Usable internal depth is maximised as Euronorm II has the lowest height mounting pods on the market.

4. A special retainer keeps cover screws captive. No more lost hardware.

5. A variety of mounting plate sizes are available, plus TS35 and TS15 DIN rail cut to size.

6. Proper electrical earthing is ensured with copper plated screws and paint free grounding pods.

7. The enclosures can be mounted through the base. The mounting holes are outside the gasket area; maintaining the water tight seal. Oval shaped mounting holes accommodate mounting centre variations.

8. Optional stainless steel wall mounting plates permit mounting without opening the enclosure.

9. The Euronorm II features a slightly bevelled edge design creating a modern look.

10. Robotically applied, foamed in place PUR gaskets are into the unique designed gasket groove. The tight adhesion and low compression set of PUR gasket material insures protection ratings of NEMA 4 and IP 66/67.

11. Enclosure bases are tapped to receive cover screws, either M4 or M6, depending upon enclosure size. Optional special thread types are available, as are Helicoil special steel thread inserts which prevent cover screws from corroding even in saltwater environments.

12. Customisation of the back and sides of the enclosure can be supplied by Fibox.

13. Larger enclosures have lots of space for mounting instruments, switches, sensors, indicators and connectors. Smooth sides permit easy machining and allow decal and screen printing. Fibox can customise the enclosure with openings, cut-outs, holes and tapped holes. Changes can add unique options, for example, conduit hub openings or cooling fins.

14. Manufactured using unique techniques. These enclosures have straight sides (no draft angle) which means conduit and cable fitting are at right angles, insuring stress free connections. Further, straight sides mean that enclosures can be securely "ganged" together without gaps.

FIBOX MCE

MCE CONTROL •
MCE FEM •
MCE ISO •

The FIBOX MCE modular component enclosures offer a practical and modern design to automation, control and switch gear applications from IP 55 (MCE FEM and MCE ISO) to IP 65 (MCE CONTROL). In MCE CONTROL and MCE FEM unique features include multiple membrane cable glands (Multi-FEM). In larger (14+) sizes a variety of flange plates is available for the standard size 2 knock-out. All cable entry knock-outs in Fibox MCE are in metric dimensions to reflect modern trends. Application specific wiring can be achieved from any direction, easily, quickly and securely.

MCE CONTROL, MCE FEM, MCE ISO

- Modular Component enclosure

WHY POLYCARBONATE (PC)?

Polycarbonate, trade names Lexan, Makrolon etc., is known as high tech engineering thermoplastic with high levels of mechanical, optical, electrical and thermal properties. But why are Fibox Polycarbonate types so well suited for enclosures in power distribution applications?

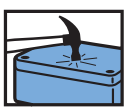
Interested in more information? Order Fibox "The Future is Plastic" information sheet.

It can be used outdoors

Polycarbonates FIBOX use are all UV tested for outdoor use, are highly corrosion resistant and make enclosures IP 65 (EN 60529 4:1992) weather resistant. One quality of enclosure for all environments.

It is safe in fire

Polycarbonates FIBOX use are 960 (C glow wire (IEC 695-2-1) and UL 94 V-0 tested. Self-extinguishing, non-igniting with no potentially hazardous halogen additives.



It does not break

Hard knocks and rough handling pose no problems. Polycarbonates that Fibox uses insure that our enclosures meet IK 08 (EN 50102) or better impact resistance.

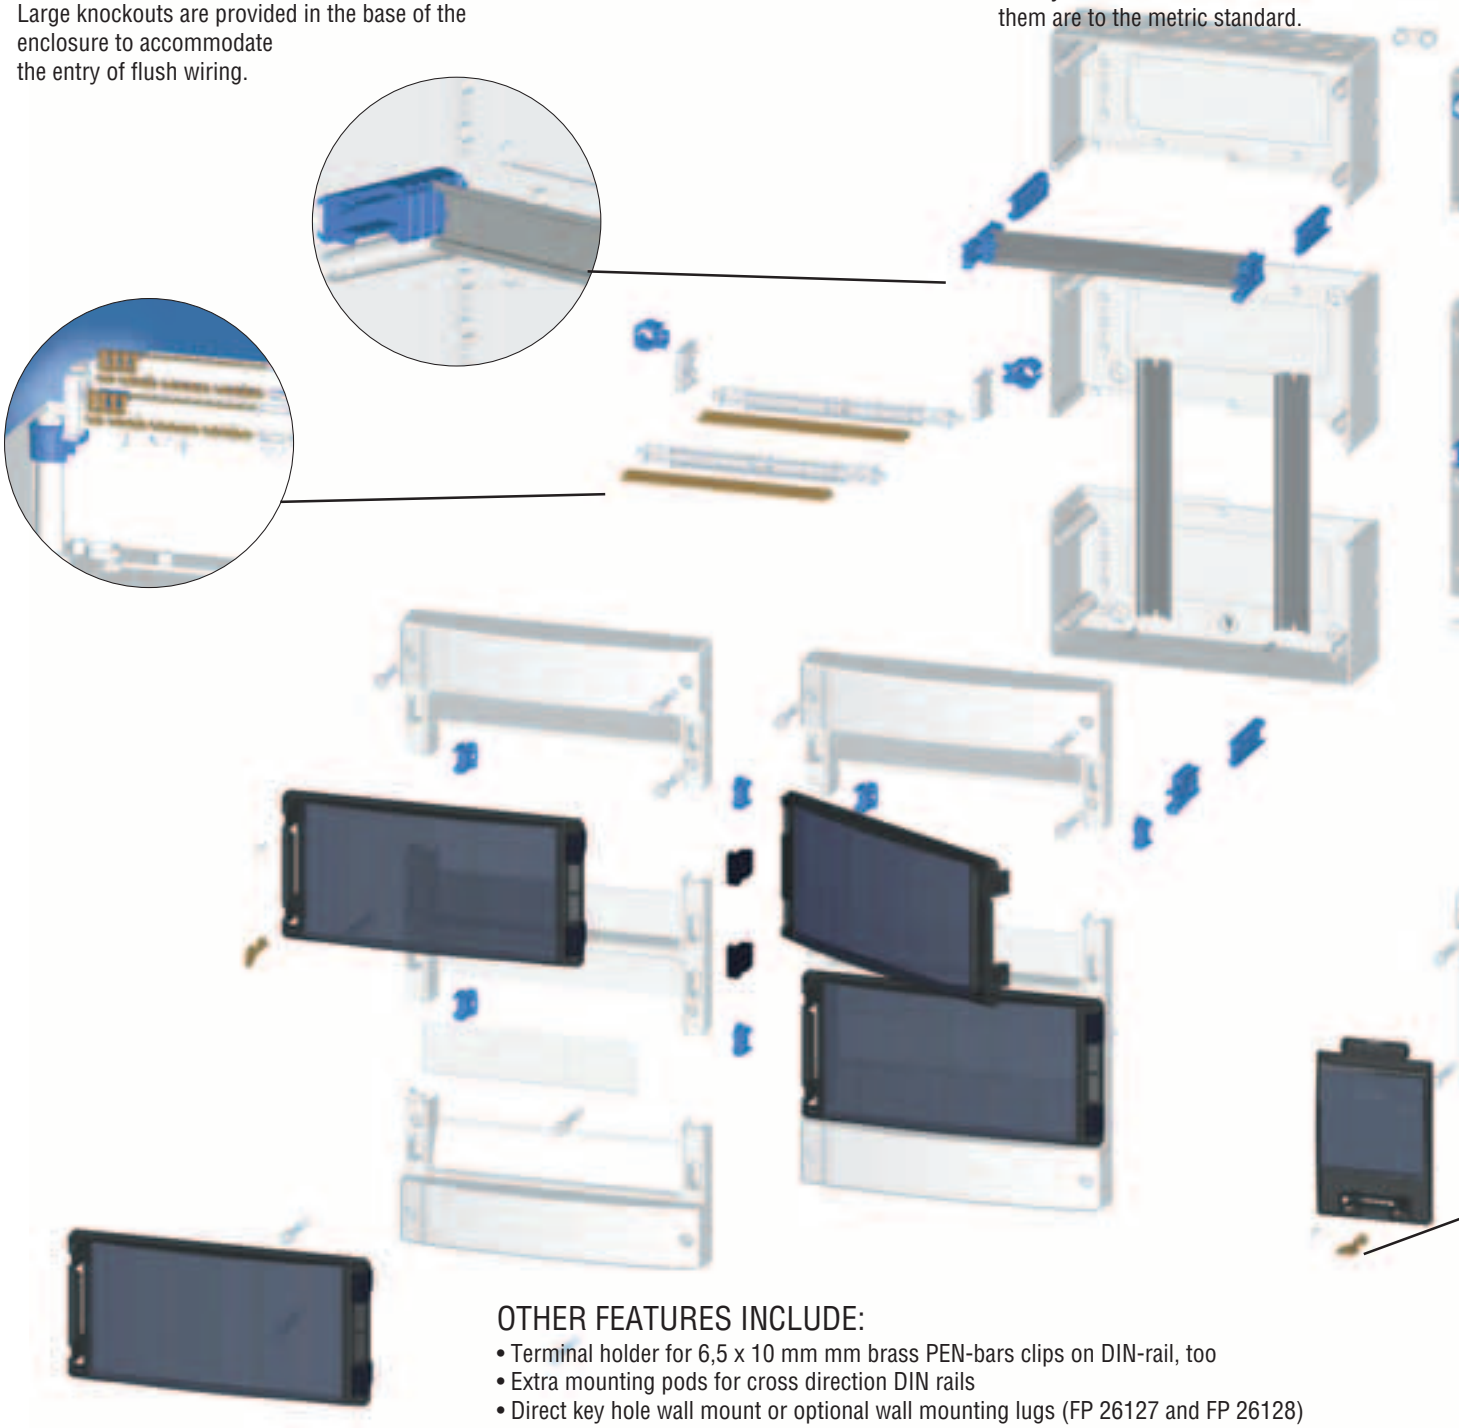
FIBOX MCE CONTROL

SPACIOUS AND EASY TO WIRE

PEN supports are positioned to allow optimum wiring space inside the enclosure. Their position also makes wiring as easy as possible.
DIN rails are mounted away from the base of the enclosure and on units of
14+ modules the position is adjustable.
Large knockouts are provided in the base of the enclosure to accommodate
the entry of flush wiring.

EVERY WIRING CONFIGURATION MADE POSSIBLE

"MULTI FEM", multi-cable membrane glands, size M50, enable quick and effective entry of 3 x Ø 6-10 mm, 3 x Ø 10-14 mm through one single membrane while maintaining IP65.
In sizes for 14 modules and above many gland plate options are available including blind, metric, PG, threaded, NPT and membrane versions.
There are cable entries on five sides of every MCE enclosure and all of them are to the metric standard.



OTHER FEATURES INCLUDE:

- Terminal holder for 6,5 x 10 mm mm brass PEN-bars clips on DIN-rail, too
- Extra mounting pods for cross direction DIN rails
- Direct key hole wall mount or optional wall mounting lugs (FP 26127 and FP 26128)
- Size 2/FL 21 knock-out for standard gland plates
- Front aperture can be covered with plates (mounting screw holes provided)
- Window can be replaced with instrumentation cover (14+ sizes)
- Enclosures can be connected to each other in all four directions due to the smooth sides and M20 knock-outs
- Enclosure can be mounted directly on flush mounted junction boxes via purpose designed knock-outs in the bottom of the enclosure

UNAUTHORISED ACCESS STOPS HERE

Stylish, but impact proof window can be secured easily with a clasp, MR 26065 key lock (optional) or screw. Pad lock set MR 26146 SET for three MCE 14+ windows is also available. Secured windows cover the screws used for the mounting of frame part of the enclosure and thus the components and the wall mountings remain inaccessible. Cover screws and windows can be wire sealed, too.

FIBOX MCE

MODULAR SERVICES FOR YOUR BEST

Fibox introduces surface mounting aid and multitude of earth-neutral solutions for all MCE sizes and a pad locking system for MCE 14+ sizes. All these products affirm the modularity of MCE enclosures and emphasise the characteristics of the range.

FIBOX MCE PE/N/PEN -bar -sets are complete packages, that include Phase Earth and Neutral bars and all necessary holders needed for assembly to FIBOX MCE enclosures. The same parts follow with standard delivery of MCE CONTROL and MCE FEM enclosures.

Note! All FIBOX MCE PE/N/PEN holders can also be mounted straight on DIN-rails. Then they take about one modular width, depending on the type of the wire used.

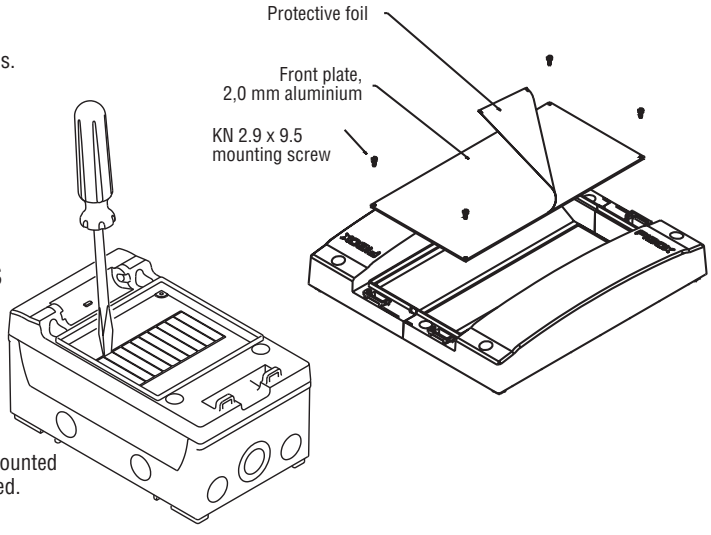
This feature together with well designed knock-outs on five sides of the MCE-enclosures enables the use of solitary enclosures even only for earthing purposes, whilst components are on neighbouring enclosures. Use of double wall fastening/conjunction lugs FP 26127 is useful on these occasions.

Product	Order symbol	
Ready to fit set includes PEN-bar holder for MCE 5 with two 6x10mm² brass bars. 	MCE 5 PEN SET	
Ready to fit set includes PEN-bar holder for MCE 9 with two 10x10mm² brass bars. 	MCE 9 PEN SET	
Ready to fit set includes PEN-bar holder for MCE 14 with two 16x10mm² brass bars. 	MCE 14 PEN SET	
Ready to fit set includes two PEN-bar holders for MCE 14 with two 16x10mm² brass bars and one 35x10mm² brass bar and a multi adapter for easier mounting. 	MCE 14 MU PEN SET	
Multi adapter set accepts a variety of PE/N/PEN -bars: brass or copper, profiles of 6,5x10mm (1 position in 4 placements), 5x5mm (2 positions in 3 placements), 2x12mm (12 placements). Naturaly the MCE 14+ PE/N/PEN -bar holder fits into multi adapter. It can be mounted on DIN 35 -rail or to internal towers of MCE 14 and larger enclosures. Set includes a pair of tower mounting pieces and two multi adapters. PE/N/PEN -bars need to be acquired separately. 	MCE MU PEN SET	
Terminal bus-bar clamp, 25 mm².	MS BAR CLAMP	
Terminal bus-bar clamp, 35 mm².	MR 26145	

ALUMINUM FRONT PLATE FOR MCE 14+ ENCLOSURES

FP A 26133 broadens the spectrum of control and measurement equipment that can be assembled into MCE 14 and larger enclosures. It is:

- rigid: Use for switches.
- even: ideal for membrane keypads
- flat: good for variety of displays
- light in weight, as all FIBOX MCEs
- easy to tool, as FIBOX MCE in the whole.
- easy to mount with just four screws.
  (**KN 2.9x9.5**, please order separately, if applicable).



SURFACE MOUNTING ON MCE 5 AND MCE 9 ENCLOSURES

Flat surface of the two smallest MCE enclosures allow mounting of displays, membrane keyboards, etc. directly under the window. To open the inner cover for modular components, please use screwdriver and hammer or a knife.

PAD LOCKING SET FOR MCE 14+ ENCLOSURES

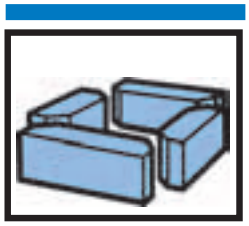
Pad locking set **MR 26146 SET**, which provides double locking safety for three MCE 14+ windows. Six 25mm x 25mm pad locks mounted into three holder parts keeps max. 42 modular components protected.

WALL MOUNTING RAIL FOR MCE 14+ ENCLOSURES

Wall mounting rail set **FP AL 26148** contains two rails and mounting instructions. Rail is mounted horizontaly to the back of the enclosure with two M5 12-14 mm screws. These holes on the rail are threaded. The wall mounting holes at the end of the rail are of 10 mm diameter. Please acquire the screws separately.

FIBOX CUSTOMISATION SERVICES FOR MCE -ENCLOSURES

More than 30 years of know-how with injection moulded plastic enclosures has taught FIBOX few tricks of the trade. Therefore we are able to provide a comprehensive range of enclosure customising options in affordable price and short lead times. Machining and tooling can be done with experience and expertise. Customised moulding is also available for larger orders in very economical price. Printing or colouring can give your product the needed edge. And we are proud to offer it to you.



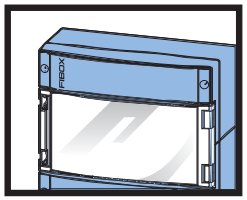
FIBOX CUSTOMISATION SERVICES FOR MCE ENCLOSURES.

More than 30 years of know-how in injection moulding plastic enclosures has taught FIBOX a few tricks of the trade. Therefore we are able to provide a comprehensive range of affordable enclosure customizing options with short lead times. Machining is carried out by highly experienced personnel who know their jobs inside out. Economically priced customised moulding is also available on larger orders. Printing and special colours add the finishing touch to your customized product and give you a competitive edge.

CUSTOMISED TOOLING

Our customized tooling service offers you a low cost method of producing "tailor-made" enclosures to your own exact specification. The required investment is often minimal, especially when existing interchangeable tool slides can be utilized. A typical lead time using this option can be as short as 5 to 8 weeks. As an example, the end plates of Fibox MCE enclosures can be easily modified. This means the mount, shape and number of knock-outs can be changed. We can even provide no knock-outs at all.

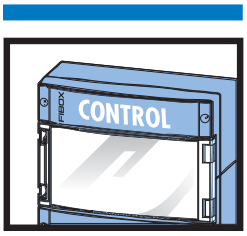
The flexible modular design of the Fibox MCE range means that to achieve large scale customization it may be only necessary to modify a small number of tools, therefore keeping the expense aspects under control. In addition to physical modifications the colour of the enclosure can be customized by using colour pigmented plastic granules. In the case of a customized mould run the colour change represents only a nominal extra cost.



COLOURED PLASTIC ENCLOSURES

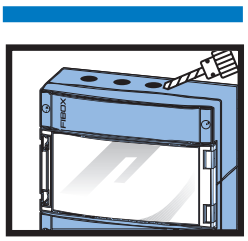
Fibox offers plastic enclosures in various customized RAL colours by using pre-coloured plastic raw material granules. The best result is achieved on non glass reinforced fibre materials. Colouring can be used as an efficient and relatively low cost method of promoting your company's corporate identity. This process becomes economical for batches of more than 500 pieces, then the surcharge is about 50%. For batches of 2000 pieces the surcharge is only about 10%. The additional cost involved when colouring enclosure raw material is incurred in cleaning and preparing moulds both before and after the production run. Painting of an MCE enclosure is not recommended due to the modular nature and design features.

As all Fibox MCE enclosures are constructed from various parts all these parts must be coloured separately. This allows for a variety of colour combinations. For example the cover screws, the enclosure body and the front frame can all be different colours. When designing a customized product it is important to remember that each coloured mould run increases the total enclosure price.



PRINTED ENCLOSURES

Silk screen printing and Tampo printing are recommended methods of adding logos, text or imagery to Fibox enclosures. Both methods can be used on flat surfaces and tampo printing is suitable for curved areas such as the cover . It is also recommended for areas where access is restricted, for example the area underneath the viewing window on Fibox MCE enclosures. Silk screen printing is an economical option for production batches of say 100, and Tampo printing is cost effective when the run is say 1000 pieces. Both methods, silk screen printing and Tampo printing, can accommodate one to three colours to RAL or PMS specifications. A quality end result is assured with both processes.



MACHINED ENCLOSURES

The Fibox machining service offers a peace of mind, value for money solution to your customizing requirement. Years of experience mean we can create the exact specification your drawings demand. Because we know our products and materials intimately we can advise you on the most efficient means of meeting your customizing needs quickly and efficiently. Fibox can machine enclosures to drawing with either metric or imperial dimensions. To attain a satisfactory result time and again we request that correct customizing drawings are provided. Our CAD/CAM system helps both Fibox and your designer to create drawings for CNC machining. Drawings of enclosures are available at www.fibox.com to be either printed out or copied c/w dimensions in PDF and GIF format or in DWG, IGES and DXF for downloading onto your CAD system for further modifications. Several enclosure drawings are also available in 3D format upon request.

Although machining a standard Fibox MCE enclosure is possible, a better result will be achieved if totally smooth end plates are utilized at the outset. These options can be viewed in our range brochure – FIBOX MCE PANEL or by visiting www.fibox.com .

FIBOX SOLID

FIBOX SOLID SC II

FIBOX SOLID METRIC KNOCK-OUTS

FIBOX SOLID HINGED COVER
Cover with hinges, more information page 44.

The FIBOX SOLID SC II range, SM range and SOLID Hinged Cover range offer a clear alternative to polyester enclosures. Moulded with impact resistant polycarbonate or ABS plastic, the FIBOX SOLID range is available as a screw cover enclosure or as a hinged cover enclosure.
The enclosures are rated EN 60529 IP66 / IP67.

Product			
FIBOX SOLID HINGED COVER	The unique new FIBOX SOLID hinge is assembled on the cover. The hinged cover can be easily mounted to the enclosure base without drilling holes or other modification. Field replacement of screw covers is easily accomplished without modification. This cover is suitable for the FIBOX EK, SOLID and FEX products. Available in opaque grey (G) or transparent (T) polycarbonate.

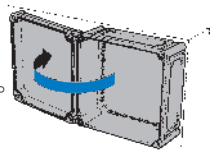
FIBOX SOLID HINGED COVER

FULL OPENING ANGLE

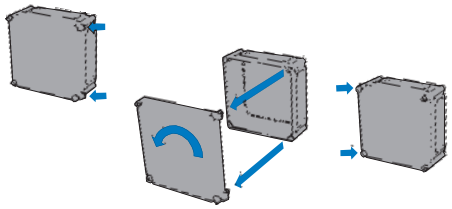
The hinged cover opening exceeds 180 degrees allowing complete access to the interior of the enclosure.

>180°



REVERSABLE LEFT / RIGHT OPENING

The the hinged cover may be mounted on the left side or on the right side. Hinging is field reversible and easily accomplished.



FIBOX SOLID SC II ENCLOSURES

These cabinets, are made from high impact resistant polycarbonate material, and will withstand harsh industrial environments. They have ready mounted hinges and quick lock screws. Protection to IP65 is maintained when fastened. The enclosure base features many internal mounting pods for various assembly requirements. SOLID SC enclosures offer a large number of accessories. Transparent cover options allow visual inspection of equipment installed inside the enclosure.

Approvals: IP65

FIBOX EK

FOUR EASY STEPS TO BUILD A DISTRIBUTION PANEL THAT WORKS

BASE | **FURNISH** | **CLAD** | **ROOF**

Medium to large size enclosures manufactured using impact resistant polycarbonate.
Available with one or more flange openings. The flange openings allow modular assembly of several enclosures and the addition of various size cable glands and knockout flanges. Select from a large selection of standard flanges or request flanges machined separately to customer specifications. The EK bases feature multiple mounting pods.
A large range of accessories is available.

Base = **EKHA**

Base = **EKJB**

Base = **EKMB**

Base = **EKOE**

Base = **EKPE**

Base = **EKPK**

Base = **EKTH**

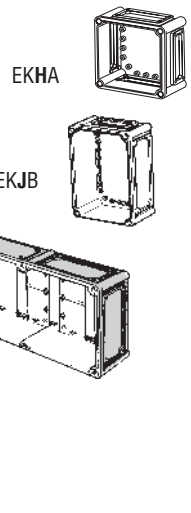
Base = **EKUH**

Base = **EKWH**

BASE

ENCLOSURE BASES

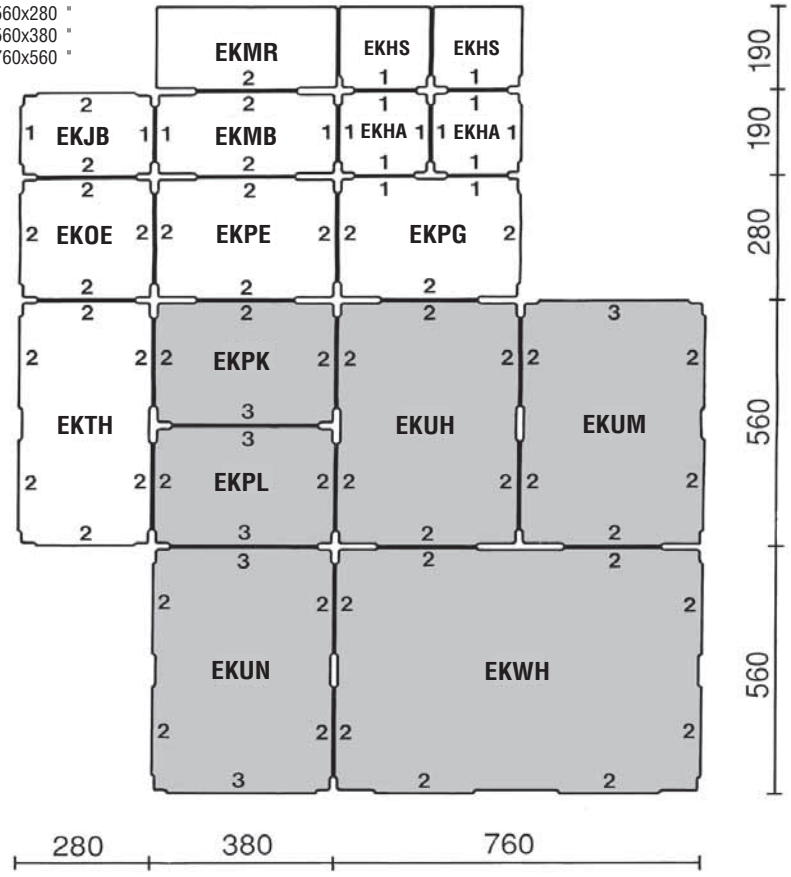
Impact-resistant, medium to large size polycarbonate enclosure with a high protection rating (IP 67). Pre-pressed flange panels can accept a variety of flange plates from the EK accessory range.



ORDER SYMBOL	SIZE mm
EK**H**A	190x190x100
EK**H**S	190x190x100
EK**J**B	280x190x100
EK**M**B	380x190x100
EK**M**R	380x190x100
EK**O**E	280x280x100
EK**P**E	380x280x100
EK**P**G	380x280x100
EK**P**K	380x280x150
EK**P**L	380x280x150
EK**T**H	560x280x100
EK**U**H	560x380x150
EK**U**M	560x380x150
EK**U**N	560x380x150
EK**W**H	760x560x150

THE THIRD LETTER OF THE ORDER SYMBOL INDICATES THE SIZE OF THE ENCLOSURE:
For example the letter J in the order symbol EKJB stands for the size 280x190 mm

H = 190x190 mm
J = 280x190 "
M = 380x190 "
O = 280x280 "
P = 380x280 "
T = 560x280 "
U = 560x380 "
W = 760x560 "

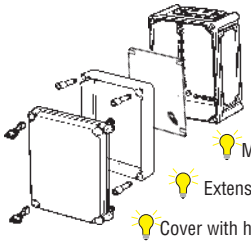


The bases marked with the grey colour have a depth of 150 mm, the others are 100 mm. The number on the bases indicates the size of the flange plate.

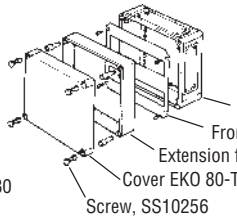
BASE

EXAMPLE OF THE ASSEMBLY OF ONE ENCLOSURE

THE SIZE OF THE WHOLE ENCLOSURE ACCORDING TO THE LETTER:
The enclosure sized (280x190x230) can be assembled as follows:



Base, EKJB 280x190x100
Mounting plate, EKJVT 238x148
Extension frame, EKJZR 280x190x50
Cover with hinges, EKJ30-G-2FSH 280x190x80



The order symbol indicates the size (FP 12x2-2828) or the toolnumber (SS 10256) of some products

Base, EKOE 280x280x100
Front plate, FP 12x2-2828
Extension frame, EKOZR
Cover EKO 80-T 280x280x80
Screw, SS10256

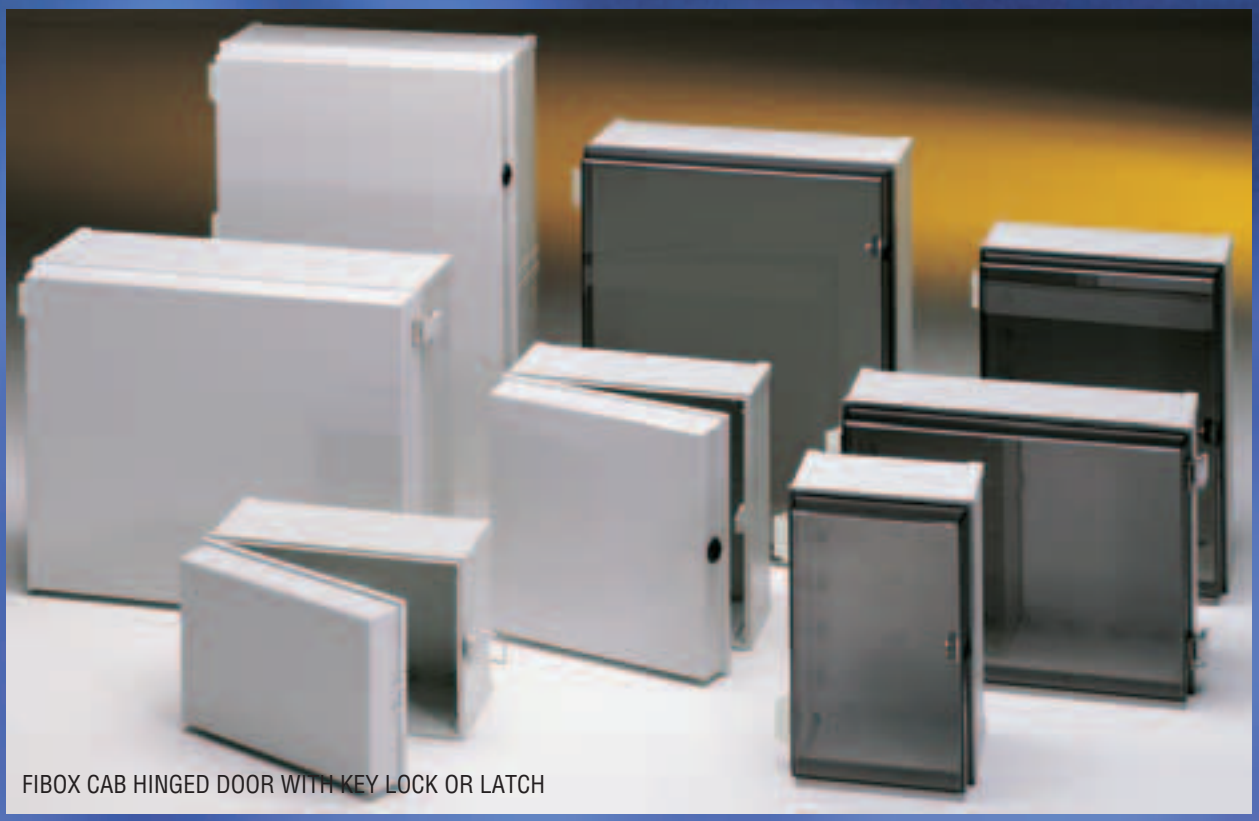
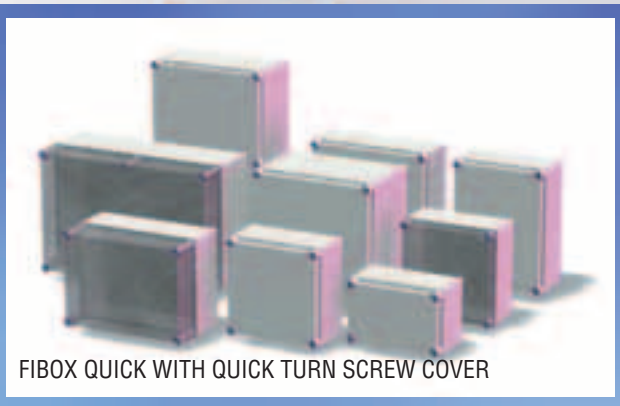
FIBOX
CAB QUICK



FIBOX CAB HINGED DOOR WITH KEY LOCK OR LATCH

FIBOX SPACE LINK



FIBOX QUICK WITH QUICK TURN SCREW COVER

FIBOX CAB PC/ABS wall mounting cabinets are manufactured using high impact resistant polycarbonate or ABS material, withstanding harsh, hostile industrial environments. The FIBOX QUICK lock system allows easy access to the enclosure, while still ensuring tight sealing. The enclosure is rated EN 60529 IP66/IP67.
The cabinet base features numerous internal mounting pods, allowing ease in component assembly and installation.
FIBOX CAB PC/ABS (hinged one), FIBOX QUICK PC/ABS (screw cover).Transparent "smoked grey" cover options allows easy viewing of installed control equipment and indicators.

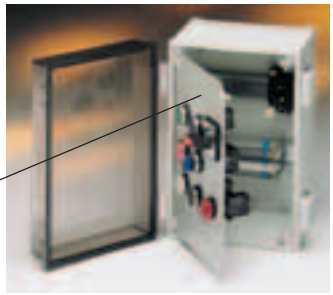
POLYCARBONATE AND ABS CABINETS WITH KEY LOCKS OR WITH LATCHES



POLYCARBONATE AND ABS

CAB PC / ABS enclosures feature innovative design and unique latch and locking options. Optional smoked transparent covers provide excellent visibility plus UV protection for internal components.

SWING DOOR

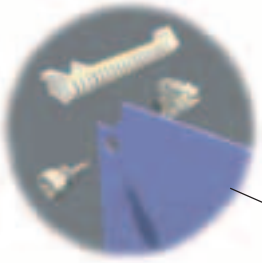
Pat.Reg. 400865

WALL FASTENING FEET

Wall mounting is achieved directly through the enclosure or by using optional wall mounting feet for hanging the enclosure.

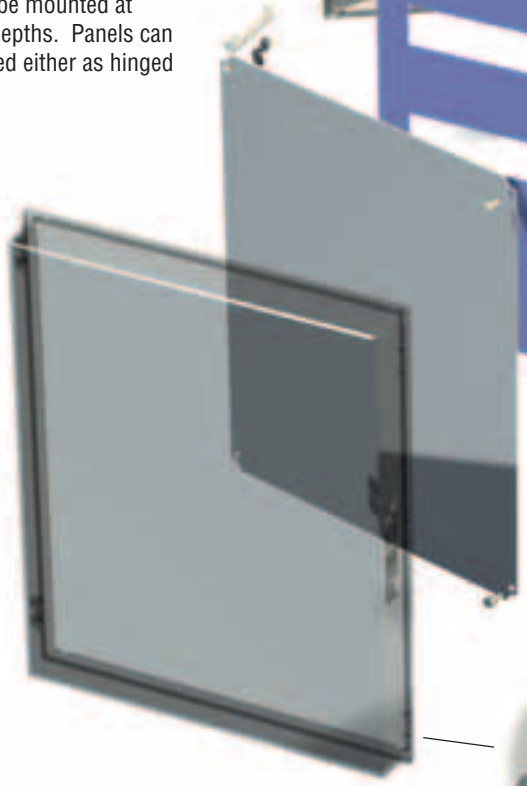
HINGED INNER PANEL (SWING DOOR)

For instrumentation mounting, aluminium inner panels can be hinged right or left. Panels swing a full 90 degrees permitting total access to components mounted inside the cabinet.



ADJUSTABLE DEPTH

Unique brackets allow inner panels to be mounted at different depths. Panels can be mounted either as hinged or fixed.



MOUNTING FRAMES

PADLOCKABLE LATCH

Enclosures are available hinged either on the long or short side. Quick release latches feature a built-in provision for padlocking.

KEY LOCK

CAB enclosures are available with a 1/4 turn DIN lock supplied with a standard 3mm double bit plastic key.

FIBOX QUICK – QUICK TURN COVER SCREW

HINGED INNER PANEL (SWING DOOR)

For instrumentation mounting, aluminium and insulated plastic inner panels can be hinged right or left. Panels swing a full 90 degrees permitting total access to components mounted inside the cabinet.

ADJUSTABLE DEPTH

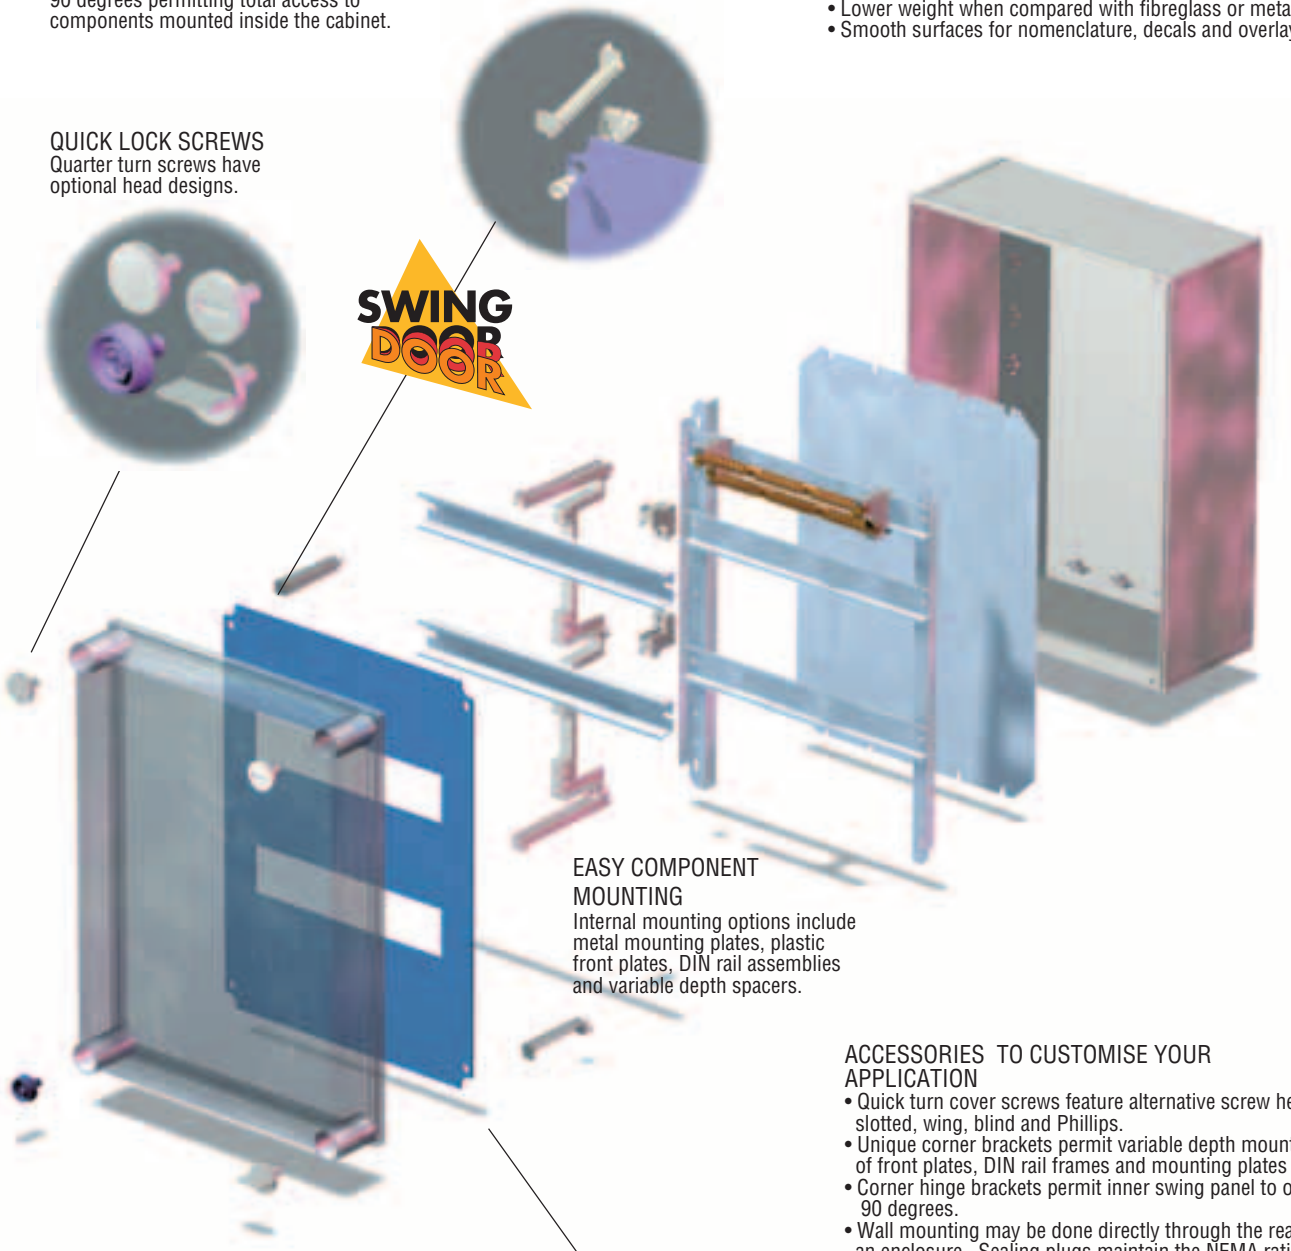
Unique brackets allow panels to be mounted at different depths. Panels can be mounted either as hinged or fixed.

NEW DESIGN WITH STYLE

- Increased wall thickness adds strength and rigidity
- Smoked grey transparent cover provides excellent component visibility
- More flexibility in component mounting with large number of mounting pods
- Lower weight when compared with fibreglass or metal
- Smooth surfaces for nomenclature, decals and overlays

QUICK LOCK SCREWS

Quarter turn screws have optional head designs.



EASY COMPONENT MOUNTING

Internal mounting options include metal mounting plates, plastic front plates, DIN rail assemblies and variable depth spacers.

ACCESSORIES TO CUSTOMISE YOUR APPLICATION

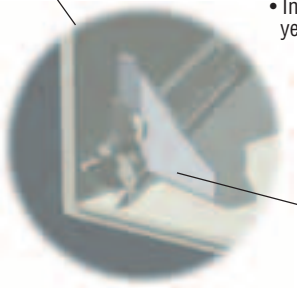
- Quick turn cover screws feature alternative screw heads: slotted, wing, blind and Phillips.
- Unique corner brackets permit variable depth mounting of front plates, DIN rail frames and mounting plates
- Corner hinge brackets permit inner swing panel to open 90 degrees.
- Wall mounting may be done directly through the rear of an enclosure. Sealing plugs maintain the NEMA rating. Alternatively, optional wall mounting feet may be added using the brass mounting inserts on the rear of the enclosure.
- Inspection windows provide access to components, yet maintain IP ratings.

SPACE AND MORE SPACE

Unique corner pod design leaves maximum mounting space without limiting accessories.

Moulded in place, perimeter gasket allows full enclosure base opening (no door return to reduce opening.)

Depth increase with enclosure size. Two optional 100mm high covers increase overall usable depth.



Pat.Reg. 400865

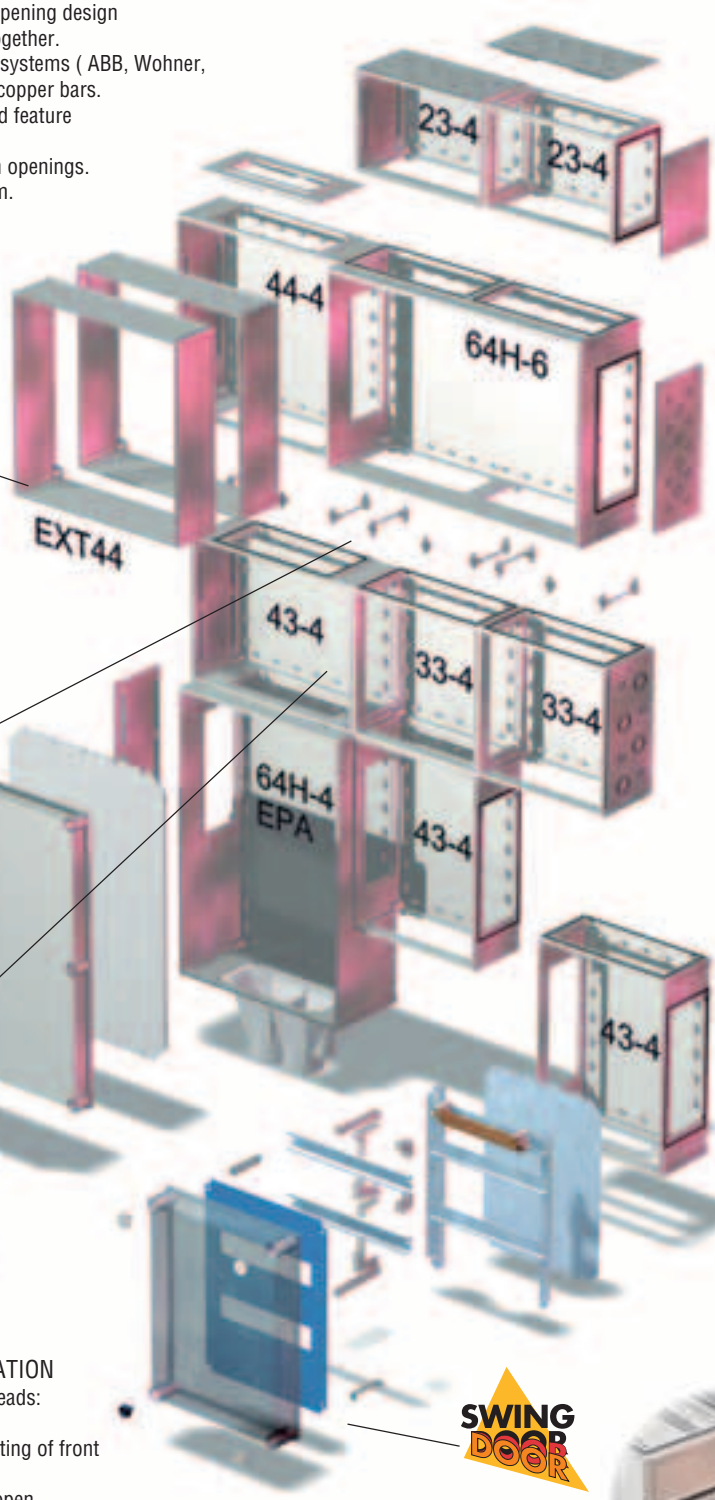
FIBOX SPACE LINK - LARGE FLANGE OPENINGS FOR EASY ASSEMBLY

COMPREHENSIVE ASSEMBLY SYSTEM

- New quick-link system plus a more rugged flange opening design making it easier to connect enclosure assemblies together.
- Flange support system works with popular bus bar systems (ABB, Wohner, Weber, etc.) designed for 5 x 20 and 10 x 30 mm copper bars.
- New DIN rail frames ease DIN module mounting and feature front plate corner brackets.
- Inspection windows with standard DIN 17.5/45 mm openings. New sizes include 377 x 331 mm and 331 x 277 mm.

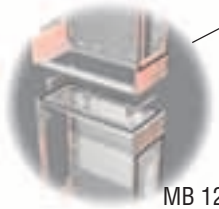
EXTENSION FRAMES

Available in 400 x 400 mm and when stacked create additional depth in 100mm increments., for example, 170mm, 270mm, 370mm, etc.



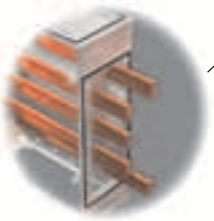
QUICK-LINK SYSTEM

Assembly of the enclosures faster than ever.



MB 12287F3 set

60 MM BUS-BAR SYSTEM



Pat.Reg. 400865

ACCESSORIES TO CUSTOMIZE YOUR APPLICATION

- Quick turn cover screws feature alternative screw heads: slotted, wing, blind and Phillips.
- Unique corner brackets permit variable depth mounting of front plates, DIN rail frames and mounting plates
- Corner hinge brackets permit inner swing panel to open 90 degrees.
- Wall mounting may be done directly through rear of enclosure. Sealing plugs maintain the NEMA rating. Alternatively, optional wall mounting feet may be added using the brass mounting inserts on the rear of the enclosure.
- Inspection widows provide access to components, while maintaining NEMA ratings.
- Hinges, spacers, ventilators, etc.
- Flange plates with knockouts or blank.
- Variety of cable glands, strain relief and conduit fittings.

MOUNTING RAILS AND PLATES

Internal mounting options include metal mounting panels, blue polycarbonate front plates, DIN rail assemblies with variable depth spacers.

SNAP-IN SYSTEM

Fastest way to assemble the flanges.

FRONT PLATE FRAME

A new generation of FIBOX CARDMASTER enclosures, featuring improved design and colours, is available in polycarbonate and ABS. Designed for use with modular components, the FIBOX CARDMASTER 3 range is ideal for packaging instrumentation, measurement, monitoring and process control equipment.
The enclosure has built in PCB card guides and a separate terminal wiring compartment.
Hinged transparent covers have quick release latches.
All sizes available in either impact resistant polycarbonate or ABS.
New accessory front plate frame also available.

EX CERTIFICATION OF ENCLOSURES

Fibox EX enclosures are made for use in hazardous areas. They are designed, tested and manufactured to international standards. The certificates are issued by the manufacturer under licence from a test authority. All certified products are labelled clearly in compliance with the certification.

An enclosure with Component Certification will achieve the specified degree of safety in use when selected, assembled and installed correctly. The Component Certification establishes the acceptability of the empty enclosure for use as a component part of equipment which is certified by a Certificate of Conformity. Only equipment with a Certificate of Conformity should be installed in hazardous areas.

Hazardous areas are referred to as they are classified under CENELEC European Norms:

Zone 0 = Zone in which an explosive gas/air mixture is continuously present or present for long periods.

Zone 1 = Zone in which an explosive gas/air mixture is likely to occur in normal operation.

Zone 2 = Zone in which an explosive gas/air mixture is not likely to occur in normal operation and if arises, will only last for a short period.

EXPLANATION OF CERTIFICATE SYMBOLS

The following tables can be used as practical quick guides. For more detailed information please contact your local Fibox representative.

The different EX protection types specified are:

Protection typ	Symbol	Test Standard
Increased safety	e	EN 50019
Non-sparking	n	-
Flameproof	d	EN 50018
Intrinsically safe	i	EN 50020
Special protection	s	-
Encapsulation	m	EN 50028
Oil immersion	o	EN 50015
Pressurisation	p	EN 50016
Sand or powder filled	q	EN 50017

Classification of gas groups to IEC standards:

Gas Group	Representative Gas
I	Methane
II A	Prophane
II B	Ethylene
II C	Acetylene and Hydrogen

Temperature classification to EN standards of the maximum surface temperature allowed for any part of an apparatus:

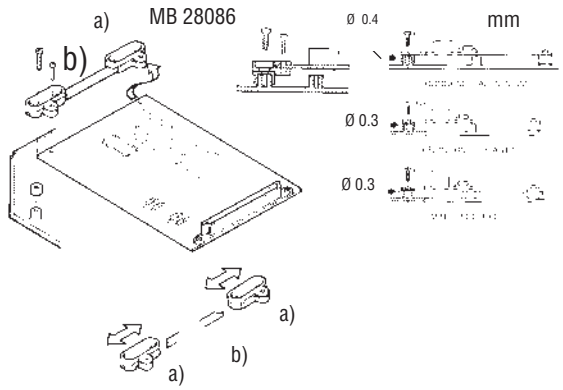
Temperature Class	Max. Surface Temperature
T1	450 °C
T2	300 °C
T3	200 °C
T4	135 °C
T5	100 °C
T6	85 °C

These temperature classifications are applicable only to mounted enclosures which have a Certificate of Conformity.

CIRCUIT BOARD BRACKET

Printed circuit boards and mounting plates often need special mounting supports that offer flexibility in positioning the boards across the enclosure body. Mounting supports also raise the board above the enclosure bottom, especially effective when using two sided boards. This circuit board bracket has a standard E1 (IEC 297-3, DIN 41494) Eurocard screw mounting distance of 89 mm (3.5") accepting M2,5 to M4 screws. The bracket can also be used for nonstandard boards by separating the ends of the bracket (a) from the connector bridge (b).
If the bracket is not needed, the adapter parts for each individual mounting pod size can be used only for raising the board above the enclosure base level.

CIRCUIT BOARD BRACKET			
ORDER SYMBOL	Standard Mounting Distance mm	inches	Remarks
MB 28086	89	3.5	Adapter for EURONORD, PICCOLO, MINI. Direct mount to EK, SOLID, EKI, ALX, PC-7, PEX.



CUSTOMISATION

Enclosures can be machined, painted, screen printed and preassembled to meet your customisation requirements. Fibox's service center offers complete CNC machining, hinge mounting, screen printing, assembly and much more. Our wide selection of enclosures and accessories can be customised to create a unique enclosure meeting your application requirements.

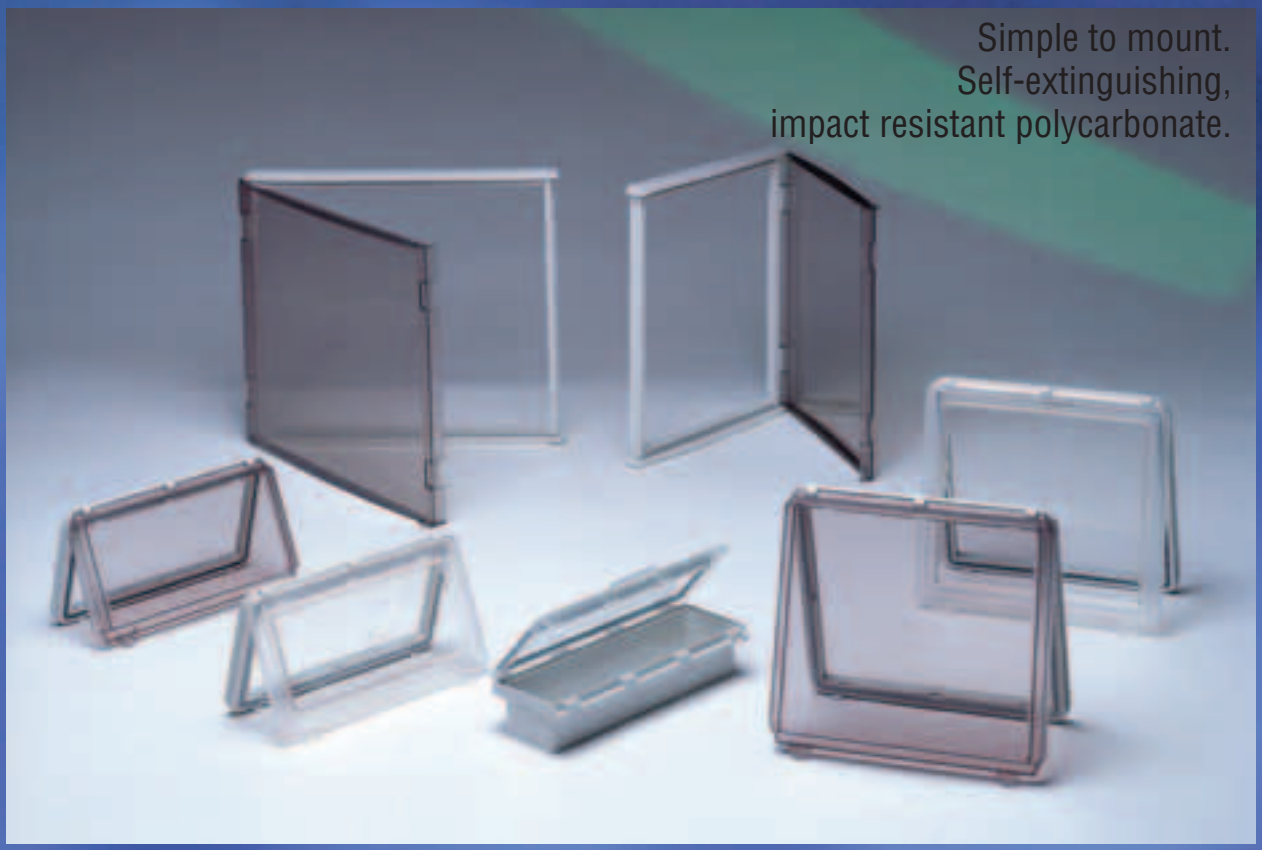
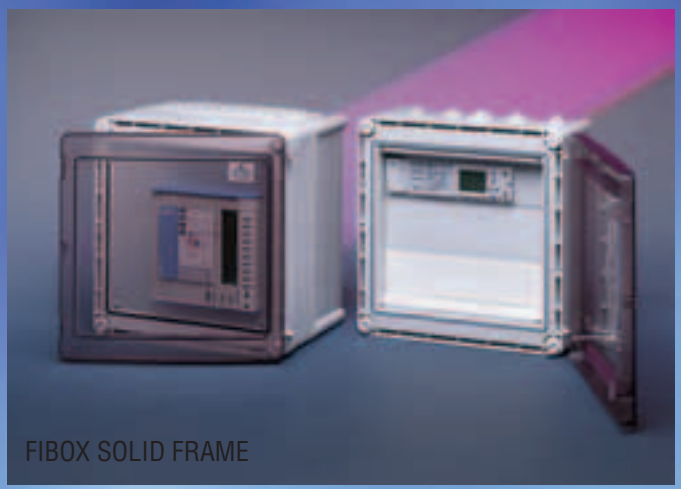
FIBOX WINDOWS





FIBOX SOLID FRAME

FIBOX Inspection Windows permit both viewing and access to IP rating and controls which are surface mounted on plastic or metal enclosures. While providing access, when cover closed, these inspection windows maintain enclosure environmental ratings up to IP 65. Four new second generation windows L12 II, L24 II, L43 II and L44 II, feature transparent smoked grey polycarbonate with textured sides and stylish design.
