ENHANCING NETWORK RELIABILITY WITH OK INDUSTRIES

Founded in 1946, OK Industries is a major force in the telecommunications and electronics industries and is a division of a large diversified multinational corporation. We are a global supplier of hand tools for the interconnection of communications networks. Our dependable products employ precision technologies for the preparation and connection of copper and fiber optic cables in applications including public and enterprise voice and data communications. Ask for OK Industries when you wish to build reliability into your networks.

WIRE WRAPPING OVERVIEW

Wire Wrapping is a method of making a wire connection by coiling the bare wire around the sharp corners of a terminal under mechanical tension. The technology was developed as an alternative to soldering, which presents various safety and reliability problems in many applications. A principal advantage of wire wrapping is that it provides a high-reliability connection that is also easily removed to correct or modify a wiring layout. Wire wrapping subjects the wire to tremendous tension and compression forces, causing the oxide layer on both wire and terminal to be crushed or sheared, resulting in a clean, oxide-free metal-to-metal contact. A standard wrap is generally used for 24 AWG and larger diameter wires; a modified wrap is typically used for 24 AWG and smaller wires, and is used almost exclusively for 28 to 30 AWG wires. In either case, the wrap style affects only the connection's mechanical stability; both styles provide suitable electrical connections.

METAL-TO-METAL CONTACT

By bending the wire around the sharp corner of the terminal, the oxide layer on both wire and terminal is crushed or sheared, and a clean, oxide-free metal-to-metal contact is obtained.

STRIP FORCE CHART

AWG	Wire Size		Min. number of turns (Bare Wire)	Min. strip force	
	Dia. inches	Dia. mm		lbs.	gms
16	.051	1.30	4	15	6800
18	.0403	1.00	4	15	6800
20	.032	0.80	5	8	3600
22	.0253	0.65	5	8	3600
24	.0201	0.50	6	7	3200
26	.0159	0.40	7	6	2700
28	.0126	0.32	7	5	2200
30	.0100	0.25	7	3.3	1500

*Conforms to MIL-STD-1130B

TYPES OF WRAP

A "Regular" bit wraps the bare wire around the terminal. A "Modified" bit wraps a portion of insulation around the terminal in addition to the bare wire. This greatly increases the ability to withstand vibration.

Regular

Modified

HOW TO MAKE WIRE

WRAPPED CONNECTIONS

SOME HINTS ON MAKING WRAPPED CONNECTIONS

OVERWRAP

Do not press too hard. Let the OK tools do the work. Excessive pressure can lead to overwrapping. Backforce "BF" to prevent overwrapping is available on most power tools and is recommended for use with 26 through 30 AWG wire.

OPEN WRAP & SPIRAL WRAP

Just keep the OK tool on the terminal until the wrap is complete. Early removal can result in spiral and open wraps.

INSUFFICIENT TURNS

It's easy to feed wire into the slot in the OK bit correctly. Be sure the stripped end of the wire is "pushed-in" all the way.

PIGTAIL

Wire wrapping is a precision technique and the wrong bit and sleeve just cannot do the job. Improper selection can cause problems ranging from "Pigtails" to loose wraps.

Example: If "E"=.020". "F"=.060". The terminal diagonal is .063" as shown on chart.

PTX SERIES

ERGONOMIC WIRE WRAPPING TOOLS

The PTX Series Wire Wrapping Tools from OK Industries bring revolutionary new benefits to installers, telecom technicians and other users. With worker safety in mind, we consulted a certified ergonomist and created an ergonomic tool, which includes a lightweight, well-balanced construction, dual-finger short-throw trigger, and a long handle to mitigate pressure on the palm. These features help to prevent repetitive stresses and result in an industry-leading design from a comfort and safety standpoint. Ask for the PTX Series Wire Wrapping Tools from OK Industries — and arm your workers with the tools that offer efficiency and worker safety in your interconnect activity.

KEY FEATURES

- Ergonomic Design — Minimizes Repetitive Stress
- Rugged Construction for Field Usage
- Battery and Electric Powered Versions Available
- Wraps and Unwraps 20 to 30 AWG Wire
- Rated Maximum Usage: 2,500 cycles/day
- For Bits & Sleeves: see Page 11

ORDERING INFORMATION AND PRODUCT SPECIFICATIONS

Part No.	Description	Weight	Voltage	RPM
PTX	Battery Wrap/Unwrap Tool (Battery not included)	1.2 lb.	3.6V*	3700
PTX-1	Electric Wrap/Unwrap Tool - 115V	0.86 lb.	115V	3700
PTX-1BF	Electric Wrap/Unwrap Tool w/Backforce - 115V	0.86 lb.	115V	3700
PTX-2	Electric Wrap/Unwrap Tool - 230V	1.0 lb.	230V	4200
PTX-2BF	Electric Wrap/Unwrap Tool w/Backforce - 230V	1.0 lb.	230V	4200
PTX-KIT1	115V battery tool kit (tool, charger, (2) batteries)			
PTX-KIT2	230V battery tool kit (tool, charger, (2) batteries)			

* Powered by long-life NiMH battery

ACCESSORIES

- **PTX-B** PTX Battery, 3.6V
- **PTX-BC1** 115V Charger for PTX-B battery
- **PTX-BC2** 230V Charger for PTX-B battery
- **H-1000** Cordura Tool Pouch

MANUAL WIRE WRAPPING TOOLS & KITS

MANUAL WIRE WRAPPING TOOLS

G100/R3278INS
(Shown with Bit/Sleeve)

G200/R3278 Lexan™

G100/R3278 Aluminum

The G100/R3278 and G200/R3278 tools are designed with a chuck nose piece to make use of the full line of bits and sleeves made for power tools. The G100/R3278INS is coated with an insulative material, providing 1000V of dielectric strength across most of the housing, to help ensure worker and system safety. These tools accommodate wire sizes from 22 AWG (0.65mm) thru 32 AWG (0.20mm).

- G200/R3278 : Lexan™
- G100/R3278 : Aluminum
- G100/R3278INS : Aluminum (insulated)
- For Bits & Sleeves : see page 11

MANUAL WIRE UNWRAPPING TOOL

The combination of the G100/R3394 unwrap tool and the SU unwrap bits gives you the best tool for high speed wire unwrapping. High production, long life, low maintenance. Use Unwrap Set SU2026 for wire AWG 20 thru 26 (0.80 thru 0.40mm) and Set SU2832 for wire AWG 26 thru 32 (0.40 thru 0.20mm).

G100/R3394 Bits & Sleeves:

2832-UB	2032	SU2832	26-32	0.40-0.20	.036	0.96

G100/R3394

- G100/R3394 : Manual Wire Unwrapping Tool

TELECOM WIRE WRAP KIT

WWK-1

This is a complete kit for technicians working at a Main Distributing Frame. The G200/R3278 Manual Gun produces wire wrapped connections merely by squeezing the trigger, and works with any bit and sleeve. The versatile HW-UW-224 Hand Wrap-Unwrap Tool (22-24 AWG) does the work of two tools in one - wrapping and unwrapping - just by changing the cap from one end to the other. The ST-100 22-24 AWG wire Cut-and-Strip Tool offers easy, clean stripping of up to four wires with 15/16" - 19/16" adjustable strip off length. This kit comes complete with KB224 22-24 AWG bit, P2224 22-24 AWG sleeve and H-1000 cordura tool pouch.

- WWK-1 : Telecom Wire Wrap Kit
- H-1000 : Pouch for Manual Tools

WIRE WRAPPING BITS & SLEEVES

Fully compatible with any make or model wire wrapping tool, except G100 and G200 manual tools, which are obsolete and require special bits and sleeves.

WIRE WRAPPING EXTENSION ATTACHMENTS

■ EXT-400 : 4.0" (100mm) extension

Precision devices which attach easily to your wire wrapping tool for applications requiring extra "reach". Simply install the extension into the tool, then install the bit and sleeve into the extension. Fits all Electric and Manual wire wrapping tools. Compatible with all bits and sleeves made for Power Wire Wrapping Tools.

BITS AND INSULATED SLEEVES

The insulated sleeves are covered with a material which provides 1000V dielectric strength which helps to prevent shorting between pins and enhances worker safety.

DFB224 DUAL FUNCTION

WRAP/UNWRAP BIT & SLEEVE SET

OK INDUSTRIES INTRODUCES THE DFB224 DUAL FUNCTION BIT

This innovative product represents a truly revolutionary approach to wire wrapping, by combining both the wrap and the unwrap functions into one bit/sleeve set. The bit is precision machined for high quality wrapping in the clockwise direction, but also includes the removal mechanism that is used to unwrap when operated counterclockwise. The user can quickly and easily switch back and forth between wrap and unwrap mode by retracting or extending the retractable sleeve, and flipping the switch on a wrap/unwrap power tool (i.e., a power wire wrapping tool with reversible motor). This product, which can wrap or unwrap 22 and 24 AWG wire, enables the user to maximize operating efficiency while eliminating the need to purchase and carry extra tools or bits for unwrapping.

Part #	Description	Wire Size		Min. Terminal Diagonal		Max. Terminal Diagonal		Terminal Hole Depth		Terminal Hole Diameter		Effective Radius	
		mm	AWG	mm	in.	mm	in.	mm	in.	mm	in.	mm	in.
DFB224	Dual Function Wrap/Unwrap Bit/Sleeve Set, 22/24 AWG	.50/.65	22/24	1.37	.054	1.85	.073	25.04	1.00	1.90	.075	2.82	.111

HOW TO USE THE DFB224

The Wrap/Unwrap bit is shipped with the sleeve set in the wrap position. To change to the unwrap simply pull the sleeve out approximately 1/4" (the sleeve is spring loaded and you should feel some tension while pulling forward), rotate the sleeve in either direction 180° and release. The sleeve should now be seated approximately 1/4" lower than in the wrap position. This will expose the unwrap feature on the bit.

To change back to the wrap position pull the sleeve out approximately 1/2" and rotate the sleeve in either direction 180° and release. The spout should be in the 12:00 position and the sleeve should be locked in position.

Note: If you cannot rotate the sleeve, you need to pull the sleeve out further before trying to rotate the sleeve.

HAND WRAPPING AND UNWRAPPING TOOLS

HAND WRAPPING TOOLS

These Hand Wrapping Tools are carefully designed to produce perfect wire wrapped connections. Precision, long-lasting tools for use where occasional wraps are required or where power wire-wrapping tools are not practical. Compact and convenient.

COPPER WIRE CUT & STRIP TOOLS

WIRE CUT-AND-STRIP TOOLS - ST-100 SERIES

A revolutionary concept for easy and clean stripping of wires for wire wrapping, electronic and appliance applications. Biomechanically designed for maximum efficiency.

Easy to operate... place wire (up to 4) in stripping slot with ends extending beyond cutter blades... press tool and pull... wire is cut and stripped to proper "wire wrapping" length. The hardened steel cutting blades and sturdy construction of the tool ensure long life. Strip length easily adjustable for your application.

Part No.	Wire Size		Adjustable Strip-Off Length	
	AWG	mm	Inches	mm
ST-100	22-24	0.65-0.50	1-5/16" to 1-9/16"	33.33 to 39.68
ST-100-24	24	0.50	1-5/16" to 1-5/16"	33.33 to 39.68

ST-100-30	30	0.25	7/8" to 1-1/8"	22.22 to 28.57

ST-100-30

- Replacement Blade/Blade Supports
- Weight: 5.1 o.z (144.6 gms)
- Length: 6.75" (171.5 mm)

BLADE AND BLADE SUPPORT REPLACEMENTS: ST-100 SERIES AND OK-3907 SERIES

Replacement blades are interchangeable between ST-100 series and OK-3907 wire-stripping tools. These fine blades are made from specially tempered spring steel. The stripping slot is carefully centered within the blade to ensure clean, no nick stripping. The replacement blade support sections are made of heat treated plated steel. They are designed to accurately center the slots of the stripping blade, making possible clean, nick-free wire stripping. Easy replacement.

ADJUSTABLE PRECISION WIRE STRIPPERS OK-3907 SERIES

The OK-3907 Series from OK Industries is the industry's leading cut-and-strip tool for copper interconnect applications. Installers and telecom technicians enjoy its rugged construction, comfortable rubber grips, and high-leverage handle design, which allows time savings through the simultaneous cutting of multiple wires. The OK-3907-26 applies to 26-gauge wire. Replacement cutting blades and blade supports are also available.
