## ● Part Numbering (The structure of the "Global Part Numbers" that have been adopted since June 2001 and the meaning of each code are described herein.) If you have any questions about details, inquire at your usual Murata sales office or distributor.

### Monolithic Ceramic Capacitors (lead type)

(Global Part Number) 

|    |   |    |    |     |   |   |    |     |   |
|----|---|----|----|-----|---|---|----|-----|---|
| RP | E | R1 | 1H | 104 | K | 2 | M1 | A01 | A |
|----|---|----|----|-----|---|---|----|-----|---|

|   |   |   |   |   |   |   |   |   |   |
|---|---|---|---|---|---|---|---|---|---|
| ① | ② | ③ | ④ | ⑤ | ⑥ | ⑦ | ⑧ | ⑨ | ⑩ |
|---|---|---|---|---|---|---|---|---|---|

#### ① Product ID

#### ② Series/Terminal

| Product ID | Series/Terminal |   |
|------------|-----------------|---|
| RP         | E               | Monolithic Ceramic Capacitors Lead Type |

#### ③ Temperature Characteristics

| Code | Temperature Characteristics | Temperature Range | Capacitance Change or Temperature Coefficient | Operating Temperature Range |
|------|-----------------------------|-------------------|---|-----------------------------|
| 5C   | C0G                         | -55 to 125°C      | 0±30ppm/°C                                    | -55 to 125°C                |
| 6R   | R2H                         | -55 to 85°C       | -220±60ppm/°C                                 | -55 to 125°C                |
| 7U   | U2J                         | -55 to 85°C       | -750±120ppm/°C                                | -55 to 125°C                |
| E4   | Z5U                         | 10 to 85°C        | +22, -56%                                     | 10 to 85°C                  |
| F5   | Y5V                         | -30 to 85°C       | +22, -82%                                     | -30 to 85°C                 |
| R7   | X7R                         | -55 to 125°C      | ±15%  | -55 to 125°C                |

#### ④ Rated Voltage

| Code | Rated Voltage |
|------|---------------|
| 1E   | DC25V         |
| 1H   | DC50V         |
| 2A   | DC100V        |
| 2D   | DC200V        |

#### ⑤ Capacitance

Expressed by three figures. The unit is pico-farad(pF). The first and second figures are significant digits, and the third figure expresses the number of zeros which follow the two numbers. If there is a decimal point, it is expressed by the capital letter "R". In this case, all figures are significant digits.

#### ⑥ Lead Type

| Code | Lead Type          | Lead Space       |
|------|--------------------|------------------|
| A*   | Straight Long Bulk | F=2.5mm          |
| B*   | Straight Long Bulk | F=5.0mm          |
| C*   | Straight Long Bulk | other than above |
| E*   | Straight Taping    | F=5.0mm          |
| K*   | Incrimp Bulk       | F=5.0mm          |
| M*   | Incrimp Taping     | F=5.0mm          |
| P*   | Outcrimp Bulk      | F=2.5mm          |
| S*   | Outcrimp Taping    | F=2.5mm          |

Lead style depends on individual standards. \* indicates a figure.

Continued on the following page.

#### ⑥ Capacitance Tolerance

| Code | Capacitance Tolerance | Temperature Characteristics | Capacitance Step    |
|------|-----------------------|-----------------------------|---------------------|
| C    | ±0.25pF               | C0G, R2H, U2J               | ≤5pF : 1pF Step     |
| D    | ±0.5pF                |                             | 6 to 9pF : 1pF Step |
| J    | ±5%                   |                             | ≥10 : E12 Series    |
| K    | ±10%                  | X7R                         | E6 Series           |
| M    | ±20%                  | Z5U                         | E3 Series           |
| Z    | +80%, -20%            | Y5V                         | E3 Series           |

#### ⑦ Size

| Code | Size         |
|------|--------------|
| 1    | 3.5×3.0 mm   |
| 2    | 5.0×3.5 mm   |
| 3    | 5.0×4.5 mm   |
| 4    | 7.5×5.0 mm   |
| 5    | 7.5×7.5 mm   |
| 6    | 10.0×10.0 mm |
| 7    | 12.5×12.5 mm |

Continued from the preceding page.

⑨ Individual Specification Code

| Individual Specification Code | Series (size)              | Temperature Characteristics Type | Individual Specification   | Inner Electrode |
|-------------------------------|----------------------------|----------------------------------|--|-----------------|
| <b>A01</b>                    | <b>RPE_2</b> (5.0x3.5mm)   | HiK                              | Standard Type (small internal chip size of 2.0x1.25mm)                               | Base Metal      |
| <b>B01</b>                    | <b>RPE_2</b> (5.0x3.5mm)   | HiK                              | Standard Type (small internal chip size of 2.0x1.25mm)                               | Precious Metal  |
| <b>C02</b>                    | <b>RPE_1</b> (3.5x3.0mm)   | HiK                              | Standard Type (Steel lead wire)  | Base Metal      |
| <b>C03</b>                    | <b>RPE_2</b> (5.0x3.5mm)   | HiK                              | Standard Type  | Base Metal      |
|                               | <b>RPE_3</b> (5.0x4.5mm)   |                                  |  |                 |
| <b>D02</b>                    | <b>RPE_1</b> (3.5x3.0mm)   | HiK                              | Standard Type (Steel lead wire)  | Precious Metal  |
| <b>D03</b>                    | <b>RPE_1</b> (3.5x3.0mm)   | TC/HiK                           | Standard Type  | Precious Metal  |
|                               | <b>RPE_2</b> (5.0x3.5mm)   |                                  |  |                 |
|                               | <b>RPE_3</b> (5.0x4.5mm)   |                                  |  |                 |
| <b>E12</b>                    | <b>RPE_4</b> (7.5x5.0mm)   | HiK                              | Special Dimension Type (Special size of internal chip)                               | Base Metal      |
| <b>F03</b>                    | <b>RPE_4</b> (7.5x5.0mm)   | TC/HiK                           | Standard Type (Special size of internal chip)  | Precious Metal  |
|                               | <b>RPE_5</b> (7.5x7.5mm)   |                                  |  |                 |
|                               | <b>RPE_6</b> (10.0x10.0mm) |                                  |  |                 |

# Monolithic Ceramic Capacitors

**muRata**

## Monolithic Ceramic Capacitors Lead Type

### ■ Features

1. The RPE series capacitors have small dimensions, large capacitance, and a capacity volume ratio of 10 micro F/cm cube, close to that of electrolytic capacitors. These do not have polarity.
2. These have excellent frequency characteristics and due to these small internal inductance are suitable for high frequencies.
3. These are not coated with wax so there is no change in their exterior appearance due to the outflow of wax during soldering or solvent during cleansing.
4. These are highly inflammable, having characteristics equivalent to the UL-94V-0 standard.

## ■ Dimensions

| Series   | Dimensions (mm) |      |     |                        |      |     |
|----------|-----------------|------|-----|------------------------|------|-----|
|          | L               | W    | W1  | T                      | F    | d   |
| RPE_1    | 3.5             | 3.0  | -   | 2.5                    | 2.5  | 0.4 |
| RPE_2P/S | 5.0             | 3.5  | 5.0 | See<br>rating<br>table | 2.5  | 0.5 |
| RPE_2K/M | 5.0             | 3.5  | 5.0 |                        | 5.0  | 0.5 |
| RPE_3P/S | 5.0             | 4.5  | 6.3 |                        | 2.5  | 0.5 |
| RPE_3K/M | 5.0             | 4.5  | 6.3 |                        | 5.0  | 0.5 |
| RPE_4    | 7.5             | 5.0  | 7.0 |                        | 5.0  | 0.5 |
| RPE_5    | 7.5             | 7.5  | -   | 4.0                    | 5.0  | 0.5 |
| RPE_6    | 10.0            | 10.0 | -   | 4.0                    | 5.0  | 0.5 |
| RPE_7    | 12.5            | 12.5 | -   | 5.0                    | 10.0 | 0.5 |
| RPE_T    | 10.0            | 8.5  | -   | 4.0                    | 5.0  | 0.5 |

## ■ Marking

| Manufacture's Identification *1       | Symbol Code (except RPE_1 series)                      |
|---------------------------------------|--|
| <b>Nominal Capacitance</b>            | Less than 100pF : Actual numbers                       |
|                                       | 100pF and over : 3 digit numbers                       |
| <b>Capacitance Tolerance *1</b>       | Symbol marking   |
| <b>DC Rated Voltage *1</b>            | Symbol marking (except RPE R7/E4/F5_1 type)            |
|                                       | Ex. 50V : 5<br>100V : 1<br>200V : 6                    |
| <b>Temperature Characteristics *1</b> | Symbol marking (except RPE R7/E4/F6_1 type)            |
|                                       | Ex. 5C : A, R7 : C<br>6R : R, E4 : E<br>7U : U, F6 : F |

### • Marking Example

| No. | Item                            | Specification  |  | Test Method  |
|-----|---------------------------------|--|--|--|
|     |                                 | Temperature Compensating Type  | High Dielectric Constant Type  |  |
| 10  | Terminal Strength               | Tensile Strength   | Termination not to be broken or loosened.  | As in the figure, fix the capacitor body, apply the force gradually to each lead in the radial direction of the capacitor until reaching 10N* and then keep applied the force for 10±1 seconds.<br><br>* 5N for L3.5×W3.0 (mm)  |
|     |                                 | Bending Strength   | Termination not to be broken or loosened.  | Each lead wire shall be subjected to a force of 2.5N and then be bent 90° at the point of egress in one direction. Each wire is then returned to the original position and bent 90° in the opposite direction at the rate of one bend per 2-3 seconds.   |
| 11  | Vibration Resistance            | Appearance   | No defects or abnormalities.   | The capacitor is soldered securely to a supporting terminal and a 10 to 55Hz vibration of 1.5mm peak-peak amplitude is applied for six hours total, 2 hours in each mutually perpendicular direction. Allow 1 minute to cycle the frequency from 10Hz to 55Hz and the converse.  |
|     |                                 | Capacitance  | Within the specified tolerance.  |  |
|     |                                 | Q/D.F.   | 30pF min. : $Q \geq 1000$<br>30pF max. : $Q \geq 400+20C$<br>C : Nominal capacitance (pF)<br>X7R } : 0.025 max.<br>Z5U }<br>Y5V } : 0.05 max.  |  |
| 12  | Solderability of Leads          | Solder is deposited on unintermittently immersed portion in axial direction covering 3/4 or more in circumferential direction of lead wires. |  | The terminal of a capacitor is dipped into a 25 % ethanol (JIS-K-8101) solution of rosin (JIS-K-5902) and then into molten solder (JIS-H-4341, H63A) of 235±5°C for 2 seconds ±0.5 seconds. In both cases the depth of dipping is up to about 1.5mm to 2mm from the terminal body.   |
| 13  | Resistance to Soldering Heat    | Appearance   | No defects or abnormalities.   | The lead wire is immersed in the melted solder (JIS-H-4341, H63A) 1.5mm to 2mm from the main body at 270±5°C for 3±0.5 seconds (L3.5×W3.0 (mm) type) or 350±10°C for 3.5 seconds ±0.5 seconds (all other types). The specified items are measured after 24 hours ±2 hours (temperature compensating type) or 48 hours ±4 hours (high dielectric type).<br>• Initial measurement for high dielectric constant type.<br>The capacitors are heat treated for one hour at 150±10 °C, allowed to set at room temperature for 48 hours ±4 hours, and given an initial measurement.   |
|     |                                 | Capacitance Change   | Within ±2.5% or ±0.25pF (Whichever is larger)<br>X7R : Within ±7.5%<br>Z5U } : Within ±20%<br>Y5V }  |  |
|     |                                 | Dielectric Strength (Between Terminals)  | No defects.  |  |
| 14  | Temperature and Immersion Cycle | Appearance   | No defects or abnormalities.   | First, repeat the following temperature/time cycle five times :<br>lowest operating temperature ±3°C/30±3 minutes<br>» ordinary temperature/3 minutes max.<br>» highest operating temperature ±3°C/30±3 minutes<br>» ordinary temperature/3 minutes max.<br>Next, repeat twice the successive cycles of immersion, each cycle consisting of immersion in a fresh water at 65±5°C for 15 minutes and immersion in a saturated aqueous solution of salt at 0±3°C for 15 minutes.<br>The capacitor is then promptly washed in running water, dried with a drying cloth, and allowed to sit at room temperature for 24 hours ±2 hours (temperature compensating type) or 48 hours ±4 hours (high dielectric type).<br>• Initial measurement for high dielectric constant type.<br>The capacitors are heat treated for one hour at 150±10 °C, allowed to sit at room temperature for 48 hours ±4 hours, and given an initial measurement. |
|     |                                 | Capacitance Change   | Within ±5% or ±0.5pF (Whichever is larger)<br>X7R : Within ±12.5%<br>Z5U } : Within ±30%<br>Y5V }  |  |
|     |                                 | Q/D.F.   | 30pF min. : $Q \geq 350$<br>10pF to 30pF : $Q \geq 275 + \frac{C}{10}$<br>10pF max. : $Q \geq 200+10C$<br>C : Nominal capacitance (pF)<br>X7R : 0.05 max.<br>Z5U } : 0.075 max.<br>Y5V } |  |
|     |                                 | Insulation Resistance  | 10000MΩ or 500Ω • F min. (Whichever is smaller)<br>X7R : 10000MΩ or 500Ω • F min. (Whichever is smaller)<br>Z5U } : 1000MΩ or 50Ω • F min. (Whichever is smaller)<br>Y5V }               |  |
|     |                                 | Dielectric Strength (Between Terminals)  | No defects or abnormalities.   |  |

## Packaging

### ■ PACKAGING

Two types of packaging for epoxy coated monolithic ceramic capacitors are available.

#### 1. BULK PAGING

Minimum quantity \*

| Size code | Dimensions (LxW) | Minimum quantity (pcs./bag) |
|-----------|------------------|-----------------------------|
| 1         | 3.5x3.0          | 500                         |
| 2         | 5.0x3.5          |                             |
| 3         | 5.0x4.5          |                             |
| 4         | 7.5x5.0          |                             |
| 5         | 7.5x7.5          |                             |
| 6         | 10.0x10.0        |                             |
| 7         | 12.5x12.5        | 100                         |

Please order with an integral multiple of the minimum quantity above.

#### 2. TAPE CARRIER PACKAGING

##### (1) Dimensions of Ammo Pack

##### (2) Minimum quantity \*

| Minimum quantity   |                  |                                   |
|--------------------|------------------|-----------------------------------|
| Size and Lead code | Dimensions (LxW) | Minimum quantity (pcs./Ammo Pack) |
| 2S□                | 5.0x3.5          | 2000                              |
| 2M□                |                  |                                   |
| 3S□                | 5.0x4.5          |                                   |
| 3M□                |                  |                                   |
| 4M□                | 7.5x5.0          |                                   |
| 5E□                | 7.5x7.5          |                                   |
| 6E□                | 10.0x10.0        | 1500                              |

Please order with an integral multiple of the minimum quantity above.

##### (3) Marking on Ammo Pack

The following items are in the marking position on the side of the ammo pack.

- (1) Part Number
- (2) Quantity
- (3) Inspection No.
- (4) Manufacturer's name, or its abbreviation.
- (5) Other requirements.

\* "Minimum Quantity" means the numbers of units of each delivery or order. The quantity should be an integral multiple of the "minimum quantity". (Please note that the actual delivery quantity in a package may change sometimes.)

##### (4) Incidental condition of taping

###### (4)-1 Tape splicing

- If carrier tape has been cut :

- If hold down tape has been cut :

- If both hold down tape and base tape have been cut :

Continued on the following page. ↗

## Packaging

Continued from the preceding page.

### (5) Taping dimensions

#### Inside Crimp Type Taping

| Size and Lead code | Dimensions (LxW) |
|--------------------|------------------|
| 2M1                | 5.0x3.5          |
| 2M2                |                  |
| 3M1                | 5.0x4.5          |
| 3M2                |                  |
| 4M1                | 7.5x5.0          |
| 4M2                |                  |

#### Straight Type Taping

| Size and Lead code | Dimensions (LxW) |
|--------------------|------------------|
| 5E1                | 7.5x7.5          |
| 5E2                |                  |
| 6E1                | 10.0x10.0        |
| 6E2                |                  |

#### Outside Crimp Type Taping

| Size and Lead code | Dimensions (LxW) |
|--------------------|------------------|
| 2S1                | 5.0x3.5          |
| 2S2                |                  |
| 3S1                | 5.0x4.5          |
| 3S2                |                  |

| Item   | Code            | Dimensions (mm)                               |
|--|-----------------|---|
| Pitch of Component                               | P               | 12.7  |
| Pitch of Sprocket Hole                           | P <sub>0</sub>  | 12.7±0.2                                      |
| Lead Spacing                                     | F <sub>1</sub>  | 2.5 <sup>+0.4</sup> <sub>-0.2</sub>           |
|  | F               | 5.0 <sup>+0.6</sup> <sub>-0.2</sub>           |
| Length from Hole Center to Component Center      | P <sub>2</sub>  | 6.35±1.3                                      |
| Length from Hole Center to Lead                  | P <sub>1</sub>  | 3.85±0.7                                      |
|  | P <sub>1</sub>  | 5.1±0.7 (S1) (S2)                             |
|  |                 | 254±1.5 Total length of components pitch X 20 |

(in mm)

## Notice

### ■ Notice (Soldering and Mounting)

#### 1. Allowable Conditions for Soldering Temperature and Time

Perform soldering within tolerance range (shaded portion).

#### 2. Insertion of the Lead Wire

- (1) When soldering, insert the lead wire into the PCB without mechanically stressing the lead wire.
- (2) Insert the lead wire into the PCB with a distance appropriate to the lead space.

**⚠Note:**

**1. Export Control**

〈For customers outside Japan〉

Murata products should not be used or sold for use in the development, production, stockpiling or utilization of any conventional weapons or mass-destructive weapons (nuclear weapons, chemical or biological weapons, or missiles), or any other weapons.

〈For customers in Japan〉

For products which are controlled items subject to the "Foreign Exchange and Foreign Trade Law" of Japan, the export license specified by the law is required for export.

**2. Please contact our sales representatives or product engineers before using our products listed in this catalog for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property, or when intending to use one of our products for other applications than specified in this catalog.**

- |                             |   |
|-----------------------------|---|
| ① Aircraft equipment        | ② Aerospace equipment   |
| ③ Undersea equipment        | ④ Power plant equipment   |
| ⑤ Medical equipment         | ⑥ Transportation equipment (vehicles, trains, ships, etc.)  |
| ⑦ Traffic signal equipment  | ⑧ Disaster prevention / crime prevention equipment  |
| ⑨ Data-processing equipment | ⑩ Application of similar complexity and/or reliability requirements to the applications listed in the above |

**3. Product specifications in this catalog are as of July 2002. They are subject to change or our products in it may be discontinued without advance notice. Please check with our sales representatives or product engineers before ordering. If there are any questions, please contact our sales representatives or product engineers.**

**4. Please read rating and ⚠CAUTION (for storage and operating, rating, soldering and mounting, handling) in this catalog to prevent smoking and/or burning, etc.**

**5. This catalog has only typical specifications because there is no space for detailed specifications. Therefore, please approve our product specification or transact the approval sheet for product specification before ordering.**

**6. Please read CAUTION and Notice in this catalog for safety. This catalog has only typical specifications. Therefore you are requested to approve our product specification or to transact the approval sheet for product specification, before ordering.**

**7. Please note that unless otherwise specified, we shall assume no responsibility whatsoever for any conflict or dispute that may occur in connection with the effect of our and/or third party's intellectual property rights and other related rights in consideration of your using our products and/or information described or contained in our catalogs. In this connection, no representation shall be made to the effect that any third parties are authorized to use the rights mentioned above under licenses without our consent.**

**8. No ozone depleting substances (ODS) under the Montreal Protocol are used in our manufacturing process.**
