

BCV 12-15 Start

Automatic car charger with "Start " function for 12 V lead acid batteries.

- > Automatic-charger with Start-function for 12 V Lead acid battery packs which is especially adapted for charging of Car Starter batteries.
- > The installed "jump-start-function" enable a jump-start of the vehicle despite empty car battery.
- > The charging current during the start support is 30A.
- > The charging current is adjustable from 15 A to 3 A, thus a charging of Lead acid or lead acidgel battery packs below 20 Ah is possible.
- > The charger is equipped with charging status- and operating mode display.
- > The 2-stage-charging according to WU-characteristics, as well as an electronic over charging protection and trickle charge grant optimum charging results.
- > The charger is short-circuit proofed.
- > 3 year warranty
