

Weller WFE 2ES Fume Extraction System

The WFE 2ES is a powerful and economic volume extraction system which will support up to 2 workstations. Ideally suited to applications involving solder baths, hot air soldering, hand soldering and gluing work, this system will safely and efficiently remove from the workplace, the increased levels of air-born pollutants produced when using lead free solder.

Key points:-

- High quality filtration system comprising:
F5 class fine dust filter.
H12 Puratex compact filter with active carbon section, guarantees filtration efficiency of 99.5%.
- Powerful brushless and maintenance free turbine (1800 Pascal) has a volume extraction capability of 220m³/h
- Low noise level of less than 55dBA
- Will support 2 workstations when fitted with optional single extraction arm kit ([0053650681](#)).

WFE 2ES Kit 230V (Part Number 0053651699) consists of:

0053650699	WFE 2ES fume extraction unit
0053637299	WFAF 50 extraction arm
0058735327	50mm x 3m extraction hose
0053637999	WFTB 50 bench mounting bracket
