Type 381LX aluminum electrolytic capacitors are similar to Type 380LX unit, but are designed to operate at a higher maximum temperature of 105°C. Compared to the 380LX types. The 381LX unit delivers four times the life at the same operating temperature or the same life while operating a full 20°C hotter. Type 381LX capacitors are supplied with specially formed snap mount leads for easy insertion into printed circuit boards. They also utilize PVC outer insulating sleeves with polarity markings and a drawn aluminum case with an integral safety vent in the top.

Operating Temperature: -40°C to 105°C up to 315 VDC, -25°C 350 VDC and up. **EIA Ripple Life:** 8000 hours @ 85°C. **Shelf Life Test:** 1000 hours @ 105°C. **DC Leakage:** ≤3 √CV µA.
