Amphenol® QWL Series Connectors are tailor made for compact, heavy duty industrial use.

The outstanding performance of this series makes it well suited for ship-board installations and ground support power distribution applications where physical strength and dependability are key requirements.

The QWL Series are a versatile, economical alternative to military qualified designs.

Equivalent MS shell sizes and insert arrangements offer compatibility with all standard cable types. MIL-C-22992 environmental connector requirements (see page 1) are used as a performance criteria base for this series to assure reliability under the most severe conditions.

The design features of this connector series provide:

- **Exceptional Service** - high strength aluminum shells with Alumilite 225* hard anodic finish and shock resistant resilient inserts.
- **Foolproof Operation** - rugged double stub coupling threads, left hand accessory threads and simple single keyway mating.
- **Versatility** - both MS and custom insert patterns available for a wide variety of multiconductor cables.

A complete line of accessories is available for use with QWL Series connectors, including cable sealing and clamp adapters, protective covers, flange gaskets and banding clamps.

* Registered trademark of Aluminum Company of America

QWL

the environmental connector

- **HIGH CURRENT CAPACITY** for power distribution network and inputs to large equipment
- **RUGGED CONSTRUCTION** dictated by the working environment, high strength aluminum shells with Alumilite 225* hard anodic finish, shock resistant resilient inserts, gaskets or “O” rings at appropriate surfaces for perfect weather tight connections.
- **SERVICEABILITY AND FOOL-PROOF OPERATION** with fast coupling, easily maintained double stub threads, left hand accessory threads and single keyway mating.
- **VERSATILITY** - both MS and custom insert patterns available to accommodate a wide variety of multi conductor cables.

| CONDITION | CONFIGURATION | DESCRIPTION | REFERENCE |
|---|---------------|---|---|
| THERMAL SHOCK | UNMATED | Five complete one hour temperature cycles of -55°C to +125°C | MIL-STD-1344 method 1003 test condition |
| MOISTURE RESISTANCE (Cable mounted connectors) | MATED | Ten complete 24 hour cycles of +25°C to +65°C temperature at 90% to 98% humidity | MIL-STD-202 method 106 |
| DURABILITY | MATED | 500 complete mating/unmating cycles | MIL-C-22992 |
| SALT SPRAY (Corrosion) | UNMATED | 48 hour exposure to atomized 5% saline solution at +35°C | MIL-STD-1344 method 1001 |
| VIBRATION | MATED | 10 to 55 Hz, .06 inch total excursion in 1 minute cycles for 6 hours 55 to 2000 Hz, 10G peak amplitude sweep | MIL-STD-1344 method 2005 |
| HIGH IMPACT | MATED | Nine hammer blows from 1, 3 and 5 feet, three each in three axes on mounting panel | MIL-STD-202 method 207 |
| FLUID IMMERSION | UNMATED | 20 hours immersion in hydraulic fluid and lubricating oil | MIL-C-22992 |
| WATER IMMERSION | MATED | 4 hours immersion at 1 atmosphere pressure differential | MIL-C-22992 |

* Registered trademark of Aluminum Company of America

QWL

how to order

QWL heavy duty cylindrical connectors are ordered by Amphenol® part number only. To illustrate the ordering procedure, part number 10-107628-5P is shown as follows:

PART NUMBER
 $\frac{10}{1} - \frac{107}{2} \frac{6}{3} \frac{28-5}{4} \frac{P}{5}$

See code below:

1. Base Number Prefix - used to define contact type and finish.

- 10- Solder type contacts, silver plated (Standard)
- 75- Crimp type contacts, silver plated
- 81- Crimp type contacts, plated .0001 gold over silver
- 82- Crimp type contacts for MIL-C-13777 cable, silver plated
- 83- Crimp type contacts for MIL-C-13777 cable, plated .0001 gold over silver
- 85- Crimp type contacts plated .00005 gold over silver

2. Base Number - QWL Series Heavy Duty Cylindrical Connector.

3. Shell Style -

- 0 designates wall mount receptacle
- 1 designates cable connecting plug
- 2 designates box mount receptacle
- 3 designates jam nut receptacle with rear accessory threads (wall mount)
- 4 designates thru bulkhead receptacle
- 6 designates straight plug
- 7 designates flange mount plug
- 9 designates jam nut receptacle (box mount)

4. Shell Size/Insert Arrangement - Amphenol® QWL connectors are available in equivalent MS shell sizes with all current MS insert arrangements as well as a large selection of special arrangements for power and signal circuits. Select the required insert arrangement number from those shown on pages 18-40.

5. Contact Type/Alternate Insert Rotations - P for pin, S for socket. When an alternate position of the connector insert is required to prevent cross mating of connectors, a different letter (other than P or S) is used. Select from the table below the Amphenol® letter which indicates both type of contact, and insert rotation desired. Refer to page 17 for alternate insert rotations.

| PIN CONTACTS | | SOCKET CONTACTS | |
|--------------|------------------|-----------------|------------------|
| MS LETTERS | AMPHENOL® LETTER | MS LETTERS | AMPHENOL® LETTER |
| P | P (normal) | S | S (normal) |
| PW | G | SW | H |
| PX | I | SX | J |
| PY | K | SY | L |
| PZ | M | SZ | N |

QWL alternate positioning

To avoid cross-plugging problems in applications requiring the use of more than one connector of the same size and arrangement, alternate rotations are available as indicated in the accompanying charts.

As shown in the diagram below, the front face of the pin insert is rotated within the shell in a clockwise direction from the normal shell key. The socket insert would be rotated counter-clockwise the same number of degrees in respect to the normal shell key.

The following insert arrangements have the same alternate insert rotations for W, X, Y and Z, which are:

| Degrees | | | |
|---------|-----|-----|-----|
| W | X | Y | Z |
| 80 | 110 | 250 | 280 |

| | | | | | |
|-------|-------|-------|-------|-------|-------|

Special contact arrangements

Requirements for more complex circuits prompted Amphenol to provide inserts not covered by the MS drawings. Illustrated here and on the following pages are insert layouts which have from one contact (high tension) to the 104 contact insert in shell size 44.

Many of these special inserts are also available in alternate keyway arrangements. Please contact Amphenol, Sidney, NY for additional information on special circuit application requirements.

QWL – accessories cabling information

The Amphenol® QWL series of electrical connectors has been designed with the problems of multi-conductor cable users in mind. Two of these problems, namely water proofing and strain relief, are solved by the radial inward compression of an internal neoprene gland in the various cable accessories shown on the following pages. For additional strain relief beyond that provided by the gland, both cable grips and bar clamps are available. Since the glands close down from .094” to .145” (depending on shell size), the optimum condition for cable users is to select a gland with an I.D. only slightly larger than the maximum O.D. of the cable. The inside diameter of the accessory housing determines the maximum diameter of the cable as shown in the tabulation below. Smaller sizes than those shown in each shell size can be accommodated by smaller compression glands.

Different cable manufacturers use different constructions and cable lays in manufacturing multi-conductor cable. The specific cabling manufacturing specification should be known by the customer in detail in order to properly figure each QWL application. This knowledge can save many individual wire crossovers in any given run of cable. Crossovers add materially to the cable diameter without a cable accessory. In those cases where diameter buildup is impossible to avoid, special cable accessories with longer barrels are available.

How to order information is covered in detail on pages 4 and 5. In selecting the base number below, care should be used, as some of the cable accessories are provided with protection cap attachment rings, while others are provided with the Kellems strain relief grip as shown. If a type or cable accommodation size is not found herein that fulfills your application, please contact Amphenol, Sidney, NY.

All dimensions for reference only.

QWL – accessories adapter, cable clamp

**10-113196-XX
adapter**

**10-749XX-()
cable clamp**

This cable clamp is designed to be used with specific QWL insert arrangements. The locations, quantity, and sizes of holes in the clamp grommet must correspond to those in the connector for an effective moisture seal without wire crossing. Contact Amphenol, Sidney, NY, for grommet availability. Example: 10-107618-4P must use 10-74918-4 clamp.

QWL – accessories

QWL

crimp contacts

Machined from copper alloy and silver-plated for maximum corrosion resistance, with a minimum millivolt drop and a maximum current carrying capacity, the size 16 and 12 socket contacts are of the closed entry design. Crimp contacts are available for all MS insert arrangements and are identified with an Amphenol® proprietary number.

MS/STANDARD CRIMP CONTACTS

| Part Number | Pin/Socket | Mating End Size | Wire Barrel Size | Allowable Wire Size | Required Wire Adapter Sleeve | Test Current** Amps |

| 10-40563 or 10-581808 | Socket | | | 2* | | 100 |

* When using wire adapter sleeve shown.

** Contact ratings as stated are test ratings only. The connector could not withstand full rated current through all contacts continuously. Please note that the electrical data given is not an establishment of electrical safety factors. This is left entirely in the designer's hands as he can best determine which peak voltage, switching surges, transients, etc. can be expected in a particular circuit.

† The 12S, 14S and 16S connectors require short contacts.

TABLE I

CONTACT ARRANGEMENT SERVICE RATING

| MS Service Rating | Recommended Operating Voltage* at Sea Level | | Effective Creepage Distance Nom. | Mechanical Spacing Nom. |
|-------------------|---|----------|----------------------------------|-------------------------|
| | DC | AC (RMS) | | |
| Inst. | 250 | 200 | 1/16 | |
| A | 700 | 500 | 1/8 | 1/16 |
| D | 1250 | 900 | 3/16 | 1/8 |
| E | 1750 | 1250 | 1/4 | 3/16 |
| B | 2450 | 1750 | 5/16 | 1/4 |
| C | 4200 | 3000 | 1 | 5/16 |

* The values listed in Table I represent operating values which include a generous safety factor. It may be necessary for some applications to exceed the operating voltages listed here. If this is necessary, designers will find Table II useful for determining the degree to which the recommended values of Table I can be exceeded.

TABLE II
ALTITUDE VOLTAGE DERATING CHART**

| MS Service Rating | Nominal Distance | | Standard Sea Level Conditions | | Pressure Altitude† 50,000 Feet | | Pressure Altitude† 70,000 Feet | |
|-------------------|------------------|----------|------------------------------------|-----------------------|------------------------------------|-----------------------|------------------------------------|-----------------------|
| | Airspace | Creepage | Minimum Flashover Voltage AC (RMS) | Test Voltage AC (RMS) | Minimum Flashover Voltage AC (RMS) | Test Voltage AC (RMS) | Minimum Flashover Voltage AC (RMS) | Test Voltage AC (RMS) |
| Inst. | 1/32 | 1/16 | 1400 | 1000 | 500 | 400 | 325 | 260 |
| A | 1/16 | 1/8 | 2800 | 2000 | 800 | 600 | 450 | 360 |
| D | 1/8 | 3/16 | 3600 | 2800 | 900 | 675 | 500 | 400 |
| E | 3/16 | 1/4 | 4500 | 3500 | 1000 | 750 | 550 | 440 |
| B | 1/4 | 5/16 | 5700 | 4500 | 1100 | 825 | 600 | 480 |
| C | 5/16 | 1 | 8500 | 7000 | 1300 | 975 | 700 | 560 |

† Not corrected for changes in density due to variations in temperature.

** No attempt has been made to recommend operating voltages. The designer must determine his own operating voltage by the application of a safety factor to the above derating chart to compensate for circuit transients, surges, etc.

QWL solder contacts

Machined copper alloy contacts in a full range of sizes, with closed entry socket design in the size 12 and 16 contacts. A heavy silver-plated finish is deposited on all MS style solder contacts for maximum corrosion resistance, maximum current carrying capacity and low millivolt drop.

MS/STANDARD SOLDER CONTACTS*

| Part Number | Pin/Socket | Mating End Size | Wire Barrel Size | Allowable Wire Size | Test Current** Amps |

QWL

application tools (crimp type)

Complete installation instructions (L-516) for Amphenol® QWL Series Connectors are available on request.

The following data includes information pertaining to the application tools which have been established for crimping, inserting and removing crimp contacts used in QWL Series Connectors.

Contact Crimping, Insertion & Removal Tools

| Crimping Tool | Positioner/ Turret | Contact Size | Contact Style | Insertion Tool | Removal Tool |
|---------------|-----------------------|--------------|---------------|----------------|-------------------------------------|
| M22520/1-01 | * | 16 | Pin & Socket | 11-7345 | 11-8250 Kit |
| M22520/1-01 | * | 12 | Pin & Socket | 11-7082 | 11-8250 Kit |
| * | * | 8 | Pin & Socket | 11-8220 | 11-8250 Kit |
| * | * | 4 | Pin & Socket | 11-7365-4† | Pin11-7370-4† Socket 11-7674-2† |
| * | * | 0 | Pin & Socket | 11-7365-5† | Pin 11-7370-5† Socket 11-7674-3† |

*Refer to tool manufacturers for appropriate crimp tools or positioner/turret.
†Tools used with Arbor press 11-7364.

QWL

thermocouple contacts

Available from Amphenol is a complete line of cylindrical connectors featuring thermocouple contact insert arrangements. The design of these contacts is such that standard shell components and resilient inserts are used in the assemblies. Thermocouple contacts are available in all arrangements which contain size 12 and 16 pins and sockets, and feature probe-proof, closed entry design for the socket contacts. MS-approved and other commercial arrangements may be ordered with thermocouple contacts substituted for the standard contacts. All thermocouple contact layouts may contain either iron, alumel, chromel, constantan, standard (copper) or brass (dummy) contacts. The resulting assembly will be identified with an Amphenol® part number.

IDENTIFICATION

For the purpose of wiring identification, thermocouple contacts are marked in accordance with the following color code which agrees with the wire code.

Chromel. White
Alumel Green
Iron Black
Constantan Yellow

This identification is made by means of small dots of stain on solder well end of the contact and is in accordance with the listing shown above.

WIRE WELL DATA

| Contact Size | | 12 | 16 |
|-------------------------------------|------------------|-----------|----------------------------------|
| Well Inside Diameter | + .004 - .002 | .125 | .094 |
| Well Depth | + .031 - .000 | .250 | .188 |
| Solder Well Barrel Outside Diameter | | .166±.003 | .125 ^{+ .002} - .004 |

RECOMMENDED WIRE:

- I Chromel – Alumel: Use wire in accordance with AN-W-29
- II Iron – Constantan: Use wire in accordance with AN-W-8b

QWL

thermocouple arrangements

Military connector specifications do not provide for thermocouple contact usage in established MS inserts. Amphe-nol® has established a series of insert arrangements containing thermocouple contacts. Some inserts have been rotated into positions outside those covered by MS

drawings to prevent cross plugging. Available thermocouple arrangements are tabulated on the following pages. Please contact your local sales office or Sidney, NY for additional information regarding thermocouple arrangements particular to your application.

The following abbreviations are used in the contact material column:

| Abbreviation | Ir. | Con. | Cu. | Ch. | Al. | Dummy |

Other Heavy Duty Cylindrical Connectors Offered by Amphenol

Class “L” MIL-C-22992, QWLD and Star-Line

Amphenol meets the demands for heavy duty connectors by providing three additional cylindrical connector series, each with unique design characteristics for reliable operation in specific industrial environments.

Class “L”, MIL-C-22992 – for the heaviest electrical loads; for military and industrial applications.

- MIL-C-22992 qualification.
- Current range from 40 to 200 amperes.
- Direct current or single/three phase, 60/400 Hertz alternating current.
- Rugged shells are resistant to vibration, high impact, shock and corrosion
- Double stub threads per MIL-STD-1373 for fast coupling and easy cleaning.
- Five key polarization system assures that circuits with incompatible power characteristics (voltage, phase and frequency) are not mated.
- Crimp termination. Contacts can be soldered.
- Automatic grounding for safety.
- Unique arc quenching capability provides a positive safety feature if connectors are inadvertently disconnected under load.
- 4 shell styles with 7 insert patterns that facilitate large conductors.
- Grommets and seals provide waterproofing.

Heavy Duty Class “L” Connectors

QWLD – for most power and control circuits

- Military (MIL-C-22992) qualified connectors and industrial equivalents available.
- Increased shell size for greater durability than similar standard connectors.
- Crimp or solder termination.
- Double stub threaded per MIL-STD-1373.
- 7 shell styles with over 300 insert patterns (MIL-C-5015 inserts plus specials)
- Class C is pressurized; Class R is environmental.

QWLD Series

Star-line® Series – heavy duty environmentally sealed plugs and receptacles that are used in all types of industrial and aerospace applications.

- Equals or exceeds MIL-C-5015 E and R specifications.
- UL listed and CSA listed circuit breaking capability.
- Up to high amperage of 1135 amps at 1000VAC or DC rating available.
- Solder, crimp and pressure terminals. Circuit breaking power and control types.
- Double lead Acme threads provide complete coupling in one turn of the coupling nut, and do not clog under adverse weather conditions.
- IP67 rating for environmental sealing.
- Hard anodic coating provides dielectric strength with heat and corrosion resistance.

Star-Line Series

Star-line EX® Series – Hybrid form of the Star-Line series with higher temperature ranges. Cenelec Certified for use in Zone 1-IIc hazardous environments. EX Certificate #03ATEX 1101X.
