DisplayPort Panel-Mount Coupler

DisplayPort 1.4 Booster

Note: 25' lengths may not work at 4K 60Hz with all setups.

With a panelmount DisplayPort cable, you can provide remote access to a video source or display directly on a wall plate, front panel, custom enclosure, or any cuttable or punchable mounting surface. Home theaters, editing studios, computer labs, and retail displays all benefit from the cleanliness and hot-swapability of mounted DisplayPort jacks.

This cable is guaranteed compatible with our [DisplayPort Wall Plates](#) and anything created with our [Online Plate Designer](#). Supports DisplayPort 1.4 and HBR3.

[DisplayPort](#) is similar in concept and construction to HDMI, but while HDMI is targeted primarily towards home theater electronics, DisplayPort is more commonly found in computer-centric electronics. DisplayPort is capable of carrying several times the data of a DVI or VGA cable in a smaller form factor, and also carries high-fidelity digital audio.

Features:

- Panel-mountable Female DisplayPort Connector
- CL-2 rated for in-wall use
- Includes mounting hardware
- Gold-plated contacts
- Shielded against RFI and EMI interference
- DisplayPort 1.4 rated

Specifications:

- 1x Female DisplayPort Connector
- 1x Locking Male DisplayPort Connector
- Supports resolutions up to 4K UHD @ 60Hz
- Supports DisplayPort 1.4 and HBR3
- Wire Gauge 26 AWG
- RoHS Compliant
- CL2 rated
- Embedded 4-40 nuts with mounting screws included
- Allowable panel depth: 2.5mm (full mating)
- Recommended screw installation: hand tighten, 2.0 in-lbs maximum torque
